## LET'S GET STARTED!

The first step is to read the next page. It tells you what you need to know about the exercise sheets in this book. We call them *Best Move Contests* because they are fun and challenging. I hope you feel like a winner when you find the answers!

Besides the exercises, there are some puzzlers from Lily the Pawn, plus two special lessons with Major Dooper and Mister Potato that will teach you how to improve at chess.

The solution pages are very long. We give the winning lines, and also explain why other moves are wrong. Good idea, eh?

Thanks to my pals at *Scholar's Mate* magazine for all their help, especially Biff the B, Lily, and Rocky Rook. That's them waving from the second storey windows.

GOOD LUCK, everybody!

## Kiril

## HEY THERE, BOYS AND GIRLS

If you like my blue exercise book, then check out its green companion!

Winning Chess Strategy For Kids is a fun chess course written just for you. It explains in detail the things you will be practising in these exercises.

So if you didn't read the green book yet, you might want to get a copy. It is full of more great cartoons and puzzles.

Still available from most chess stores and pawn shops.

# BEST MOVE CONTESTS

## INFORMATION and INSTRUCTIONS

White goes first in all positions.

Always play the best defence for black.

There are 100 exercise sheets in total. They start off easy, but get tougher as the book goes on. Each sheet has nine diagrams and one question.

In numbers **1-2-3**, white has a forced **mate**. Usually you can checkmate in four moves or less, but sometimes it takes longer. The three problems have a theme, like “back rank mate”, and the last one in the row is the hardest.

In numbers **4-5-6**, white has a combination that wins **material**. At the end, you should be ahead by a piece (N, B, R, Q) or by the exchange (R for B, or R for N). Winning a pawn is not enough. The three problems in this row also have a theme, such as “knight fork”.

In the bottom row of positions, there is one **best move** for white. But the goal is not always the same. In some cases, white wins or gets an advantage. In other cases, white draws or gets an equal game.

Number **7** is a defensive problem where white must guard against a threat or save what looks like a hopeless situation. “*White to move and not lose.*”

Number **8** is a general problem. Most are middlegame positions, but there are also openings or endings. The best move may be tactical or positional, and its purpose can be almost anything. For example, to develop a piece, force an exchange, avoid a trap, build an attack, create a weakness, or win a pawn.

Number **9** is an endgame. If the position seems equal or better for white, then there is a winning line. If it looks like black stands better, then white has a move that will at least draw.

Number **10** is a bonus question. Some are challenging, some are insightful, some are just fun.

**Solutions** are at the back of the book. The pointing finger at the bottom of each sheet tells you which page. ♞ 224 means “see page 224”. Wrong moves are marked “?” and shown in parentheses and italics after the correct lines. For an explanation of the evaluation symbols, see page 7.

**Scoring.** The best way to do these exercises is to write down your answers for all ten problems on a sheet before looking at the solutions. Give the whole winning line, not just the first move, and include important alternatives for black. Score 10 points for each correct answer. Only take 5 points if you get the first move, but miss something afterwards. A perfect mark is 100!

# HOW TO READ A CHESS GAME

Reading chess is easy as A B C! The board has 8 *files* and 8 *ranks*. Files are the rows of squares that go up and down. Each one is named by a letter. Ranks are the rows that go sideways. Each one is named by a number.

Every square has its own name too. The first part is its file. The second part is its rank. In this diagram, the white pawn has moved to **e4** and the black pawn to **e5**.

When a move is written down, the first capital letter shows which piece moves. **Q** is queen. **R** is rook. **B** is bishop. **N** is knight because the king is **K**. If there's no capital letter, that means a pawn moves.

Next comes the square the piece moves to. **Bc4** shows that a *bishop moves to the square c4*.

When a piece is captured, an **x** is put before the square. **Qxf7** means that a *queen takes on f7*.

When a pawn captures, the letter of the file it starts on is given first, then an **x** followed by the square it takes on. **exd5** says a *pawn on the e-file captures on the square d5*.

Sometimes there are two pieces of the same kind that can move to the same square. When that happens, another small letter is written after the piece to show which file it came from. **Rae1** says that the *rook on the a-file moves to square e1*.

If the pieces that can move to the same square are also on the same file, we show which piece moves by using the number of the rank that it started on. **N6e4** means that the *knight on the 6th rank moves to e4*.

Here are some special symbols :

<b>+</b>	<b>check</b>
<b>#</b>	<b>checkmate</b>
<b>O - O</b>	<b>castles kingside</b>
<b>O - O - O</b>	<b>castles queenside</b>
<b>e. p.</b>	<b>en passant</b>
<b>=Q</b>	<b>promotes to queen</b>
<b>1 - 0</b>	<b>white wins</b>
<b>0 - 1</b>	<b>black wins</b>
<b>½ - ½</b>	<b>draw</b>
<b>!</b>	<b>excellent move</b>
<b>?</b>	<b>mistake</b>
<b>!?</b>	<b>cool move</b>
<b>?!</b>	<b>weird (weak) move</b>

For an explanation of the evaluation symbols used in the solution pages of this book, talk to Biff the B. He's right next door at Chess Lingo.

# CHESS LINGO

LET'S "EVALUATE"

The word 'evaluate' means to put a value on something. In chess, we make an *evaluation* when we decide which player has the better position.

To evaluate a chess position, we have to think about several things. Material, king safety, and freedom of the pieces are all important.

We must also look at the possible plans and tactics for each side and see how the game might continue.

After analyzing all the "elements" of a position, we combine them into our overall conclusion.

Many chess books and magazines use the following special symbols to show their evaluations:

- +− *White is winning.*
- ± *White has the advantage.*
- ±̄ *White has a slight advantage.*
- = *The position is even.*
- ∞ *The position is unclear.*
- ∓̄ *Black has a slight advantage.*
- ∓ *Black has the advantage.*
- −+ *Black is winning.*

Calling a position "even" is not the same as saying it's a draw. It can also mean that both sides have an equal chance of winning.

A "slight advantage" means that one player stands a little better. Maybe they have a lead in development or the opponent has doubled pawns.

We say that somebody has "the advantage" if they are up a pawn or they have something just as good as a pawn, like a big attack. But when the other side has active pieces or a counterattack, then an extra pawn is not enough to claim the advantage.

A player is "winning" a game when they are ahead in material by more than a pawn, and the opponent has nothing in return. A super powerful attack may also be a winning edge. In some endings, an extra pawn is considered a winning advantage.

An "unclear" position is roughly balanced but very complicated.

Nobody is born a chess champion. Even gifted players must work at the game if they want to improve. Talent is not enough. Good study habits and determination are just as important.

Anyone can become a strong chess player if they are willing to put in the necessary time and effort.

### **TACTICS!!**

The one thing that separates players the most is tactics. The ability to see ahead and calculate variations is the key to winning.

You can increase your tactical skill by solving problems like those in this book. Here are some tips on the best way to do the exercise sheets:

1. Set up the positions on a board if you find that easier than looking at a diagram. But always try to find the solution in your head, without moving the pieces. This makes it more like a real game.

2. Write down your answers. Do not rush to check the solution as soon as you see a good move. Work out the variations first. Look for hidden defences. Remember, obvious moves are often wrong!

3. Take your time. The main goal in tactics is accuracy. It's better to work for two hours on a sheet and score 90% than to spend twenty minutes and get 60%.

4. Don't give up easily. If a problem seems too difficult, go on to another position, and come back to it later. A fresh look the next day is sometimes all it takes to find the winning idea. If you still can't solve it after several tries, then look up the solution.

5. When you complete a sheet, check your answers. If you get any wrong, figure out why. Once you understand your mistake, then try again to find the correct solution.

Even if you have the right answer, it is still instructive to play through the wrong moves on the solution pages.

6. Keep track of the problems that you miss or have trouble with. These are the positions that can teach you the most. There is something about them which shows a weak spot in your chess skill. When you are done with the book, redo these problems to reinforce what you have learned.

7. Don't be in a hurry to finish all 100 sheets. This is at least a year's worth of material. You won't learn as much by speeding through them. To do well on the harder problems in the latter part of the book, you need to put enough work into the early part. Doing one or two pages each week is a normal pace for making steady progress.

8. This is a workbook. Work at it. The problems are challenging. Don't expect to solve them all. But make the effort, that's the main thing. The search for ideas and calculation of variations is what matters. The *best move* is not the goal. The method of finding it is.

## PRACTICE

If you want to get better at chess, you have to practise regularly. A few games a week are essential.

They say "Practice makes perfect," but that's only true when it is good practice. So stay focused and play seriously. Quick and sloppy games will not help you improve. Consistent accurate play is what to aim for.

It's best to practise with stronger players. Or against someone just as good as you. Nobody gets better by beating up on easy opponents. They let you get away with inferior moves. You want a player who will see your errors and force you to be sharp.

Playing against a computer is good, but human opponents are preferable.

The internet is an excellent place to practise. There are lots of websites where you can always get a game. But don't waste your time on blitz. It only gives you bad habits. You need to practise thinking, so avoid games where you have less than 15 minutes.

Besides playing normal games or doing the “chess workouts” given on page 22, you can also practise:

- ♦ *Winning a won game* by playing out the positions reached at the end of the combinations on the second row of the exercise sheets.
- ♦ *Middlegame planning* by playing on from the end positions of the lines in opening books. Choose openings that you use or you want to learn.

## STUDY TIME

Improving is a long slow process. You have to be dedicated. The more time you can devote to chess, the quicker your progress will be.

The hours you spend on the game should be divided between practice, problem solving, and book study.

Read books on different subjects: endings, openings, strategy, or game collections. A balanced approach will make you a well-rounded player.

Spread your chess throughout the week. It is much better to study one hour per day than to have one long session on the weekend. Try to set up a regular schedule.

## ENDINGS

If the endgame is not your friend, then it's your enemy. Don't scrimp on studying this part of chess.

After tactics, endgame technique is the most practical skill you can develop. A good endgame player will win the close battles and draw the tough ones. Work extra hard on the #9 problems in this book.

## OPENINGS

Learning openings is important but they're only one part of the game. Don't make the common mistake of focusing your studies on them. If you understand the general principles of

good opening play, you will always reach a decent middlegame.

Your choice of openings is a big decision. Play whatever you think is cool, but stick to the same lines. It takes time to master an opening and gain the experience you need to play it well.

As black, pick one defence against 1.e4 and one against 1.d4. As white, choose a first move, then learn one setup against each black defence. Restrict your opening study to these lines. After every game, check to see where you left “the book”.

## TOURNAMENTS

Play in as many tournaments as you can. For the aspiring player, there is no substitute for serious competition. When you have a choice of sections, play one group above your rating.

Win, draw, or lose, every game is a lesson. If you do not have a coach, analyze them with a stronger player or a computer. Identify the winning move, the mistakes, and the places where you could have played better. This material is pure gold.

Well, good luck, everybody. I know you'll enjoy chess even more as you improve. So long!

# LILY'S PUZZLERS

**MATE IN 1**

**MATE IN 2**

**1** WHITE TO MOVE  
SOLUTIONS PAGE 237

One way to get better at chess is to play practice games. But you don't have to start with all the pieces on the board. There are lots of exercises with fewer pieces that can improve your skills. And guess what? They're fun!

The first part of this lesson covers basic exercises for players who have not studied chess before. Once you get good at these, then you can go on to the more advanced games.

