

VCL-17

Figure 1

Dimensiones aproximadas en mm • Approximate dimensions in mm

Technical drawing showing two adjacent rectangular blocks. The width of each block is indicated as 160. The distance between the right side of the first block and the left side of the second block is also indicated as 160. The blocks are shown in a perspective view, with a front face and a top face. The front face of each block has a small rectangular feature near the bottom center.

Two pole insulated (phase-phase connection) voltage transformer, support type, valid for indoor service.Cast resin.
Designed for measurement and/or protection.
Manufactured as per standards UNE, IEC, VDE, IEEE.
Other standards or special technical specifications on request.

TRANSFO. TENSION

VCL-17

VOLTAGE TRANSFORMER

CARACTERISTICAS ELECTRICAS

	UNE•IEC	IEEE
• Tensión nominal de aislamiento (kV)	17,5	15
• Tensión máxima de servicio (kV)	17,5	15,5
• Frecuencia de utilización (Hz)	50/60	
• Tensión de ensayo a frecuencia industrial (durante 1 min)		
- Entre primario y secundario (kV)	38	34
- Entre secundario y masa (kV)	3	2,5
• Tensión inducida a 120 Hz (kV máximos)	38	34
• Ensayo impulso tipo rayo (kV cresta)	95	110
• Tensión secundarias		
- Medida (V)	100, 110 or 120	
• Sobretensión admisible en permanencia (U_N)	1,2	

ELECTRICAL CHARACTERISTICS

- Highest voltage (kV)
- Highest voltage for equipment (kV)
- Frequency (Hz)
- Test voltage at industrial frequency (during 1 min)
 - On the primary and secondary (kV)
 - On the secondary winding (kV)
- Induced voltage at 120 Hz (maximum kV)
- BIL and full wave (kV crest)
- Secondary voltage
 - Measure (V)
- Allowed continuous overvoltage (U_N)

CARACTERISTICAS MECANICAS

- Par de apriete de la tornillería
 - Terminales primarios M10
 - Terminales secundarios M6
- Peso aproximado
- Bornes primarios y secundarios de latón.
- Cubierta de bornes secundarios de policarbonato.
Bajo pedido puede suministrarse en acero zincado y bicro-matado.
- Tornillería de acero
- Otras características bajo consulta.

MECHANICAL CHARACTERISTICS

- Torque
 - Primary terminals M10
 - Secondary terminals M6
- Aproximate weight
- Primary and secondary terminals made of brass.
- Polycarbonate covers for secondary terminals.
Can be supplied in zinc - bichromium plated steel, on request.
- Screws made of steel
- Other specifications on request.

PRESTACIONES

SERVICES

CLASES Y POTENCIAS ACCURACY CLASS AND BURDEN		
NORMAS • STANDARD		
IEC		
FACTOR DE TENSION VOLTAGE FACTOR		POTENCIA DE CALENTAMIENTO THERMAL BURDEN RATINGS
1,2 U_N en permanencia 1,2 U_N continuous		
VA	Cl.	VA
40	0,2	a: 20-30°C. ambiente
125	0,5	600
250	1	at: 20-30°C. ambient

- Estas potencias son orientativas
- Posibilidad D.R.P. por toma secundario (consultar potencia).

- This rated outputs are orientative values.
- Possible D.P.R. by secondary tapping (consult burden).
