

MANUAL

ZS ROI / ZS API Integration and Management Platform

Important Notes for ZS ROI:

1^a. In order to be able to integrate into Zone Soft's Integration Management Platform, there must already be an active ZS Rest license

2^a. The activation of the ZSAPIFood (Developer) module in the ZS Lic License Management application must be requested for the ZS Rest license to be integrated

3^a. Only after the ZS Rest license request and the activation of the ZSAPIFood module, should the Developer request the license activation in the Integration Management Platform

1 – Platform integration management Zone Soft

- The integrator platform, aimed at Zone Soft partners who want to integrate their services using the API to send requests directly to the POS, aims to define the Endpoints that integrators should use.
- These Endpoints must be in accordance with the documentation available here: https://drive.google.com/drive/folders/1_Tli4QEEtNDN8h_uAoqqLnxSztsfX8Vf

1.1 – Registration of a new user

To register a new user in the Integration Management Platform of Zone Soft, you should access the website at: <https://developer.zonesoft.org/login>.

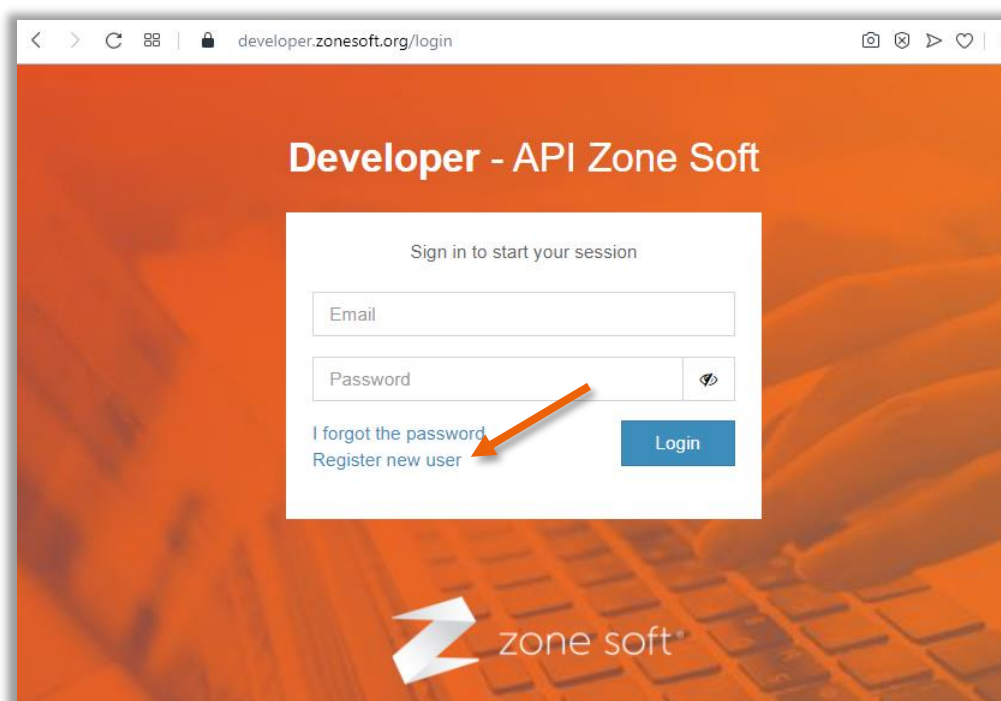

Figure 1 – Access the website of the Zone Soft integration management platform

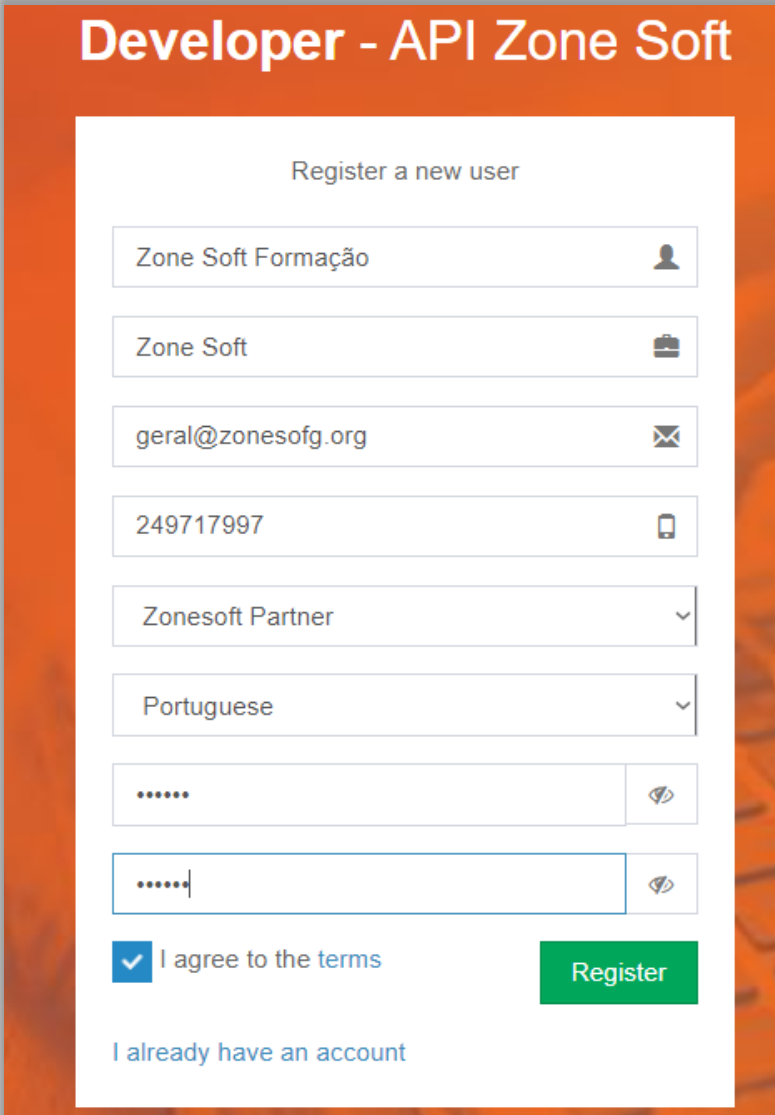

1 – Click on **Register new user**. The user will be redirected to the registration page.

Important Notes:

1st – The integration applications will always be associated with the registered account.

