

The mobile organization system : protects your Metabo tools and much more besides

- Extremely robust, unbreakable boxes with a wide carrying handle
- Carefully thought-out organization system within the box – ensures the correct accessory is always with the right tool
- special inserts for accessories and small parts, transferable from box to box
- boxes can be stacked and linked
- well-structured, clearly arranged storage system, for the workshop, the car, anywhere
- Numerous possible uses, with individually configurable foam inserts (accessories)
- The Metabox stays in shape – even at extreme temperatures (–40 to +90 °C)
- No protruding parts, and thus no danger of getting caught up, e.g. on building sites
- Clever accessories for mobile use, e.g. a carrying belt for carrying several linked Metaboxes, providing greater security, for example, when climbing scaffolding, because both hands are free.

		Order No.