It's best to do these exercises with a stronger player, or at least against somebody who is as good as you. If

you have trouble finding an opponent, you can also do them on a computer. Programs usually have a feature that lets you set up positions.

To get the most from the exercises, write down the moves and replay them afterwards. Look for mistakes, better plans, and important alternatives. You can then start playing again from any position that is interesting.

Unless it says otherwise, the rules for these games are the same as in regular chess. (Only the *King Game* and *R's vs. P's* have special rules.)

## BASIC MATE EXERCISES

The goal in these three games is to checkmate the black king as fast as possible. Count the moves and keep track of your record.

If you want some extra fun, then play the mate exercises with a friend as a DUEL. Each player gets white once and black once. Whoever mates the quickest is the winner.

### **ONE ARMY - ONE KING**

This battle should not last more than 10 moves. The queen plus one or two other pieces are enough for the job.

### **WALL OF PAWNS**

Mate in less than 10 moves against the *Wall of Pawns* is excellent. More than 20 is too slow. Sacrificing a piece is often the shortest road to victory.

If you're the defender, don't advance too many pawns. Opening the position only helps the attacker. Hang back and force white to break through.

## **CASTLE DEFENCE**

Black will normally castle kingside in *Castle Defence*. White can practise attacking different formations if black varies how they develop their bishop (fianchetto on g7 or centralize on e7).

## BASIC ENDGAME EXERCISES

The next group of games are endings where white is ahead by one or two pawns. The main thing to learn here is how to *control* what happens on the board. One slip will usually allow black to hold the draw.

### **TWO-ON-ONE**

This ending is always a win, but white must decide carefully when to block or trade pawns. (See *problem 9 on Best Move Contests #1, #4, #19, #40, #52.*)

## THREE-ON-TWO

White should score 100%. However, this endgame can become difficult (or impossible) to win if:

1. the white pawns advance without the support of their king.
2. an exchange leaves white with isolated pawns (and no passer).
3. the pawns get blocked and white has a backward pawn.
4. the black king attacks the white pawns from beside or behind.

Below are two variants of the game. In the first, black's weak pawns make it easier for white to win. Black has greater chances to draw in the second version because white has an h-pawn.

### 3-on-2 Isolated

(See problem 9 on Best Moves #22, #49.)

### 3-on-2 Wing

## ROOK + 2 vs. ROOK

This game is harder than it looks. The white king and pawns must advance together and not let the black king set up a blockade. The rooks work better at a distance: white's from the side, and black's from behind the pawns. Losing a pawn usually means a draw.

## MINOR + 3 vs. MINOR + 1

### B vs. B

### B vs. N

### N vs. B

### N vs. N

The four exercises above are alike. White is up two pawns in each. Only the type of minor piece changes. The strategy is the same. White will march forward and try to trade minor pieces. Black will look for a piece sacrifice that eliminates all of the white pawns.

## OTHER BASIC EXERCISES

### ROOKS vs. PAWNS

#### RULES

1. White wins if a pawn reaches the last rank safely.
2. Black wins by capturing all of the pawns.
3. White gets to make the first two moves in the game. (Some people like a3 and h3; others e4 and d4.)

Play this exercise from both sides. Eventually you will find that the rooks have the advantage.

If you want to make it tougher on the rooks, change the rules so that white wins by getting a pawn to the last rank, even if it can be captured immediately.

Or, to make it tougher on the pawns, change the rules so that white only has one move on their first turn.

### KING GAME

#### RULE

1. Whoever gets to their last rank first wins.

This game is a good demonstration of distant opposition. (See position 9 on Best Move Contests #31, #70, #79.)

By taking the opposition, a king can force his way by another king, OR, he can stop the other king from getting by him. White can always win here if they play the one correct first move.

If we change the rule so that white wins by getting to a8 (or black to a1), then the game is drawn with best play. The white king can still force his way forward, but he can't "turn the corner" towards a8 if black defends properly.

### ADVANCED EXERCISES

Are you ready for the big leagues?

### PAWN GAME

Any endgame with other pieces can simplify into a pawn ending. So it pays to know them well. This game is great!

The “openings” in these exercises are not normal game positions. But after about 15 moves, you will usually reach a game-like ending. Then the real practice begins.

### ROOK GAME

Rook endings are the most common kind of endgame. That’s because the rooks are often the last pieces to be developed (and traded). Being good at rook endings is a useful skill that takes time to learn. Do this exercise a lot.

The main strategic principle in rook endgames is *rook activity*. We want our rooks to be *active* (free to move and attack), and the opponent’s rooks to be *passive* (stuck guarding pawns).

### ROOK + 4 vs. ROOK + 3

Play this game from both sides. As white, your goal is to win. As black, not to lose. Neither side is easy.

White aims for a winning Lucena position, and black for the Philidor draw. (See #17, #35, #38, #44.)

### DOUBLE “EX” GAME

#### R’s vs. N’s

#### R’s vs. B’s

When we are “up the exchange”, we do not have more pieces, but we are “ahead in material”. It is the *quality* of the pieces, not the quantity, that gives us an advantage.

The way to show the superiority of a rook over a minor piece is to open the position as much as possible. The more open the board becomes, the stronger the rook gets.

A bishop also benefits when a game opens up, but not as much as a rook. So when you are ahead “the ex”, the correct strategy is the same whether your opponent has a bishop or knight. Open the position.

The defender should play to keep things closed and to hold their share of the centre. In general, the minor pieces can deal with one open file, but two open files are a problem.

A standard way to win when you are up the exchange is to give back the rook for a piece and a pawn to simplify into a won pawn ending.

#### R’s vs. B+N

### R's vs. R+N

### R's vs. R+B

### BISHOP GAME

### KNIGHT GAME

### B's vs. N's

### B+N vs. Opposite B+N

### QUEEN GAME

### Q vs. R's

### Minor Piece Game

### Major Piece Game

White is only up one exchange in the two *Ex Games* on the left. That means less room for error.

The most instructive of the exercises with minor pieces is the classic battle of *Bishops vs. Knights*. In the hands of a master, this is almost a winning advantage for white. The player with the bishops should keep their pawns flexible, open the position as much as possible, and seek play on both sides of the board. The knights want to do the opposite: lock the pawn structure, keep the centre closed, and limit the action to one side of the board.

Another exercise that deserves more play than others is the *Queen Game*. Queen endings often arise from pawn endings after both players promote a pawn. Two things to note: 1) The main defensive idea is perpetual check. It is difficult to win unless your king has good pawn cover. 2) A passed pawn is usually better than an extra pawn.

Well, friends, I hope you enjoy these games. They can definitely make you a stronger player, and not just in the endings. Practising with the individual pieces in simple situations will also improve your ability to use them in more complicated middlegames.

10 Without any help from other pieces, how many knights are needed to checkmate a lone king in the centre of the board?

You don't need big muscles or fast feet to play chess well. It's the grey stuff between your ears that matters. Knowing how to use your brain is what makes a winner in this game.

Did you know there are 100 billion neurons in a human brain? Or that brain waves travel at 100 meters per second? That's a lot of thinking power!

## IMAGINATION

Chess is mainly a visual skill. During a game, the brain receives all of its information from the eyes, and most of a player's thoughts are visual rather than verbal. Sometimes we think in words, but usually we think in images. We see the pieces, *perceive* their relationships, *imagine* their movement. These things can be described in words, but the basic brain activity is visual.

This explains why we play chess by sitting and staring at the board. Our eyes focus on the pieces and squares, creating a background picture for the mind. We then use our imagination to move some of the pieces "in our head", while we still see the unmoved pieces as they are, on the board. In this way, we are able to look several moves ahead. Did you ever try playing blindfolded?

## BRAIN WORK

The primary job for the brain in a game of chess is to choose a move when it's our turn. It sounds very simple, but making this decision is a complex process.

A brain's work can be split into six parts: analysing the current situation, making a plan, picking possible moves, calculating lines of play, evaluating future positions, and last but not least, actually deciding on the move.

These components of chess thinking are not a step-by-step procedure. We will talk about them separately, but in reality, they are always mixed together.

## ANALYSIS

To *analyse* means to study a whole thing by looking at its individual parts. We analyse a chess position by examining its strategic and tactical elements. Strategic elements include material, king safety, and freedom of the pieces.

It's always important to know the material count. Make sure you notice any imbalances, such as bishop for knight. Don't think in terms of points. Instead of being "ahead one point", say "up a pawn", or "rook for bishop and pawn".

The safety of the kings will tell you if there is an opportunity to attack, or the need to defend. Determine the freedom of each piece by looking at its mobility and defensive duties. Other positional factors to consider are central control and pawn structure (weak pawns, passers, rams, majorities, etc.).

Tactical elements are things like pins and forks, or the arrangement of pieces that might allow a combination. You should also look for unguarded pieces, possible captures or checks, and especially, any threats to win material or force checkmate.

By analysing the details in a chess position, we obtain a clearer view of the entire board. Throughout a game, it is essential to keep track of the basic elements. Many things stay the same for a long time. But some change every turn. Our task is to recognize how each move alters the position and to blend those changes into our understanding of the current situation.

## **PLANNING**

A player should always have a plan. We need to know what our goals are on every turn. There are certain things we want to accomplish and other things we want to prevent. The plan should be based on our analysis of the position. That's where we discover clues to the correct strategy.

Once we have a plan, it acts as a guide. Like a general principle, it helps us to find the best moves and steer a course through the sea of possibilities.

Plans can take many forms. Some are general, others are specific. Some are long-term, others last only a few moves. Some are positional, others tactical. The situation on the board determines which kind of plan is appropriate.

Specific plans are detailed, like "manoeuvre a knight to f5", "double rooks on the e-file", or "try to exchange the dark square bishops".

Examples of a general plan are "attack on the kingside", "keep the centre closed", or "trade down to an endgame".

A general plan should address the following questions: Do you want to complicate or to simplify the game? Will you take risks or play it safe? Are you avoiding trades or seeking them? Do you want to open the position or keep it closed? Or perhaps open one side and close the other? The answers usually depend on the balance of position.

Plans will normally have several parts, both general and specific. They also include flexible alternatives, depending on how the opponent plays.

Our plan must change with the position. After any significant change, such as a combination or multiple trades, take extra time to work out a new plan.

Don't think only about your own ideas. There are two sides to chess thought: half white, half black; half defend, half attack. Get inside the opponent's head. Look for the purpose in their moves and figure out their intentions.

It's smart to put your plan into words. Then you know you really have one!

## CANDIDATE MOVES

A brain doesn't play chess the same way that a computer does. Programs use the "brute force" method to calculate every possible variation. Humans have to be selective about which moves they look at. (In case you don't know, the term 'variation' means a series of moves, or a line of play.)

Before we start to calculate, we should first select our *candidate moves*. Sometimes there is one obvious choice, but on most turns, there will be two or three reasonable move options. After we work through each of the options, we compare our findings, and only then, decide which move to play.

Always consider captures, checks, and moves that threaten something. They are *forcing moves* which limit the opponent's reply and let us calculate further ahead. However, forcing moves are not necessarily better than non-forcing.

Get in the habit of looking at crazy sacrifices. They are the stuff that wins games. We have to look at all the sacks to find the one in a thousand that actually works! But don't hope for a combination every turn. Usually there isn't one. As your tactics improve, you will get better at recognizing the situations where a combination might be hiding. Search harder in those positions.