2nd – Notifications will always be sent to the registered e-mail address; it is not mandatory, but we advise that it is a general use e-mail.

3rd – It is not possible to change or change the properties of the applications for another user.

Register

[I already have an account](#)

Figure 2 – New user registration

In the new user registration window:

- 1** – In the **Name** field, enter the name that identifies the user.
- 2** – In the **Company** field, enter the name of the company.
- 3** – In the **Email** field, enter the valid email address, which will serve as access to the platform.
- 4** – In the **Phone Number** field, you must enter a phone number of the company or user.
- 5** – In the **Option** field, you must select the type of partnership you have with Zone Soft.
- 6** – In the **Country** field, select the corresponding country.

7 – In the **Password** field, enter a secure password that will always be required to access Zone Soft's integration management platform, and, **re-enter the password** placed in the previous field to validate the information in the Confirm Password field.

8 – Select the **I agree** to the term's checkbox, the user of Zone Soft's integration management platform should read the terms of access.

9 – Select the **Register** button.

A window will appear with the information that the registration was successful.

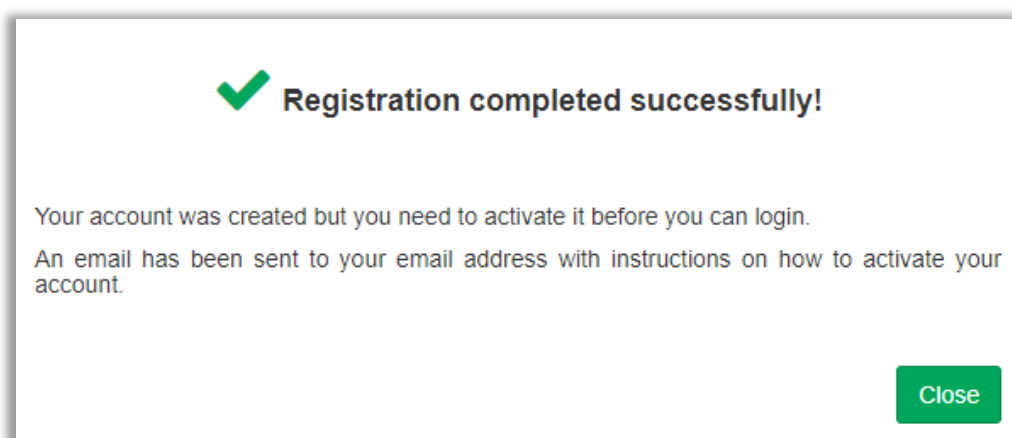

Figure 3 – Successful registration

The user will receive email, to confirm and complete the registration process on Zone Soft integration management platform.

