

Telephone Protection Hood Type 404 / GRP

**Especially suitable for use
in noisy work environments**

- ▶ Sound absorbt up to 25 dB(A)
- ▶ Weatherproof
- ▶ RAL coatings on request
- ▶ GRP
- ▶ DIN 5510 class S4

Application

The telephone protection hood is an excellent aid to cut out extraneous noise and improve audibility in noisy surroundings when open telephones have to be installed for economic reasons.

The special shape of the hood and its inner lining of sound-absorbing material optimally reduces noise in the area of the telephone. Eavesdropping is also made difficult. The best acoustic effect is achieved when the protection hood is mounted with its back facing the noise source or loudest noise source (see directional diagram of sound-level reduction).

Design GRP

Construction made of glass-fiber reinforced polyester. The inside with sound-absorbing mineral fibre boards behind a perforated plate cover.

Technical specifications

Housing	GRP
Paint	Powder coated e.g. orange, yellow Special coating on request
Dimension	As per drawing
Weight	Head 40 kg Console 17 kg
Colour Console	Yellow
Sound absorbt	Up to 25 dB(A)

Material outsides:

GRP
DIN 5510
Class S4

Material inside:

Perforated plate metal ST37-2

Material insulation:

Rockwool RAF-SE