When we calculate, we have to pick moves for the other player too. The only correct approach is: *Always assume the opponent will play the best move*. Don't rely on traps or count on them overlooking some sneaky idea. That's not good chess. The only exception to this rule is when you have a bad position and a trap is the best bet.

## CALCULATING VARIATIONS

You can't just play one move at a time. Each turn is a link in a long chain of events that make up a game. Deciding on a move means choosing a line of play. A chess player is like a fortune teller who looks into the future. By calculating variations, we see the possible paths that lie ahead, and follow the one that is most promising.

The basic thought process when we calculate variations is "If I go here, they go there, then I do that" and so on. But we don't have to say the words, we just see the moves. Sometimes our minds work so fast, we can see several moves ahead in an instant. Be careful that you don't overlook any alternatives for the opponent.

The possible lines of play arising from a chess position are like a tree with many branches. At each step in our calculations, there may be two, three or more moves to consider. Each one becomes a new branch in the tree. It doesn't take long for the tree to grow huge. And unmanageable!

So how far ahead should we try to calculate? It depends on the position. When both players have lots of options, it is hard to see more than two or three moves ahead. But when we can play forcing lines (captures, checks, threats), it is normal to calculate up to ten moves. In some pawn endings, where the branches of the tree are narrow (few options), it is not uncommon to see twenty moves ahead!

Calculating variations is the toughest work our brain does. To do a good job, we need to be accurate, efficient, and thorough.

## EVALUATIONS

Evaluations are important in two ways. Firstly, when we analyse the position on the board, we must judge the value of the various elements and make a general conclusion about who is better. Knowing how we stand in the game is a major factor in determining the correct plan. Secondly, when we calculate variations, we need to evaluate the end positions of each line, so that we can decide which candidate move is best.

As Biff the B explained on page 7, we evaluate a position by looking at material, king safety, and freedom of the pieces. Our overall conclusion must also take into account the plans and tactics available to both sides.

Some positions are easier to evaluate than others. A basic ending with a big material advantage is simple. A complex middlegame where there are lots of imbalances requires more skill. Weighing the value of different positional factors can be difficult. Often the only thing we can say is that the situation is unclear.

## DECIDING ON A MOVE

A chess player can't think forever. Sooner or later, the moment of truth arrives. We have to make a move.

Sometimes everything is clear and we can work out all the lines exactly before deciding on a move. In more complicated situations, we need to be practical with our thinking time. So we stop calculating at a certain point and make a decision based on what we know so far.

Once in a while, there are positions where calculation fails to give a definite result. Then we have to rely on our *intuition* to choose a move. Intuition is the understanding of chess that develops from our experience and knowledge of the game. It's like an instinct or a feeling that leads us in the right direction.

Never rush a move. Take enough time each turn to make a smart decision. Even when the choice is obvious, give your brain at least a few seconds to think. The first move you see isn't necessarily best. Explore your options.

Avoiding mistakes is the key to success. After you decide on a move, take one last look around before playing it on the board, to make sure that you're not missing anything. If you are going to make a tricky move, and you have time, recheck your calculations.

## TICK TOCK

If you are playing with a chess clock, you need to manage your time. The goal is to use most of the time you are given without running too short at the end. For example, with a one hour time limit, aim to finish in 50 minutes. That leaves you an extra ten minutes in case you reach a long endgame.

When you have an hour for the game, but only use fifteen minutes, then you are probably not playing as well as you could.

Half of every chess game is spent waiting for the opponent to move. Don't waste this time. Stretching your legs or taking a stroll is fine sometimes, but generally, you should stay in your seat and think, even when it's not your turn. Use this opportunity to survey the basic elements, search for new ideas, and refine your plan. It's usually better to wait for your own turn before calculating variations. Then you know the exact position.

When your opponent makes a move, look for the idea behind it. Figure out how it changes the position, and see if there are any threats. Then pick your candidate moves. If you were surprised by the opponent's move, be careful. There could be important things you are overlooking.

### **BRAIN STATE**

The ideal brain condition for a chess player is calm confident concentration. Being nervous or worried or distracted will hurt your level of play.

Keep cool. Don't lose heart if you make a mistake. Don't get excited when you're winning. Be brave. There's no reason to be afraid of losing. It's only a game. Stay focused. Put all your energy and will power into playing your best.

### **BRAIN CARE**

Keep your brain fresh at tournaments by getting away from chess between rounds. Go outside for a while and relax. You can only play so many good moves in a day. So make sure they are the ones that count.

Brains need fuel. During long games, drink some fruit juice to recharge your batteries. Or eat some nuts. But no potato chips, please!

In chess, we use our brain for everything. Except actually moving the pieces. So take good care of it. Wear a helmet!

## Best Move Contest #1 (page 11)

- ❶ 1.Qe8+ Rxe8 2.Rxe8#  
A classic *back rank mate*.
- ❷ 1.Qd8+ Nxd8 [1...Nb8 2.Qxb8#] 2.Rc8#
- ❸ 1.Qf7+ Kh8 2.Qf8+ Rxf8 3.Rxf8#
- ❹ 1.Bxa6 bxa6 [1...Bd8 2.Bc4] 2.Nxc7+ Ke7  
3.Nxa8  
The black knight on a6 was defending c7.  
White *removes the guard* and then *forks* the black rook and king. A *fork* is a move which attacks two pieces at the same time.
- ❺ 1.Rxd6 Rxd6 2.Nf5+ Kf6 3.Nxd6
- ❻ 1.Nc6+ Kc7 [1...Rxc6 2.Rxd8+] 2.Nxd8  
(1.Nxf7? Rxd1 →)  
(1.Rxd6? Rxd6 2.Nxf7 Rd2+ 3.Ka3 Rxf2 =)
- ❼ 1.Qd1 =  
Unforking method #1. *Guard both pieces*.  
(1.Kg2? Qxb1 →)  
(1.Rxb7? Qxf3 → with a winning material advantage. 2.Rxe7? Ra8! 3.Qc1 Rd8! → planning to win the white queen by 4...Rd1. [But not 3...Ra1? 4.Re8+ Bf8 5.Qxa1 →])
- ❽ 1.Qxh6  
Hard to resist a free queen, but I hope you did! Are you surprised that giving up your own queen is the way to win? I bet you won't be by the end of this book. The moves that win chess games are often surprising!  
1...gxh6 [1...Qxd1!? 2.Qxh4+−] 2.Rxd6 +−  
(1.Qxd6? Nf3+! 2.gxf3 [2.Kh1 Rxh2#] 2...Rg3+ 3.Kh1 Bxf3#)  
(1.Qe2 Qe6 2.f3 ± Rook vs. knight + pawn)  
(1.f3 Qd4+! 2.Kh1 [2.Qxd4 exd4 3.Ne4 Nf5 =] 2...Nf5 3.Ne2 Qxd2 4.Rxd2 ±)  
(1.Nd5? Rg6! → [2.g3? Nf3+ 3.Kg2 Nxd2])
- ❾ 1.Kd5 (1...Ke7 2.Kc6 or 1...Kc7 2.Ke6)  
To win with K + P against K, the white king must be ahead of the pawn with the *opposition*. Exception: when the king is on the 6th rank ahead of the pawn, white can win with or without the opposition. *Opposition* is when the kings stand on the same line and there is one empty square between them. We "have the opposition" if it is the opponent's turn to move.  
(1.Ke5? Ke7 =)  
(1.d5? Kd6 = 2.Kd4 Kd7 3.Ke5 Ke7!  
4.d6+ Kd7 5.Kd5 Kd8! [5...Kc8? 6.Kc6 +−]  
6.Kc6 Kc8 7.d7+ Kd8 8.Kd6 stalemate)
- ❿ 28

## HEY FRIENDS!

IF you don't understand all the signs we use, like ± or →, then check out page 7.

The symbol Δ before a move means "planning..." or "with the idea..."

## Best Move Contest #2 (page 12)

- ❶ 1.Qe4+ Kf8  
[1...Kd8 2.Qe7#] [1...Qe6 delays mate one move.]  
2.Qe7+ Kg8 3.Qxg7#
- ❷ 1.Rxg7+ Kxg7 [1...Kh8 2.Qh6 and 3.Qxh7#]  
2.Rg1+ Kh8 3.Qf6#  
White sacks a rook to *destroy* the pawn shield in front of the black king and then mates him quickly.
- ❸ 1.Rxh7+ Kxh7  
[1...Kg8 2.Rhxg7+ Kf8 [2...Kh8 3.Qh5#] 3.Rdf7#]  
2.Qh5+ Kg8 3.Qf7+ Kh8 4.Qxg7#
- ❹ 1.Nxc6 Qxc6 [1...f6 2.Nd4 or 1...bxc6 2.Bxg7]  
2.Bxg7 (Δ 3.Bxh8)  
White moves the knight from d4 to *clear* the long diagonal for the bishop on b2. Then the bishop *traps* the black rook.
- ❺ 1.b4 Bb6 2.c5  
Pawns love to trap bees. 
- ❻ 1.Na4  
The white queen has nowhere to run.  
[Best is 1...Qxa1 2.Qxa1 Nxe4 with R+2p for Q.]
- ❼ 1.Nxc3  
White must stop checkmate by ...Qb2#.   
1...Rxc3? 2.Qd4+ Kg8 3.Qxc3 +−  
1...Qc5!? 2.hxg6! h5! [2...Qxc3 3.Qh6+ Kf6 4.g7+ Kg5 5.Rh5#] 3.gxf7 Rxf7 4.Rhg1+ Kf8 5.Qg3! Nf6 6.Qg6! Ng4!? [6...Qxc3 7.Qh6+] 7.fxg4 Qxc3 8.gxh5 +−  
(1.h6+? Kg8 2.Nxc3 Qc5! →  
[or 2...Rxc3 3.Qd4 Rxb3+! 4.cxb3 Qxb3+ ±])

- ⑧ 1.Qxd8+ Rxd8 2.Bxf6 gxf6 3.Nc3 ±  
White ruins the black pawn structure. The f-pawns are *isolated* and *doubled*. They are weak because they can no longer defend themselves and must depend on the other pieces to protect them. This makes them good targets for the white pieces.  
3...Rg8 [3...Bd6 4.0-0-0 ±] 4.g3 Be7 5.Ke2! ±  
(1.Nc3 [or 1.0-0] 1...Be7 =)  
(1.Qf3? Qa5+ 2.Nc3 Qxg5 --)  
(1.Qb3?! Qa5+ 2.Nc3 Qxg5 3.Qxb7 Rd8 4.Qxc6+ Nd7 5.Nd5!? Be7 [5...Qxg2? 6.Nc7+ Ke7 7.Qxg2 +-] 6.Rd1 [6.Nc7+ Kf8 ♠] 6...Qg6 [6...0-0? 7.f4! +-] 7.Nxe7 [7.Qb7 Bd6 8.0-0 ♠] 7...Kxe7 8.Qb7 Qb6 9.Qe4+ Kf8 ♠)
- ⑨ 1.Rd5+ Kf4 2.Ra5  
Rooks belong behind passed pawns.  
(1.Kb7? Kf4 2.a8=Q Rxa8 3.Kxa8 g3 =)
- ⑩ yes (called a “cross check”)