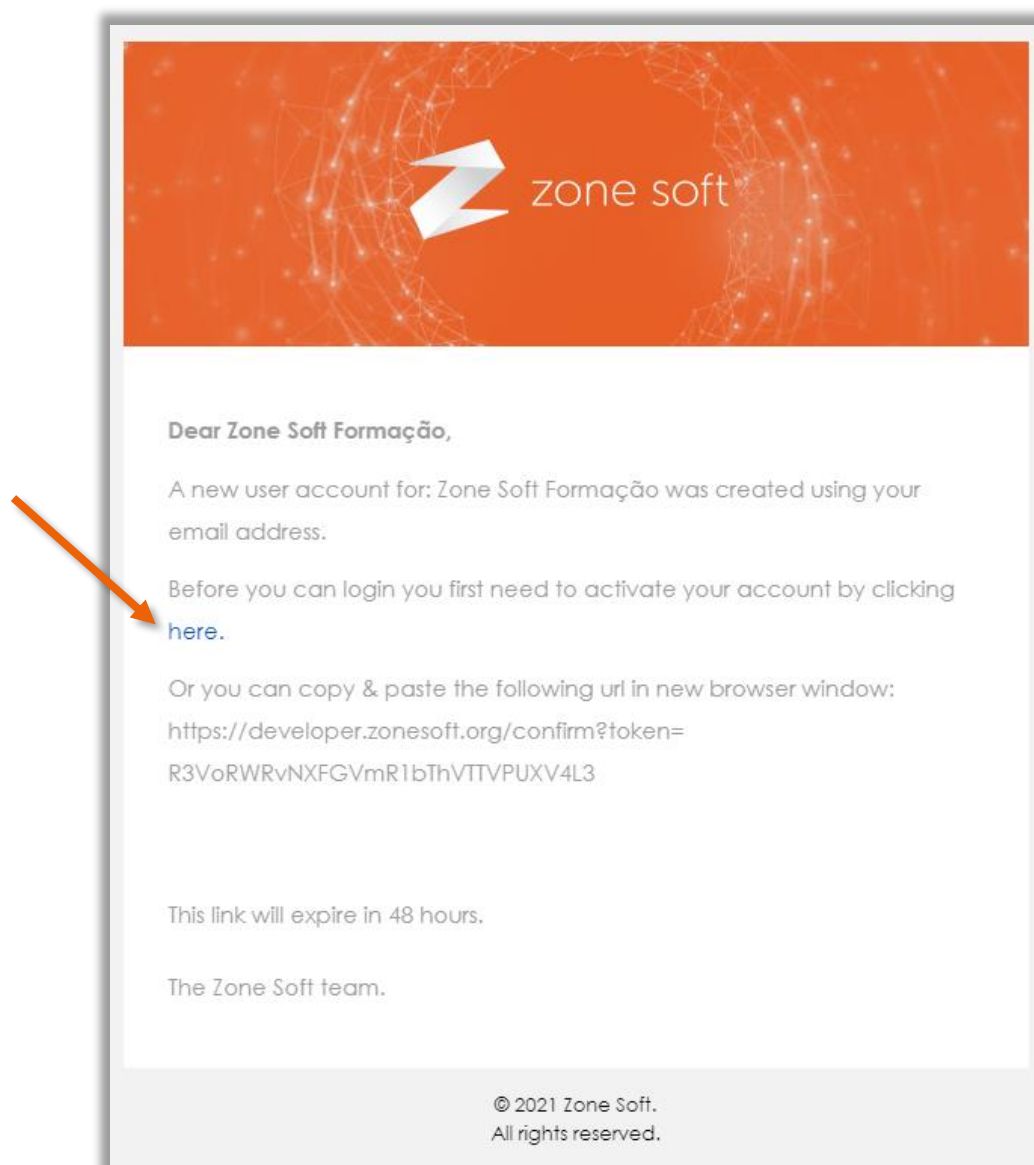

Figure 4 – Finalize account activation and registration

10 – In the email received, the user must click on the word **here**, present in the body of the text.

The system displays a new window, where it informs the user that the previously registered account has been successfully activated.

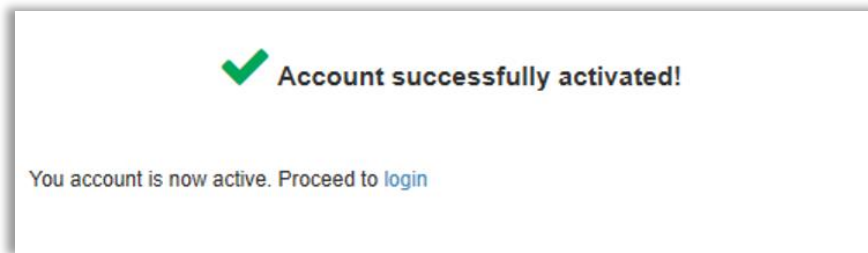

Figure 5 – Confirmation that the account is active

2 – Login

For the user to access the Integration Management Platform of Zone Soft, in a web browser you must enter the <https://developer.zonesoft.org/login>, enter the email and password corresponding to numbers 3 and 7 of the previous point.

