

FastBoot Update (Android 10, 11)

Nov, 2022

Fastboot update (Android 10)

1. While pressing "Left Scan Key + Right Scan Key", restart the device.
You will enter FASTBOOT MODE.

2. Download fastboot file (dsxx-x-fastboot-xxx-user_md5.zip) into your PC.

3. Run "Verify_Checksum.exe" to check the files.
Unzip "dsxx-xx-fastboot-xxx-user.zip"

파일명	압축크기
ds6-q-fastboot-546-user.zip	1,055,480,2... 1,0!
ds6-q-fastboot-546-user.zip.md5	33
Verify_Checksum.exe	14,742

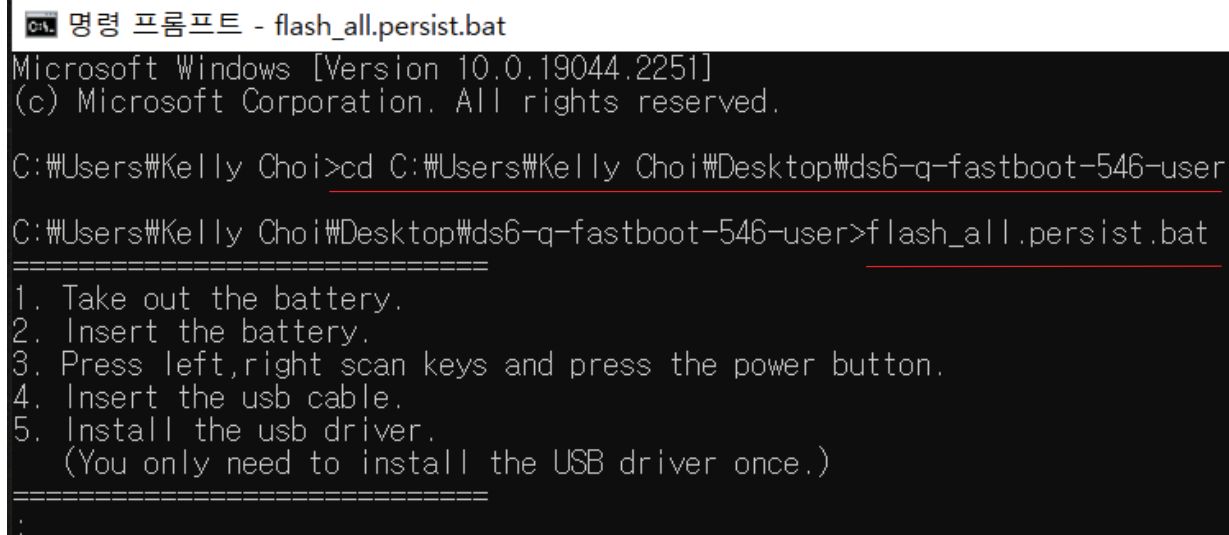

4. Connect the device to PC with USB cable

Fastboot update (Android 10)

5. Open "Command-line". Go to the directory of unzip file (/dsxx-fastboot-xxx-user)

6. In "Command-line", run "flash_all.persist.bat"

<Example>

```
명령 프롬프트 - flash_all.persist.bat
Microsoft Windows [Version 10.0.19044.2251]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Kelly Choi\Desktop\ds6-q-fastboot-546-user>flash_all.persist.bat