### Best Move Contest #3 (page 13)

- ① 1.Nf6+ Kf8 [1...Kd8 2.Re8#] 2.Re8#  
The power of *double check*: the only way out is to move the king.
- ② 1.Rg8+ Kxg8 2.Rg1#  
*Pillsbury mate* (named for the American grandmaster Harry Pillsbury).
- ③ 1.Rxg7+ Kh8 2.Rg8#
- ④ 1.Qxd6+ Rxd6 2.Bf4  
After the trade of queens, the white bishop *pins* the rook on d6 against the black king. White will win “the exchange” (R for B).  
Because they are not free to move, pinned pieces are excellent targets for attack. In this example, with accurate play, white can win more than just “the ex”.  
2...Rcd8 3.Re6 Ne8 [3...Kc7 4.Rc1+] 4.Rxe8 Rxe8 5.Bxd6+ 2...Ne8 3.Rxe8 Rxe8 4.Bxd6+ 2...Rcc6 3.Re6 Kc7 4.d5! 2...Kc7 3.Rc3+ Kd7 4.Rxc8
- ⑤ 1.Rxb6 axb6 [1...Kh8 2.Rb2] 2.Bc4
- ⑥ 1.Rxd6 cxd6 2.Rg3

- ⑦ 1.Ng3 a3 2.Nf5+  
The white knight gains a *tempo* with check. Now white can stop the black pawn and draw. 2...Kd7 3.Ne3 a2 4.Nc2 =  
(1.Nf2? a3 --)
- ⑧ 1.Qe2 ±  
White double pins the bishop at e7 and prevents black from castling. Now white can develop pieces while black suffers with a king stuck in the middle.  
1...0-0? 2.Qxe7 Re8 3.Qxd8 +- 1...d5 2.Bg5 ± [2.b3!? ± planning Ba3 or Bb2] 1...Qd7 2.Bd2 ± Black can never castle as long as white keeps the pin on the e-file. [But white must play carefully! 2.Nc3? 0-0! = 3.Qxe7? Rfe8 4.Qxe8+ (4.Qxd7 Rxe1#) 4...Rxe8 ♠] 1...Nd7!?
- 2.Bg5 f6 [2...Ne5? 3.Bxe7 Qxe7 4.d4 Ng6 5.Qd2! +-] 3.Bd2 Ne5 4.d4 Ng6 ± 2.Qe4! d5 [2...Ne5? 3.d4 Ng6 4.Qxc6+ +-] 3.Qa4 c5 4.Qc6 [4.Bg5!? f6 5.Nc3! +-] 4...d4 5.Bg5 f6 6.Bf4 Rc8 [6...0-0? 7.Bxc7 +-] 7.Na3 0-0 8.Nb5 +-  
(1.Nc3 [or 1.Bg5] 1...0-0 ± White has the better bishop, black has doubled c-pawns.)
- ⑨ 1.Qg3+ Qxg3+ 2.Kxg3  
The simplest endings to win are pawn endings. Queen endgames can be very difficult to win because the defender often draws by *perpetual check*.
- ⑩ yes  
white: Kg6 Qd1 black: Ke8 Ra6 Nc6  
1.Qe2+ Ne7++

### Best Move Contest #4 (page 14)

- ① 1.Ne7+ Kh8 [or 1...Kh7] 2.Qh4#  
The ever popular *side file mate*, or as Kiril likes to call it, a *sci-fi mate*!
- ② 1.Qxh7+ Kxh7 2.Rh3#
- ③ 1.Qg6 hxg5 [1...Ne5 2.Qh7#] 2.Qh5#
- ④ 1.Qe1  
Forking the bishop on e6 and rook on h4.  
(1.Qf6? Re4 = [or 1...Rf7 2.Qa1 =])
- ⑤ 1.e5 Nd7 [1...Rd8 2.exf6 or 1...Ng4 2.Qd5+] 2.Qd5+ Kf8 3.Qxa8+
- ⑥ 1.Bxc6+ Qxc6 2.Qxe5+ Qe6 3.Qxh8+

- 7 1.Rc2  
Unpinning method #1. *Pin the pinner.*  
Now black cannot take the pinned queen.  
1...Rhg8? 2.Rxc5+! Nxc5 3.Qxc5+ Kd7  
4.Rd1+ Ke8 5.Rxd8+ Kxd8 6.Qc7+ Ke8  
7.Qc8+ Ke7 8.Qxg8 +-  
1...b6 2.b4! e5 3.Qf2! +-  
[3...e4 4.bxc5 exf3 5.cxb6+ Kb7  
6.Qxf3+Kxb6 7.Rb1+ Ka6 8.Qa3#]

(1.Rc1? Qxc1+ +-)

- 8 1.Rc1 ±  
Rooks need open files to show their power.  
There is only one open file in this position  
and whoever takes charge of it will have the  
advantage. White now plans Rc7 and Ne5.  
(1.Ne5? Rc8! ± The white knight stands well  
on e5 but black controls the c-file.)  
(1.h3? [or 1.Nh4?] 1...Rc8! 2.Ne5 Rc2 ±)

- 9 1.Kd6 (1...Kc8 2.Ke7 or 1...Ke8 2.Kc7)  
Using the opposition to force the advance  
of the white king to the 7th rank.

- 10 queen, bishop, king, pawn

### Best Move Contest #5 (page 15)

- 1 1.Bc4+ Qxc4 [1...Kh8 2.Qxf8#] [1...Rf7 2.Qe8#]  
2.Qxg7#

White *deflects* the black queen from its  
protection of g7.

- 2 1.Qd7+ Qxd7 2.Re5#  
(1.Re5+? Qxe5 2.fxe5 ±)  
3 1.Rd8+  
1...Qxd8 2.Qxc3+ Qd4+ 3.Qxd4#  
1...Kg7 2.Rg8+! Qxg8 3.Qxc3+ Kf8  
4.Qf6+ Ke8 [4...Qf7 5.Qxf7#] 5.Ba4#  
4 1.Bxf6

A common trap. White *removes the guard*  
and wins the bishop on g4.

1...Qxf6 2.Qxg4  
1...Qd7!? 2.f3!  
1...Bxd1 2.Bxd8 Rxd8 [2...Bxc2 3.Bxc7]  
3.Rxd1

- 5 1.Rxc4 Rxc4 [1...Qxd4 2.Rcxd4] 2.Qxb6

- 6 1.Rb7+  
1...Ke6 [or 1...Ke8 or 1...Kd8]  
2.Rxe7+ Kxe7 3.Qxc6  
1...Kc8 2.Qa8#

- 7 1.Qxg7+ Kxg7 ½-½ stalemate  
"Better half an egg than an empty shell."  
Dutch proverb.

- 8 1.Qc8+ Kh7 2.Qf5+  
White is up the exchange and a pawn, and  
forces a queen trade. Trading down to an  
endgame is the *safe and sure* way to win  
when you have more material. Staying in

the middlegame gives the opponent more  
chances to get *counterplay* or to make  
things *complicated*. Simplification is the  
smart plan. In this example, after the queen  
exchange, white's a-pawn is unstoppable.

- 2...g6 3.Qxf4 Nxf4 4.Ra1! Rb7 5.a6 Ra7  
6.Rfb1 Ne2+ 7.Kf2 Nd4 8.Rb7 Nc6  
9.Rxa7 Nxa7 10.Rb1 Kg7 11.Rb7 +-  
2...Qxf5 3.exf5  
3...Rb5 4.a6 Rxf5 5.a7 Ra5 6.Ra1+-  
3...Ra2 4.Ra1+-  
3...Nf4 4.Ra1  
4...Rb7 5.a6 Ra7 6.Rfb1 +-  
4...Nh3+ 5.Kh1 Nf2+ 6.Rxf2! Rxf2 7.a6 +-  
(1.Re2? This move defends against the  
threat on h2, but drops a pawn. 1...Qg5+  
2.Kh1 Rxe2 3.Qxe2 Qxa5 4.f4 ± White still  
has the advantage but the game is a long  
way from over.)  
(1.Qc8+ Kh7 2.Qh3?! Qg5+ 3.Kh1 Qxa5 ±)  
(1.Rf2? Rxf2 2.Kxf2 Qxh2+ 3.Ke3 Qf4+  
4.Kd3 [4.Kf2 Qg3+ 5.Ke2 Nf4+ =] 4...Qxf3+ =)

- 9 1.Rc4+ Rxc4 2.a8=Q  
The ending Q versus R is a win, but it can  
be tricky, especially against a computer.

- 10 26

### Best Move Contest #6 (page 16)

- 1 1.f6 g6 [1...Bxf3 2.Qxg7#] 2.Qh6 [Δ 3.Qg7#]  
*Lolli mate*, named after an Italian master  
of the 18th century.

- 2 1.h6+ Kg8 [or 1...Kh8] 2.Qf6 [Δ 3.Qg7#]  
(1.hxg6? f6! +-)

- 3 1.Re8+ Rxe8 2.Qh6 [Δ 3.Qg7#]  
(1.Rh3? Ne7 +- [or 1...Rd6 +-])  
(1.Rb3? Nb4 +- [or 1...Qc5 2.Qh6 Qf8 +-])

## CHESS KABOBS

- ④ 1.Ba3  
An *x-ray attack* on the black knight at e7. The white bishop “looks through” the queen on d6. This tactic is also called a *skewer*.  
1...Qd7 [1...Qe5] 2.Nxe7+ [2.Bxe7?! Bxd5 ±]  
2...Rxe7 3.Bxe7 [or 3.Bxc6 bxc6 4.Bxe7]  
1...Qe6 2.Nxc7 [or 2.Nxe7+ Rxe7 3.Bxe7]  
(1.Bf4?! Be5 ±) (1.Rfd1?! Bxd5 ±)  
(1.Nxe7+? Qxe7! = [1...Rxe7? 2.Ba3 +-])
- ⑤ 1.Ra6+ Kc7 [1...Ke7 2.Rb7+ Kf8 3.Ra8#]  
2.Ra7+ [2.Rxf6? h3 ♯] 2...Kc6 3.Rxg7  
(1.Rb6+? Kc7! =)  
(1.Rbb5? Ke6! 2.Rxd5 h3 ♯)
- ⑥ 1.Rxc6 bxc6 2.Rb8+ Ke7 3.Rxh8
- ⑦ 1.Bxe5 Rxd1 2.Bxf6+ Kg8 3.Bxe7 ±  
With B + 2 p against R, white can try to win but black should be able to draw.  
(1.Bc5? Rxd1 2.Bxe7 Kg7 +-)
- ⑧ 1.c3 =  
Guarding the bishop on a4 with the queen.  
(1.Nbd2? [or 1.Qd2?] 1...Qxa4 +-)  
(1.Nc3? This loses in two different ways.  
1...Bb4 2.Bb3 [2.Qd2? Bxc3 3.Qxc3 Qxa4 +-]  
2...Bxc3+ 3.bxc3 Qxc3+ 4.Nd2 ♯  
1...Ne4 2.Bb3 Nxc3 3.Qd2 [3.bxc3 Qxc3+ ♯]  
3...Bb4! 4.a3 Na6! [4...Ne4? 5.Qxb4 ]  
5.0-0 [5.axb4? Qxa1+ or 5.bxc3? Bxc3  
or 5.Rc1? Ne4! 6.axb4 Nxb4 7.Qd1 Nd3+!  
8.Ke2 Ndx2 +-] 5...Ne4 6.axb4 Qxa1!  
7.Rxa1 Nxd2 8.Nxd2 Nxb4 +-)
- ⑨ 1.Be3 (1...Bxe3 2.f8=Q)  
Black would draw if there were more squares on the defensive diagonal. For example, if 1...Bi5!? were possible.  
(1.f8=Q? Bxf8 =) (1.Bf8 Be3 2.Bg7 Bc5)  
(1.Kh7 Ke6 2.Kg8 Kf5 repeats.)  
(1.Bd4 Kg6 stops 2.Bg7, but white can still win with 2.Be3.)
- ⑩ queen, knight, king