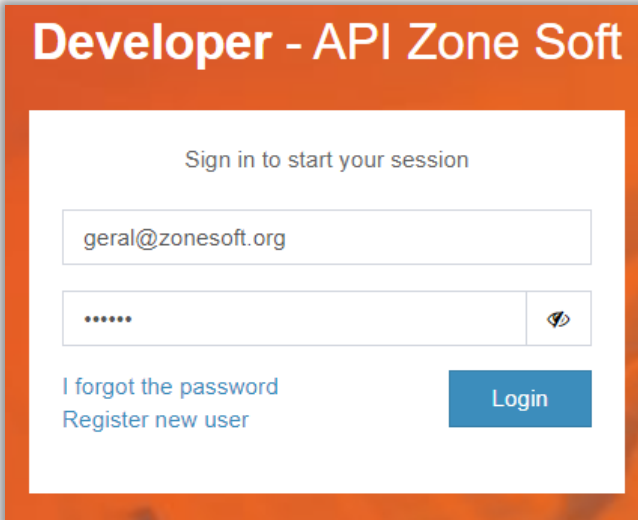

Figure 6 – Login to the Zone Soft's integration management platform

When the first time you log in and there are no active integrations yet, the user/integrator's profile is displayed.

Note: In the expression I want to set a new password, the user can change the password to access/login to Zone Soft integration management platform.

2.1 – New integration into the integration management platform

For the user to make a new integration on the platform, in the initial window of Developer – API Zone Soft, select New Integration.

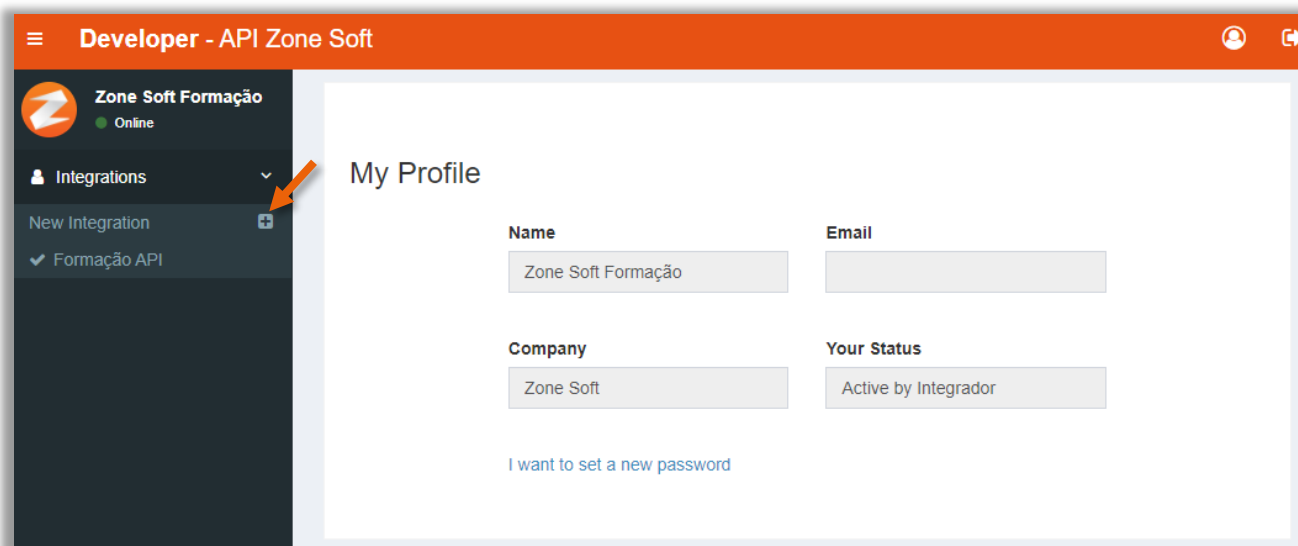

Figure 7 – My profile and select new integration

1 – Select the new integration botton.