### Best Move Contest #7 (page 17)

- ① 1.Qxd8+ Nxd8 2.Rf8#
- ② 1.Qxe8+ Rxe8 2.Rxe8#
- ③ 1.Qc8+ Rxc8 [1...Bxc8 2.Rd8#] 2.Rxc8+ Bxc8 3.Rd8#
- ④ 1.Bxb5+ axb5 [1...Qd7 2.Bxd7+] 2.Rxd4  
A *discovered attack* takes the black queen by surprise.
- ⑤ 1.Nb6+ axb6 [or 1...cxb6] 2.Qxd5
- ⑥ 1.Nf6+ Qxf6 2.Qxd6
- ⑦ 1.Bg4+ Kb8 2.Bh3 +- [2...Nf4 3.Ra3!]  
White closes the h-file to stop mate.  
(1.bxc6? Qh1#) (1.g3? Qh2+ 2.Kf1 Qxf2#)  
(1.Kf1? Qh1+ 2.Ke2 Nf4#)

- ⑧ 1.Nd5 The pin on a knight at f6 by a bishop at g5 can be very annoying for black. The knight on d5 now forces a major weakening of the black kingside. Always look for ways to *pile up* on pinned pieces.  
1...c6? 2.Nxf6+ gxf6 3.Bh6 Re8?  
4.Qg4+ Kh8 5.Qg7#  
1...h6? 2.Nxf6+ gxf6 3.Bxh6 +-  
1...Re8 2.Bxf6 gxf6 3.c3 ±  
(1.0-0 c6 = No more Nd5 for white.)  
(1.Na4 b5!? = [1...Bb6 ±])  
(1.Bxf6? Qxf6 2.Nd5 Qg5!? [2...Qd8 =] 3.0-0  
[3.Nxc7? Qxg2 +-] 3...c6 ♯)
- ⑨ 1.Kc5  
White outflanks by first taking the *diagonal opposition*. 1...Kd7 2.Kd5 Ke7 3.Kc6! Kf7 4.Kd6 Kf8 5.Ke6 Kg7 6.Ke7 +-  
(1.Kd5? Kd7 = Black takes the opposition.)
- ⑩ the 4 rooks

### Best Move Contest #8 (page 18)

- ① 1.Qf4  
Not all *forced mates* start with a check.  
1...Qa5 2.Qb8#  
1...Kd8 [or 1...Qxc4] 2.Qc7#  
1...Bd6 2.Qxd6 delays mate one move.
- ② 1.Re7  
1...Qxd2 [or 1...Rd7] 2.Qa8#  
1...b6 2.Qxc7# [or 2.Rxc7#]
- ③ 1.Qe8 [Δ 2.Qe7#]  
1...Qe6 2.Qd8+ Qe7 3.Qxe7#  
1...Qc5 [or 1...Qb4] 2.Qd8+ Ke6 3.Ng5#  
1...g5 2.Qe7+ Kg6 3.Qxg5#  
1...f4 2.e4! delays mate one move.
- ④ 1.Qxd3 [1...Rxd3? 2.Re8#]  
(1.Rd1? Qd5 ♯ [1...c4 2.Qxc4!? Nxb2! ♯])
- ⑤ 1.Qd3 A *double attack* that threatens to take the black bishop or to force mate.  
1...g6 2.Qxd6  
1...Rcd8 2.Qh7+ Kf8 3.Qh8#  
(1.Rxd6? Qxd6 2.Qxf7+ Kh8 3.Qf5 g6 ♯)
- ⑥ 1.Nd5  
1...Nxd5 2.Qh7#  
1...Qd8 2.Nxf6+ Qxf6 3.Qh7#  
1...hxg5 2.Nxe7+

- 7 1.Qe6+ Kh8 2.Rad1 c6 =  
Unforking method #2. *Move away with check.*  
(1.Bxf6? Rxf6 2.Qe5 Nxa1 -+)  
(1.Qf3? Nxa1 2.Rxa1 c6 -+)  
(1.Qg3? Nxa1 2.Rxa1 -+ [*Even worse is*  
2.Bh6? Nh5! 3.Qg4 Nc2 4.Qxh5 gxh6 -+])

- 8 1.Rxe5 ±  
Pins are a great way to win pawns! The game might go 1...Rc2 [1...dxe5 2.Rxd7+ ±] 2.Red5! Rc6 [2...Ke6 3.e5 Rc6 is the same.] 3.e5 Ke6 4.Rxd6+ Rcx6 5.Rxd6+ Rxd6 6.exd6 Kxd6 7.Kf2 +- with a winning pawn endgame. Are you good enough yet to win this every time?

- (1.Kf2? Ke6 =) (1.g3? Ke6 2.f4 Ra7 =)  
9 1.Rg6+ Ke7 2.Rxd6 Kxd6 3.Kg4  
The simplest endings to win are pawn endings. 3...Kd5 4.Kxg5 Ke4 5.f4 +-  
(1.Rxg5? Kf6 = *Leaving the rooks on the board lets black draw despite the loss of a pawn. R + P against R is normally drawn if the defending king is in front of the pawn.*)

- 10 queen, rook, bishop

### Best Move Contest #9 (page 19)

- 1 1.e5+ Kh5 [1...Kg3 2.Rd3#] 2.e6#  
A double dose of *discovered check!*  
2 1.Rc6+ Ka8 2.Rc8#

4 1.Rg8+ Kf7 [1...Kxg8 2.Qxf6] 2.Rf8+ Kxf8  
[2...Kg7 3.Qxf6+] 3.Qxf6+  
White *deflects* the black king away from its defence of the black queen.  
5 1.Bxd7 Qxd7 2.Qc4+ Kh8 3.Qxc5  
(1.Qc4+? Kh8 [1...Rf7 =] 2.b4 [2.Bxd7? Bxf2+! -+]  
2...a6! = [3.Bxd7? Bxf2+! -+])  
6 1.Nxe6 Qxe6 [1...Rc2 2.Nxf8] [1...Rfc8 2.Nxc7]  
2.Qxc7

## WARNING

### CHESS INCREASES BRAIN POWER!

*These exercises  
may make you  
too smart.*

Ministry of  
Mental Health

- 7 1.b3 =  
Unpinning method #2. *Block the pin.* Now the knight on c4 can move if attacked.  
1...Bxc4 [1...b5 2.Ne5 =] 2.bxc4 Ne6 3.Kb2 =  
(1.Kb3? b5 -+)  
(1.Rc3? [or 1.Rf4?] 1...b5 -+)  
(1.Nd2? b5 -+ [1...Rxd2? 2.Rxf7 =])  
(1.Rxf7? Rxf7 -+ [1...Kxf7? 2.Ne5+ =])

- 8 1.Nxg5+ fxg5 2.Bxe6 =  
The white knight and bishop are forked by the black rook, and one of them will be lost. When you know that you're going to lose a piece, look to see if you can take something with it before it is gone. Even a pawn is better than nothing. A chess piece that is sacrificed this way is called a *desperado*. In this example, white gets two pawns for the piece. And two is even better than one! With all the pawns on one side of the board, and a bishop and pawn for the rook, white should be able to draw easily.

- (1.Bd1? Rc1 -+)  
(1.Nd2? Rd3! 2.Bxe6 Rxd2 ±)  
(1.Bxe6? Rxf3 ±)  
(1.Nxe5? Rxb3 -+)

- 9 1.Qd3  
White wins by a series of pins and checks. Eventually the black king is forced to block the pawn, giving the white king time to approach. 1...Kf2 2.Qd2 Kf1 3.Qf4+ Kg1!? 4.Qe3+ Kf1 5.Qf3+! Ke1 6.Ke4 Kd2 9.Qf2 Kd1 10.Kd3!? e1=Q 11.Qc2#  
This is the standard method for winning with Q vs. P. It works well unless the black pawn is on a2, c2, f2, or h2 supported by its king. Then black can draw if the white king is far enough away. (See #21 and #51.)

- 10 knight

### Best Move Contest #10 (page 20)

- ❶ 1.Nb5+ Kb6 2.Qa5#  
The *pin* on the c-file gives white the point.
- ❷ 1.Ng6 Qxc4 2.Rh8#  
(1.Rdh3? g5! → [or 1.g6 →])
- ❸ 1.Qxf7+ Rxf7 [1...Kh8 2.Qxf8#] 2.Re8#  
(1.Ng5? Qg6! =)

[3...Bh5 ±] 4.Re1 Qd7!? ± Now 5.Bxf6? gxf6  
would help black by opening the g-file.)
- ❾ 1.c6 (1...bxc6 2.bxa6)  
White wins with a *pawn breakthrough*.  
(1.a4? axb5 2.axb5 Kf6 →)
- Ⓣ 36 (all squares not on the edge)

### Best Move Contest #11 (page 28)

- ❶ 1.Qe6+ Kd8 [1...Kf8 2.Bh6#] 2.Bb6#  
The *criss-cross mate*. The queen controls one diagonal while the bishop “crosses” on another diagonal.
- ❷ 1.Qxe6+ fxe6 [1...Qe7 2.Qxe7#] 2.Bxg6#
- ❸ 1.Qxc6+ bxc6 2.Ba6#
- ❹ 1.Nf6+  
1...Bxf6 2.Rxe8+  
1...Kf8 2.Rxe8#
- ❺ 1.Ng6+ Kg8 2.Ne7+ Kh8 3.Nxd5
- ❻ 1.Rxe3 Rxe3 [1...Qc5 2.Nxd5!]  
2.Nxd5 Rxb3 [2...Qc5 3.Nxe3] 3.Nxc7 Rxb2  
[3...Rc8 4.cxb3 g6 +− (4...Rxc7? 5.Rd8#)]  
4.Nxa8 g6 [4...Rxc2? 5.Rd8#] 5.Rd7  
(1.Nxd5? Nxd1! [1...Nxd5 2.Qxd5 ±] 2.Rxd1  
[2.Nxc7? Rxe1#] 2...Qc5+ ±)  
(1.Nb5? Nxd1! → [1...Qc5 →])
- ❼ 1.Rg3  
Unforking method #3. Move one piece to guard the other. The rook on b3 and knight on g5 were forked by the black queen.  
This is actually a tricky position. Did you see that black can play 1...Bd3, “trapping” the rook on f1? But white saves the rook by 2.Qd2! ±, pinning the bishop against the unprotected black queen. Best is 1...Rfd8 = or 1...Rc2 = when the active rooks give black good counterplay for the pawn.  
And did you see why 1.Qe3 is a mistake?  
(1.Qe3? Rce8! [1...Rfe8? 2.Rc3! =] 2.Qg3 h6!  
3.Nxf7 [3.Nf3? Qxb3] 3...Bxf7 →  
[If the white h-pawn were on h2, this trap would not work because white could play 3.Nh3.]

For some extra fun now, let's make some small changes in the position and see what happens. The diagram below (#7b) is the same except a black pawn is added on e6.

#7b

This pawn closes the e-file and protects the black queen. So the right move in this case is 1.Qe3! = [1.Rg3? Bd3! →]  
See the next page for more versions of #7.

#7c

In the diagram above (#7c), there is still a pawn on e6, but the black rook is now on d8 instead c8. With the extra firepower on the d-file, black would win against 1.Qe3? by 1...Bd3! 2.Rxd3 [2.Rd1? Qxb3] 2...Qxd3 +-.

The correct move this time is 1.Rg3! After 1...Bd3, white makes an amazing save with 2.Qc3! Bxf1? [2...Bg6 3.Rc1 =] 3.Nxe6! f6 [3...fxe6 4.Qxg7# or 3...g6 4.Qg7#] 4.Rxg7+ Kh8 5.Rxh7+! Kxh7 6.Qc7+! Rd7 [6...Kg6 7.Nf4+ Kh6 8.Nxd5 +- or 6...Kh6 7.Qg7+ Kh5 8.Qh7#] 7.Qxd7+! Qxd7 8.Nxf8+ Kg7 9.Nxd7 +-.

#7d (no diagram)

Black rooks on a8 and f8 and a pawn on e6  
1.Qe3 and 1.Rg3 are both good moves.

#7e (no diagram)

Black rooks on c8 and d8, no pawn on e6  
1.Qe3 and 1.Rg3 both lose material! The least evil for white is:

1.Qe3 Bd3 2.Rxd3 Qxd3 3.Qe7 ♣  
1.Rg3 Bd3 2.Rxd3 Qxd3 3.Qe7 ♣

Reaching the same position either way.

The conclusion to learn from all of this is:  
*Little things make a big difference in chess.*

8 1.Bxf6

Black's last move (...Bg4) was a common mistake that loses a piece.

1...Bxd1 [1...Qxf6 2.Qxg4 or 1...Qd7 2.Be2! +- ]  
2.Bxd8 Bxc2 [2...Kxd8 3.Rxd1 +-] 3.Bh4 +-  
(1.Nf3 Be7 =)  
(1.Be2 Bf5! =

[1...Bxe2?! 2.Qxe2+ Qe7 3.Bxf6 gxf6 ±])

(1.Qxg4!? Nxc4 2.Bxd8 Kxd8 = Without queens on the board, the black king is safe in the middle.)

9 1.Ra3+ Kxa3 ½-½

This stalemate trap is the defence's main chance to draw in the Q vs. R ending. It arises when the queen is a "knight jump" away from a king on the edge.

The queen does better a "camel jump" away as in the diagram below. A camel is a chess piece that leaps like a knight, but moves three squares then one over, instead of a knight's 2 and 1. It was invented by people who like to make weird chess puzzles with new pieces.

#9b

After 1.Rb2+ Ka3, we reach the typical difficult situation for white. 2.Ka1 Qc3 3.Kb1 Qxb2# and 2.Rc2 Qb4+ 3.Kc1 Qe1# both lose quickly. So the rook must leave the company of his king. But that will leave him open to a queen fork:

2.Rb7 Qe4+ 3.Kc1 Qxb7  
2.Rb8 Qe4+! 3.Kc1 Qf4+ 4.Kc2 Qxb8  
2.Rf2 Qe4+ 3.Kc1 Qe1+ 4.Kc2 Qxf2+  
2.Rg2 Qf1+ 3.Kc2 Qxg2+  
2.Rh2 Qb4+  
3.Kc2 Qb2+ 4.Kd3 Qxh2  
3.Kc1 Qf4+ 4.Rd2 Kb3 5.Kd1 Qf1#  
2.Rd2!? is the best way to keep things complicated. A sample conclusion is 2...Qe4+ 3.Kc1 Kb3 4.Rd3+!? Kc4 5.Rd8 Qf4+ 6.Kd1 Qg4+ 7.Kc1 Qg5+ with the usual wide angle fork.

#9c Note that white to move can force a draw in the following position:

1.Rb2+ saves the day as 1...Kc4 2.Rc2! pins and wins the queen. And 1...Ka3 2.Ra2+ will either lead to stalemate by 2...Kb3 3.Ra3+ or to perpetual check after 2...Kb4 3.Rb2+ Ka4 3.Ra2+ Kb4 4.Rb2+.

10 queen, knight  
They can both move in 8 directions.

### Best Move Contest #12 (page 29)

1. Qxh6+ Kg8 2. Qg5+ Kh7 [or 1...Kh8] 3. Rh6#  
A queen and a rook make great mates.  
(1. Rxf7? Rh8! -+)
2. 1. Qa8+ Kd7 2. Rd3+  
[2. Qd5+ Ke8 3. Qa8+ Ke7 4. Rxc7+ Kd6 ∞]  
2...Ke7 [2...Bd4 3. Rxd4+ Ke7 4. Qd8#] 3. Qd8#  
(1. Qxa6+?! Kb8 = [2. Rb3+ Bb6 ])  
(1. Qe6+? Kb8 → [2. Rb3+ Ka7!])  
(1. Qe8+? Kb7 2. Rb3+ Bb6 3. Rxb6+  
[3. Qxf7 Qg1#] 3...Kxb6 4. Qxf7 Qxe4+ -+)
3. 1. Qd7+ Ke5 2. Rf5+  
[2. Re7+? Qxe7! -+ or 2. Qf5+? Kd4 -+]  
2...Ke4 3. Qd5+ [3. Qe6+? Kd3 -+]  
3...Ke3 4. Rf3+ Ke2 5. Qd3+ Ke1 6. Rf1#  
The escalator mate!
4. 1. Qxe6 Qxe6 2. f7 [Δ 3. f8=Q+]  
Pawn promotion is a fun way to gain material. Instead of taking a piece, you win by making a piece.
5. 1. Rxc8 Rxc8 2. Bxb7 Re8 3. c8=Q [3. Bxa6!]  
3...Rxc8 4. Bxc8

6. 1. Bd5+  
1...Nxd5 2. c8=Q+ Kh7 3. Qc2+ Kg8 4. Rb7  
1...Kf8 2. Rf7+! [2. Bxa2? Kxe7 -+ ] 2...Ke8  
[2...Kg8 3. Rd7+ Kf8 4. Bxa2] 3. Bxa2 b1=Q+  
4. Bxb1 Kxf7 5. Bf5 g6 6. c8=Q Nxc8 7. Bxc8  
It's good practice to play out this ending.  
(1. c8=Q+? Nxc8 2. Bd5+ Kf8 3. Rf7+ Ke8  
4. Bxa2 b1=Q+ 5. Bxb1 Kxf7 ♣)  
(1. Be4? Ra1+ 2. Kg2 b1=Q 3. Bxb1 Rxb1  
4. Re6 Rc1 5. Rxb6 Rxc7 ♣)  
(1. Re8+? Kf7 2. Bd5+ [2. c8=Q b1=Q+  
3. Bf1 Nxc8 -+ ] 2...Nxd5 [2...Kxe8 3. Bxa2 Kd7 -+ ]  
3. c8=Q [3. Rb8 Nxc7 -+ ] 3...b1=Q+ -+)
7. 1. Qb1 +-  
White stops mate and even wins the black queen, as 1...Qe2 allows 2. Rf8#.  
(1. Rxf2? Re1+ 2. Rf1 Rxf1#) (1. Rg1? Re1! -+)  
(1. Rd1? Re1+ [or 1...Qe1+ ] 2. Rxe1 Qxe1#)  
(1. Qd3? c4 2. Qb1 Qc5! ♣ [ No better were  
2. Rxf2 cxd3 3. h3 Re2 ♣ or 2. Qd8+? Kh7 -+ ])
8. 1. Ne1  
White is up a pawn and doesn't want black to take on f3 and mess things up. When we are ahead in material or have a positional advantage, we should try to keep our pawn structure neat and tidy. 1...Re8 [1...Rf8 2. f3 ±]  
2. Kd2! [2. f3? Re2+ 3. Kb3 =] Now white must squirm around a bit to prevent a weakness, but that's okay. There is often no hurry when you are up material in an endgame.  
2...Bb5 3. Nd3 Rd8 4. Kc2 ±  
2...Rd8+ 3. Ke2!  
3...Bb5+ 4. Nd3 Re8+ 5. Kd2 Rd8 6. Kc2 ±  
3...Re8+ 4. Kf1 Bb5+ 5. Nd3 [5. Kg1? Re2=]  
5...Rd8 [5...g5 6. b3 ± ] 6. Ke2 Re8+  
7. Kd2 Rd8 8. Kc2 ±  
(1. Re1? Bxf3 2. gxf3 Rf8 = White has weak kingside pawns. The h-pawn is isolated. And the f-pawns are doubled and isolated on an open file. That's the ultimate pawn weakness! The extra pawn has no value in this position.)  
(1. Rd3? Be4 ♣)  
(1. Nh4? g5 [1...Rf8! ♣] 2. Nf3 [2. Nf5? Be4+ -+]  
2...Bxf3 3. gxf3 Rf8 = )  
(1. Ng5? h6 [1...Bxg2 2. f3! h6 3. Rg1! =]  
2. Nf7 [2. Nf3 Rf8! ♣ or 2...Bxf3 =]  
2...Rf8 [2...Rh7? 3. Rd8#] 3. Nxb6 Bxg2 ♣)
9. 1. Nh3  
The agile knight is able to stop the two passed pawns on his own.  
1...d3 2. Nf2! d2 [2...e3 3. Nxd3 =] 3. Nd1 =  
1...e3 2. Nf4! = [2...e2 3. Nxe2 d3 4. Nc3]  
(1. Ne2? d3 2. Nc3 [2. Nd4 d2 -+ ] 2...e3 -+)  
(1. Ke5? [or 1. Kd5?] 1...d3 2. Kxe4 d2 -+)
10. knight, pawn

## Best Move Contest #13 (page 30)

- ❶ 1.Ng5+ hxg5 2.Qh5#  
More sci-fi thrillers (side file mates).
- ❷ 1.Ng6+ hxg6 2.Qh3#  
(1.Qe8+? Bf8 = [2.Qe6 Nd5!])
- ❸ 1.Qxh7+ Kxh7 2.Bxf7#

- ❹ 1.Qh5+ g6 [1...Kf8 2.Qf7#] 2.Nxg6

1...Nxb6 2.Bxb7 Qxb7 3.Qxd6  
1...Rxb6 [or 1...axb6] 2.Bxd5 [Δ 3.Bxf7+]  
1...Nc3 2.Qd3 Rxb6 [2...Nxb1 3.Bd5] 3.Qxc3  
Pin City.
- ❻ 1.c4  
1...Nxc4 [1...c6 2.cxd5] 2.Rxd5  
1...Ne7 [or 1...Nb4] 2.c5 [forking Nb6 and Bd6]  
When you have a piece pinned, look for a  
way to attack it with a pawn.
- ❼ 1.Bc8  
The bishop goes to the f1-a6 diagonal with  
check, gaining a tempo. White then draws  
by sacrificing bishop for pawn.  
1...e2 2.Ba6+ Kd2 3.Bxe2 ½ - ½  
(1.Kf4? e2 →)  
(1.Bd7? Kc4! 2.Bc8 Kb5! 3.Bd7+ Kc5 →)
- ❽ 1.Ba3 ±  
White prevents black from castling. And it's  
hard to develop when you can't castle!  
1...Rc8 2.Rc1 ±  
1...Ne4 2.Qa4!  
2...Rc8 3.Ne5 ± [3.0-0 ± or 3.Qxa7? Bc6! →]  
2...Nc3 3.Qb3 Rc8 4.Rc1 Ne4 5.0-0 ±  
2...a6 3.Rc1 b5 4.Qb4 ±  
1...Ng8 Black can castle by recycling the  
knight to e7, but this wastes time.  
2.0-0 Ne7 3.Rc1 0-0 [3...Rc8 4.Qa4! ±]  
4.Bxe7 Qxe7 5.Rc7 ±  
(1.0-0 0-0 2.Rc1 ± White has better pawn  
structure and black has a bad bishop.)  
(1.Rc1 [or 1.Qa4] 1...0-0 2.0-0 ±)

- ❾ 1.Kf3 Kh3  
The black king is forced to a square where  
he can be checked by a queen from c8.  
2.b6 cxb6 3.c6! [3.cxb6? g2 =]  
3...g2 4.c7 g1=Q 5.c8=Q+  
5...Kh2 6.Qh8#  
5...Kh4 6.Qh8+ Kg5 7.Qg8+ Kf5 8.Qxg1 →  
(1.b6? cxb6 2.cxb6 g2 3.b7 g1=Q 4.b8=Q  
loses to 4...Qh2+ 5.Kf4 Qxb8.)
- ❿ 400  
20 white x 20 black = 400

## Best Move Contest #14 (page 31)

- ❶ 1.Qc1+ Kf2 2.Qg1+ Kf3 3.Qf3#  
An *epaulette mate*. Epaulettes are the  
shoulder boards worn on some military  
uniforms. In chess, they are two pieces  
that stand on either side of their king,  
blocking his escape. Here, the pawn at  
e2 and queen at e4 are the black king's  
"shoulder boards".