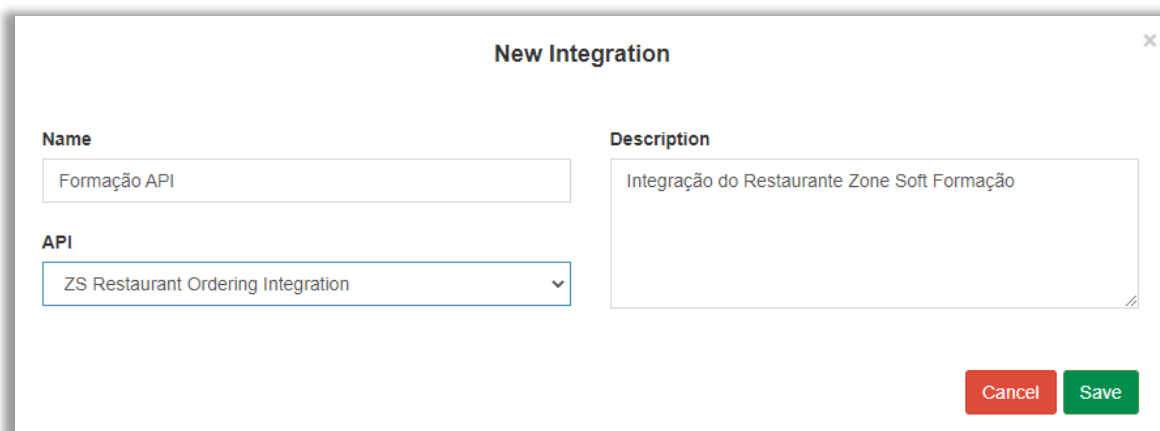

Figure 8 – New integration into the integration management platform

- 1 – In the **Name** field, enter an ID of the new integration.
- 2 – In the **Description** field, insert a brief description of what you want to do in this new integration.
- 3 – In the **API** field, select the **Zone Soft API** you want to integrate.
- 4 – Select the **Save** button.

After entering the data to the new integration, in the integration management platform, the user must wait for Zone Soft's validation for this new integration.

Figure 9 – Validation of the new integration into the platform by Zona Soft

2.2 – Associate¹ Zone Soft client to be integrated into the application

After the new integration is approved by Zone Soft, a new client can be created to be integrated, in Zone Soft integration management platform, select New Client.