## GENERAL CHESSIMO SALUTES

The LOYAL TROOPS  
of the  
ROYAL BRIGADE

"Who Bravely Guard  
Our Front Ranks"

- ❷ 1.Qd3+ Ke6 2.Qd7# [2.Bd7+ Ke7 3.Bxg4 =]  
The *epaulettes* are the pawns at e5 and f6.
- ❸ 1.Bxf7+ Kxf7 [1...Kh8 2.Rxf8#] 2.Qe6#  
(1.Ne7+? Nxe7 2.Bxf7+ Kxf7 3.Qxe7+ Kg6  
4.Qe4+ [4.Rxf8 ∞] 4...Kh6 5.Qh4+ =)  
(1.Qxc6? Qc1+ [1...bxc6? 2.Ne7+ Kh8 3.Rxf8#]

- ❹ 1.f3 Bf5 [1...Bh5 2.g4] 2.e4 Rd6 3.exf5  
A bishop is the easiest piece to *trap* with  
pawns.  
(1.h3? Bd1 =) (1.e4? Rd1 =)
- ❺ 1.Be2 Trapping the black queen.  
(1.Qd2? Qg4 =)  
(1.h3? Nd4! [1...h6 =] 2.Qd2 [2.cxd4 Bxe4  
3.Bxe4 Qxg5 ♯] 2...Bxe4 3.Bxe4 h6 ♯)
- ❻ 1.Rb1 Qa3 2.Rb3 Bye-bye, queenie!

- 7 1.Nb6+ Kb8 2.Nxa4 Bxc3+ 3.Nxc3 +-  
(1.Nxb4? Qxd1#) (1.b3? Bxc3+ -+)
- 8 1.Rd7  
The standard way to win when you control an open file is to “occupy the seventh rank” with the rook. From there, the rook attacks the opponent’s weak pawns from the side.  
1...Rc8  
Black defends the c-pawn but this leaves the rook in a passive position.  
2.Re7! [2.Kd2? Kf8 3.Ke3 Ke8 =] 2...f6 +-  
The winning plan for white is to keep the black rook tied to the defence of the c-pawn, to create some gaps in the black pawn structure, and then to invade with the king. A sample line goes: 3.h4 Kf8 [3...h5 4.c4 Kf8 5.Rd7 g6 6.Kc2 Ke8? 7.Rg7+-] 4.Rd7 a5 5.a4 b6 6.h5 h6 [6...c6 7.Rb7+- or 6...c5 7.h6 gxh6 8.Rxh7 +-] 7.Kd2 c5 8.Kc3 Rb8 9.Kc4 Kg8 10.Kb5 +-  
1...f5 2.Kd2! [2.Rxc7?! fxe4 3.Rxb7 Rxf2 ∞] [2.exf5 Rxf5 3.Rxc7 Rxf2 ±]  
2...fxe4 3.Ke3 Rf7 [3...Rc8 4.Kxe4 ±]  
4.Rd8+! Rf8 5.Rxf8+ Kxf8 6.Kxe4 +-  
(1.Rd5? f6! [1...Re8? 2.Rd7 ±] 2.Rd7 Rf7 =)
- 9 1.Rc8+ Kg7 2.Rc7+ Rxc7 3.bxc7 Kf6 4.c8=Q  
Simple solutions are usually the best.  
(1.Rxg6+? Kf7 2.Rc6 Ke7 3.Rc7+ Rxc7 4.bxc7 Kd7 = or 2.Rh6 Ke8! 3.Kg4 Kd7 4.Kf5 Kc8 5.Ke5 Rd7! 6.Rd6 [6.Ke6 Rd1] 6...Rxd6 7.Kxd6 Kb7 8.Kc5 Kb8! =)  
(1.Kg4? Kf8! when black draws following 2.Kg5 Ke8 3.Kxg6 Kd7 =)
- 10 queen, rook, bishop

### Best Move Contest #15 (page 32)

- 2 1.Bd5+  
1...Kh8 2.Qxh6#  
1...Qxd5 [or 1...Rf7] 2.Qxg7#  
White *deflects* the black queen so that she no longer defends g7.  
(1.Qh7+? Kf7 2.Qxg7+ -+)
- 3 1.Qxf7+ Rxf7 [1...Kh8 2.Qf8#] 2.Re8+ Rf8 3.Bh7+ Kh8 4.Rxf8#  
(1.Nxf7? Rxf7 2.Re8+ Rf8 3.Bh7+ [3.Qg6! Nf4 ♯] 3...Kxh7 4.Rxf8 Bg4! -+)
- 4 1.Rxd7 Rxd7 [1...Bxe4 2.Rxd8+! Rxd8 3.Bxe4] 2.Nf6+ Kh8 3.Nxd7  
The white sacrifice *removes the guard* of f6 and *decoys* the black rook to a square where he can be forked.  
(1.Bg5? Bxe4 2.Bxd8 [2.Bxe4 f6 =] 2...Bxb1 3.Rxd7 Bf5 =)

- 5 1.Rxc6 Qxc6  
[1...Qe7 2.Bxd5+ or 1...b3 2.Rxd6!]  
2.Bxd5+ Qxd5 [2...Kh8 3.Bxc6] 3.Qxd5+ (1.dxe5? Nxe5 -+)  
(1.Rc1? Nh4 =)
- 6 1.Rxg7+ Kxg7 2.Qd4+ Kg8 3.Qxa7
- 7 1.Re6+ Kxe6 ½-½ stalemate  
White draws by perpetual check if black doesn’t take the rook. [1...Kf5 2.Re5+ Kg4 3.Re4+ Kf5 4.Re5+ and so on]  
(1.Ra1? Rh2+ 2.Kg1 f2+ 3.Kf1 Rh1+ -+)
- 8 1.Rd6  
White is up a pawn and forces an exchange of rooks to reach a simpler ending. *Trading down* is the clear road to victory when you have more material. In this example, if the rooks stay on the board, white still has a lot of work to do. But after the rook trade, the minor piece ending is a quick win.  
1...Bg5 2.Rxd8 Bxd8 3.Kc4 Kf6 4.Nd4 h5 [4...Ke5? 5.Nc6+] 5.Kb5 +-  
1...Rxd6 2.Nxd6 Be1 3.f3 Kf6 4.Kc4 Ke6 5.Nb7 Kf5 6.Kb5 Kf4 7.Nxa5 Kg3 [7...Bxa5 8.Kxa5 Kg3 9.b4 Kxg2 10.b5 +-] 8.Nc4 Kxg2 9.a5 Kxh3 [9...Bxa5 10.Kxa5 Kxh3 11.b4 +-] 10.a6 Bf2 11.Nb6 +-  
(1.Ra6 [or 1.Rc7 or 1.Rc2] 1...Bb4 ±)  
(1.Kc4 Be1 2.Ra6 [2.f3 Rd2 =] 2...Rd2 3.Rxa5 Rxb2 4.Ra8 [4.Ra7 Bxf2] 4...Rxf2 ±)  
(1.Nd6 Bb4 2.Nc4 [2.Nb7 Rd3+ 3.Kc4 Rd2 = or 2.Ne4 Rd4 3.f3 h5 ±] 2...Rd3+ 3.Kc2 Rd4 ±)  
(1.Nc3!? Rb8+ 2.Kc2 Bg5! [2...Be1 3.Ra6! ±] 3.Ra6 [3.Rc5 Bd8] 3...Bd8 ±)
- 9 1.Ka8  
Now a check on the a-file is met by a pin that forces a queen trade. 1...Qa4+ 2.Qa7!  
(White must still work carefully to stay out of check after 1.Kc7 Qc4+ or 1.Kc6 Qa4+.)
- 10 all pieces (including king)

## Best Move Contest #16 (page 33)

- ❶ 1.Bg8+ Kh8 2.Bf7+ Kh7 3.Qg8#
- ❷ 1.Bxh7+ Kh8 2.Bg6+! Kg8 3.Qh7+ Kf8 4.Qxf7#

- ⑧ 1.Nxe5

A famous trap called Legall's Mate, named after the French master Legall de Kermeur. 1...Bxd1 [1...Be6 2.Bxe6 dxe5 3.Qh5! +- or 1...dxe5 2.Qxxg4 +-] 2.Bxf7+ Ke7 3.Nd5#  
Legall was the champion of the Café de la Régence in Paris until dethroned by his star pupil André Danican Philidor. Surprisingly, there is only one recorded game of Legall's.

*Legall - St. Brie Paris 1750*

1.e4 e5 2.Bc4 d6 3.Nf3 Bg4 4.Nc3 g6  
5.Nxe5! Bxd1? [5...Be6 6.Bxe6 dxe5 7.Bb3 ± or 5...dxe5 6.Qxxg4 ±] 6.Bxf7+ Ke7 7.Nd5#

The Legall trap can occur in many forms. Here is an example from the Scotch Game.

1.e4 e5 2.Nf3 Nc6 3.d4 d6 4.Nc3 Nf6  
[Our exercise position arose after the moves 4...h6 5.Bc4 Bg4 6.dxe5 Nxe5? (6...dxe5 =)]  
5.Bg5 a6?! The key ingredients for this trap are Bc4 Nf3 Nc3 for white and Bf8 Bg4 for black. If there is a black knight on f6, then it has to be pinned by Bg5. Usually, black must also make a time wasting move like ...a6.  
6.Bc4 Bg4 [6...exd4 7.Nxd4 ±] 7.dxe5 Nxe5? [7...Bxf3! 8.Qxf3 Nxe5 9.Qe2 Nxc4 10.Qxc4 Be7 ±]  
8.Nxe5 Bxd1? [Better is 8...dxe5 9.Qxd8+ Rxd8 10.Bxf6 gxf6 11.Nd5 ±] 9.Bxf7+ Ke7 10.Nd5#

- ⑨ 1.Bf4 b2 [1...Ka2 2.Bc1 =] 2.Bc1!  
[2.Kc2? Ka2 -+] 2...bxc1=Q+ [2...Kb3 Bxb2 =]  
3.Kxc1 Kb3 4.Kd2 = (See exercise #1.)  
(1.Bd6+? Ka2 -+) (1.Kc1? Ka2 -+)  
(1.Bh4? b2 2.Bxf6 b1=Q+ -+)
- ⑩ rook, bishop, knight, pawn (not queen)

## Best Move Contest #19 (page 36)

Pinning and winning the black queen.  
(1.Rc3? Qxc3! ±) (1.Rg3? f4 ±)
- ⑦ 1.Rd1

White destroys the black pawn shield to open the king for a mating attack.