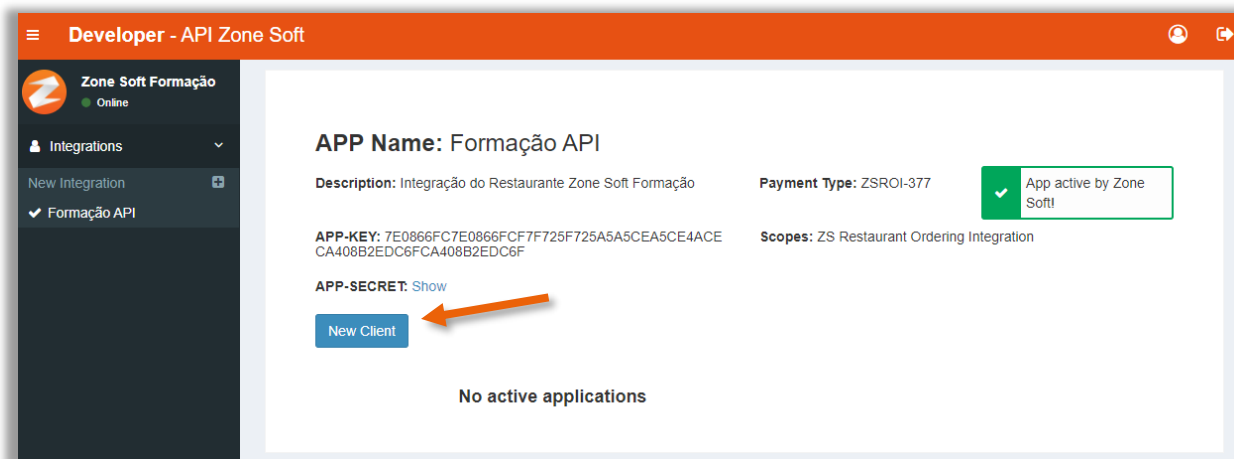

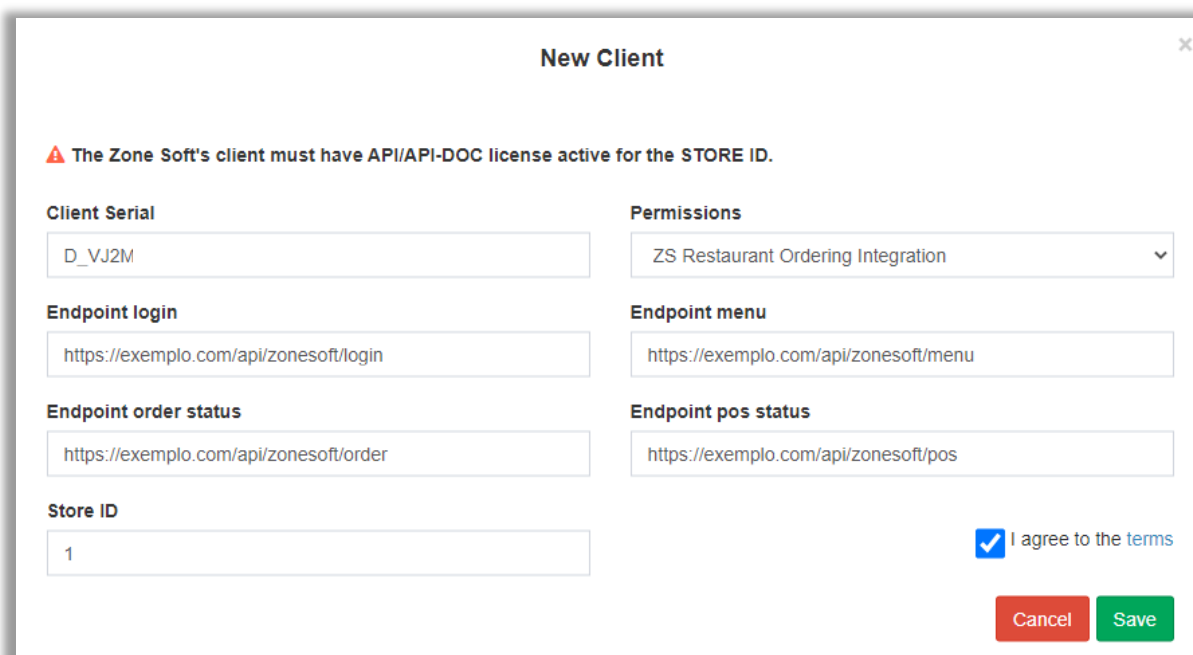

Figure 10 – Integration of new customer into the platform

In the window New Client, the user must fill in the identifying fields of the store:

The 'New Client' form contains the following fields and options:

- Client Serial:** D_VJ2M
- Permissions:** ZS Restaurant Ordering Integration (dropdown menu)
- Endpoint login:** https://exemplo.com/api/zonesoft/login
- Endpoint menu:** https://exemplo.com/api/zonesoft/menu
- Endpoint order status:** https://exemplo.com/api/zonesoft/order
- Endpoint pos status:** https://exemplo.com/api/zonesoft/pos
- Store ID:** 1
- I agree to the terms
- Buttons:** Cancel (red), Save (green)

A warning message at the top states: 'The Zone Soft's client must have API/API-DOC license active for the STORE ID.'

Figure 11 – New customer onboarding

1 – In the **Client Serial** field, the software license number/code must be insert.

2 – In the **Permissions** field, select the permission you want to integrate.

¹ **Important note:** The client to be integrated must have an active license of the ZS Rest software

3 – In the fields **Endpoint login**, **Endpoint menu**, **Endpoint order** and **Endpoint pos**, the information of the links must be inserted with the indication of each of the Enpoints ².

4 – In the **Store ID** field, you must select the store number referring to the license that will be associated with the new integration.

5 – Select the **Check Box**, I agree to the terms.

6 – Select the **Save** button.

At this stage, a communication will be sent via email to the customer, so that they can authorize and finalize the process of integrating their store into Zone Soft's integration management platform.

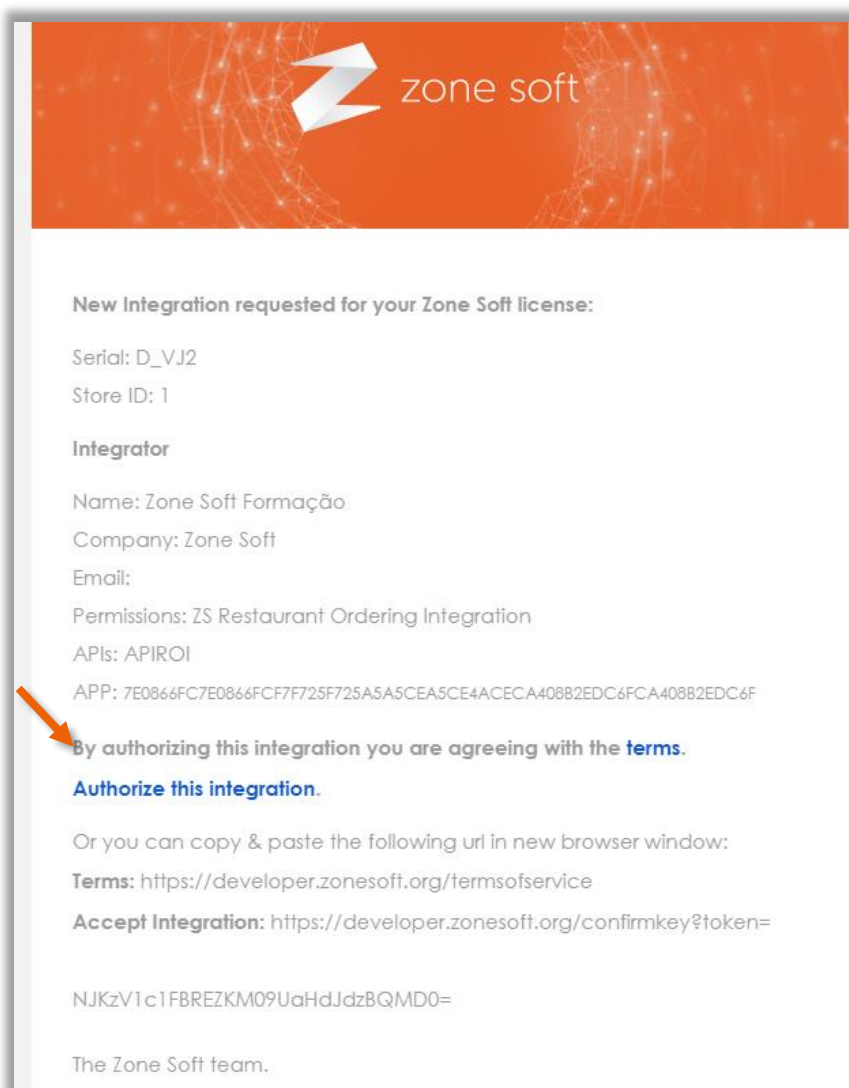

Figure 12 – Email for integration authorization.

² Endereço HTTPS.

7 – The customer must click on the expression **Authorize this integration**, present in the body of the text of the email, to finalize the integration in the integration management platform.

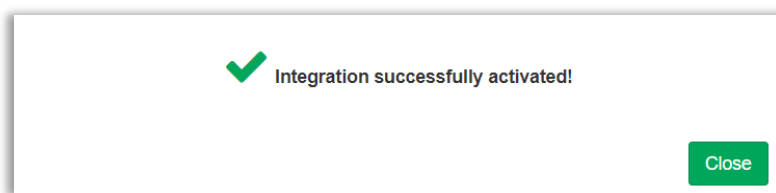

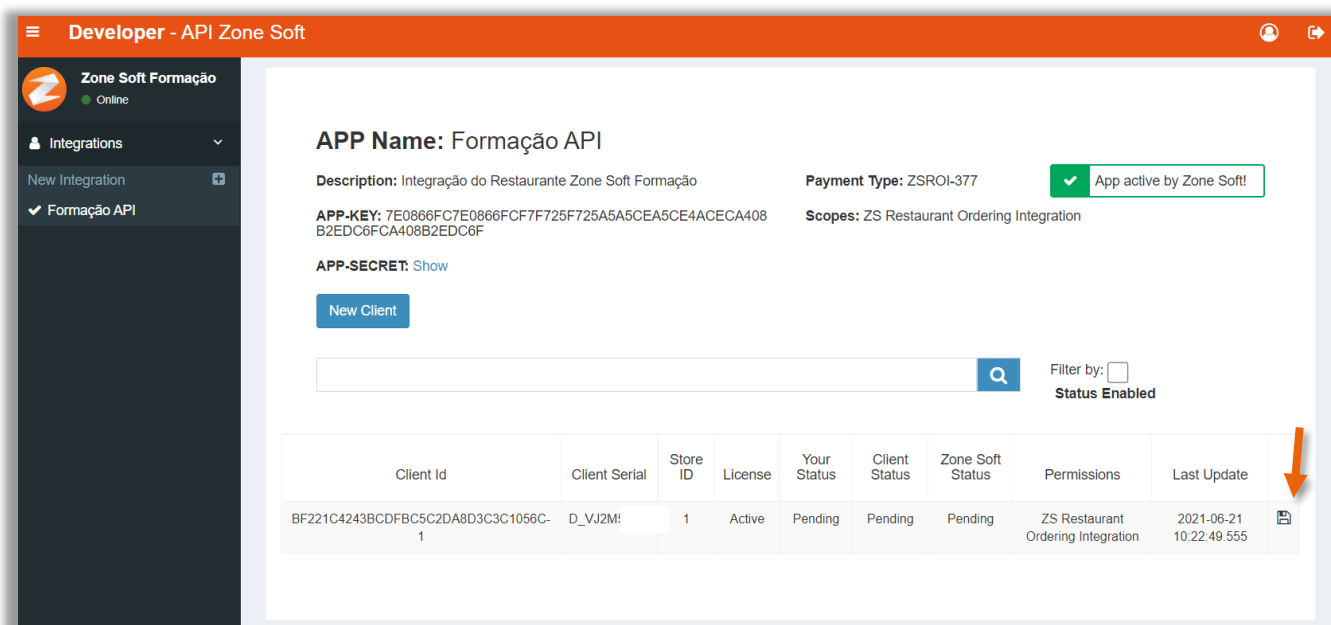

Figure 13 – Activation of the store interaction done successfully.

2.2.1 - Enable or disable Client ID status

In the Developer window, select the Save button.

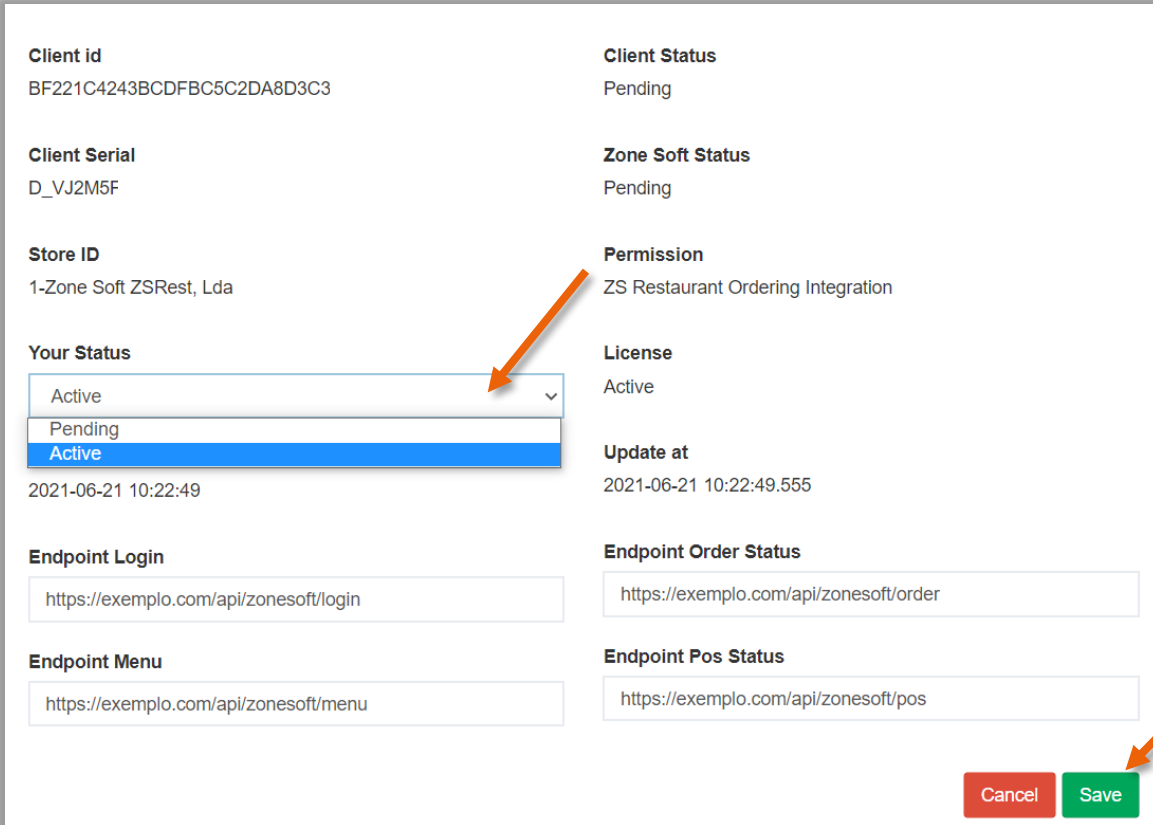

The screenshot shows the 'Developer - API Zone Soft' interface. On the left, there is a sidebar with 'Zone Soft Formação' (Online) and 'Integrations' (Formação API). The main area displays details for the 'Formação API' integration, including its description, app key, app secret, payment type, and scopes. A green box indicates 'App active by Zone Soft!'. Below this, there is a 'New Client' button and a search bar. A table below the search bar lists client details. An orange arrow points to the 'Last Update' column of the table.