White defends against the d-file x-ray by setting up a discovered attack. 1...Rxd6

[1...b6 2.Bc2 +-] 2.Bh7+ Kxh7 3.Rxd6 ±  
(1.Nxb7 Rxd3 = [2.Rxc6? Rd1#])  
(1.Ba6!? Rxd6 [1...bxa6? 2.Rxc6] 2.Bxb7 Nd4 =)  
(1.Re1 Kf8! [1...Rxd6? 2.Re8#] 2.Nxb7 Rxd3 =)  
(1.Nxf7? Rxd3 -+)

- ⑧ 1.Qd3 =  
White breaks the pin on the knight at f3.  
(1.Re1 Nd4 ±)  
(1.g4? Nxxg4! ± 2.hxxg4? Qxxg4+ 3.Kh2 [3.Kh1 Qh3+ 4.Kg1 Bxf3 -+] 3...Qf4+ 4.Kg2 Nd4 -+)

## THE SUPER EASY GUIDE TO AVOIDING CHESS TRAPS

- ⑨ 1.Ke2  
To draw the ending K + P vs. K, the black king must either block the pawn or have the opposition when the white king is ahead of the pawn.

1...e5 2.Ke3 Kd5 3.Kd3! e4+ 4.Ke3 =  
1...Kd5 2.Kd3! =

1...Ke5 2.Ke3! Kf5 3.Kf3 = Let's follow this line further. The black king has three rules to follow for the draw:

A. Block the pawn whenever possible.

B. Move opposite the white king if he advances.

C. If a retreat is forced, stay on the same file as the pawn.

3...Ke5 4.Ke3 Kd5 5.Kd3 e5 6.Ke3 e4  
7.Ke2 Kd4 8.Kd2! e3+ 9.Ke2 Ke4 10.Ke1!  
Kf3 11.Kf1 e2+ 12.Ke1 Ke3 stalemate!  
(1.Ke3? Ke5! →) (1.Ke1? Ke5! →)  
(1.Kf3? Kd5! 2.Kf4 Kd4 or 2.Ke3 Ke5! →)

- ⑩ pawn

 (1.Qe6+? Kh8 2.Be3 Qxh2+ 3.Kf1 Nxe3+ →  
 winning the same way as against 1.Be3.)

- ❽ 1.f4  
 Pawn structure is the key to correct strategy. The two pawns facing each other at e4 and e5 are called a *ram*. The best plan for both players is to attack the ram with a pawn, and try to get rid of the opponent's pawn. This can be done from either neighbour file. For white, that means playing a pawn to d4 or to f4. These moves are called *levers*, because they are used to pry open files. *Whenever you see a ram, look for a lever.* In this example, f4 is the right way to go.  
 1...exf4 2.Bxf4 ± [2.Rxf4! ±] White has the open f-file and better control of the centre.  
 1...Bg4 2.Qf2 ±  
 1...c6 2.h3 ± Now white is ready to play Be3 [2.Be3 Ng4 =] and develop the rook from a1. White can open the f-file later with fxe5 or launch a *pawn storm* with f5, g4, g5.  
 (1.h3 ± is also a very good move, if the plan is to continue with f4, or with Be3 and d4. [1.f4 is a bit better because in the line 1...Bg4 2.Qf2 white will gain a tempo with the useful move 3.h3.])  
 (1.Be3 is a good idea, developing a piece and preparing pawn to d4, but black can reply 1...Ng4! freeing the bishop on e7 and hoping to take the bishop on e3. After 2.Bd2 Bg5 =, black trades off their "bad bishop" [the one blocked by its own pawns].)  
 (1.Bg5? Nxe4! 2.Bxe7 [2.dxe4 Bxg5 ±]  
 2...Nxc3 3.bxc3 [3.Bxd8? Nxe2+ 4.Kh1 Rxd8 →]  
 3...Qxe7 ±)  
 (1.Nd5?! Nxd5 2.Bxd5 c6 3.Bb3 Bg5 =)
- ❾ 1.Kd5  
 Rook pawns (those on the a or h files) often increase the chances for a draw in basic endgames. In pawn endings, they create new stalemate possibilities.  
 White wins in this position by sacrificing the f-pawn while it is still on f4, which will leave the black king too far away from the corner to make a draw.  
 1...Kf5 2.Kc5 Kxf4 3.Kb5 Ke5 4.Kxa5  
 If the white king gets to b7, he wins. If black gets to c8, the game is drawn.  
 4...Kd6 5.Kb6 Kd7 6.Kb7 1-0  
 (White wins just as quickly with 1.Kd4.)  
 (1.f5? Kf7 2.Kd5 Kf6 3.Kc5 Kxf5 4.Kb5 Ke6  
 5.Kxa5 Kd7 6.Kb6 Kc8 = Now the black king is stalemated after 7.a5 Kb8 8.a6 Ka8  
 9.a7 and the white king is stalemated after 7.Ka7 Kc7 8.a5 Kc8 9.a6 Kc7 10.Ka8 Kc8  
 11.a7 Kc7! Isn't that something?)

- ⑧ 1.Bxh6  
White sacrifices a piece to break down the defences around the black king. It's hard to calculate all the lines exactly, but it is clear that white gets a very strong attack and at least two pawns for the bishop to start with. Sometimes we have to be bold and give up a piece on faith and general principles.  
1...gxh6 2.Qxh6  
2...b4 3.Qh7#

- 8 1.Ra8  
White is up a pawn and *simplifies* by trading  
rooks. Rooks are great at making things  
complicated, so the defender usually likes  
to keep them on the board. The famous  
saying goes, "All rook endings are drawn."  
That's not exactly true, but the point is that  
rook endings are tricky and the defence  
often manages to draw, even though they  
are down a pawn. In this example, the rook  
trade leads to an easy bishop ending.  
1...Rxa8 2.Bxa8 f6 [2...c4 3.b4 +-] 3.Ke2 Kf7  
4.Kd3 Ke7 5.c4 Kd6 6.Kc3 g5 7.b4 cxb4+

- 8 1.c4

White has the advantage in the diagram  
because of the bad black bishop (blocked  
by its own pawns) and the weaknesses in  
the black pawn structure (isolated d-pawn,  
doubled f-pawns). But it is the pin on the  
d-file which allows white to win a pawn.  
After 1.c4, white will follow up with *cxd5*.

(Against other first moves by white, like  
1.Kf1, black plays 1...Kc7, guarding the  
rook on d6 and breaking the pin.)

- 9 1.Kf6

1...Kc5 2.Ke6 The critical *zugzwang*  
position. Black must move and loses the  
pawn and the game.

Trickier is 1...Kb5!? 2.Ke7! Kc5 3.Ke6 +-  
(1.Ke6? Kc5 +-)

(1.Ke4? Kc5 2.Ke3! Kxd5 3.Kd3 =)

- 10 96 16 pawns x 6 moves each = 96

## Best Move Contest #29 (page 53)

2...Ra4 3.Bxa5] 3.Qxb3 [or 3.Bxa5 Rxd3 4.Rxd3]

- 5 1.Qxg7+ Qxg7 2.Rxe7 Qxc3 3.Nxc3  
The old pin-a-roo wins again.

(1.Rxe7? Qxe7 2.Qg6 Kg8 3.Qxf5 =)  
(1.Nd6? Rxe1+ 2.Bxe1 Qe7 ♣)

- 6 1.Qd8  
1...Rxc7 2.Qxd5+ Ke7 [2...Kf6? 3.Qd6+ or  
2...Kf8? 3.Qd8+] 3.h4 [3.Qxb3? Rc1+ →]  
1...Ke6 2.Qe8+ Kf6 [2...Re7 3.Qxe7#] 3.Rxd7  
(1.Nb6? Rxc7 2.Nxd5? Rc1#)  
(1.Rc8? Qb5 = [or 1...Re7 =])

- 7 1.Rxf4

The black pawns are about to come rolling through, so white "sacks the ex" to reach a drawn ending with *bishops of opposite colour*. 1...Kxf4 2.Ke2

[2.Bc4 Kf3 3.Be2+ Ke4 4.Kc2 = also draws but not 2.Bh5? d3 → when the pawns roll on.]

2...Ke4 3.Bc4 = The black forces cannot advance against the *light square blockade*. The white king stands pat on e2 while the white bishop shuffles along the diagonal between d3 and a6. [3.Bg6+ = also works.]  
(1.Bc4? d3! 2.Bxd3 [2.Rxf4 e2+ 3.Kc1 e1=Q+] 2...Nxd3 3.Ke2 Ke4 →)  
(1.Rh1? e2+ 2.Kc1 d3! →)

The endgame B + 2p vs. B with bishops of opposite colour is not always drawn.

Two connected pawns win if they reach their sixth rank. See exercise #54 (9).

Two isolated pawns normally win if they are separated by at least two empty files. In this diagram, the pawns are separated by only one file. White can draw with accurate play.

#7b

- 1.Ba4! Kb2 2.Ke2 Kc1 3.Bb3! Kb2 4.Ba4 =  
Black cannot make any progress. The white king and bishop are able to work together.  
(1.Ke2? f3+! 2.Kd1 f2 → The black king now goes to g1 and supports the f-pawn.  
3.Bf1 [3.Ke2? f1=Q+ 4.Kxf1 d1=Q+] 3...Kd4  
4.Bg2 Ke5 5.Ke2 Kf4 6.Bh3 Kg3 7.Bf1 Kh2  
8.Kd1 Kg1 9.Ke2 d1=Q+ 10.Kxd1 Kxf1 →)  
(1.Be2? Kc2 →)

The pawns are separated by two files in the diagram below.

Now black can win because the white king and bishop are too far apart to cooperate.

- 1.Bc2 [1.Ke2 Kb3 --] 1...Ka3 2.Ke2 Kb2  
3.Kd1 f3 4.Be4 f2 5.Bd3 f1=Q+  
6.Bxf1 c2+ --  
3.Kd3 f3 4.Bd1 [4.Kxe3 Kxc2 --]  
4...f2 5.Ke2 [5.Be2 c2 --] 5...c2  
6.Bxc2 Kxc2 --

- 8 1.Nxg5 hxg5  
[1...Nxe4 2.Nxf7! Qxh4  
3.Nxd6+ Kh8 4.Nxe4 --]

2.Bxg5

Rather than retreat the bishop, white sacks a knight for 2 pawns, blasts open the black king, and keeps a pin on the black knight at f6. White soon wins more material by advancing the f-pawn and opening the f-file.

- 2...Kg7 3.f4!

## MORT & MARLEY

### 7 1.Bf4+

White is ahead a bishop in this position, but the pinned rook on e6 is about to fall. There are several reasonable moves that keep white in the game, but only this bishop "sacrifice" leads to an advantage.

Unpinning method #3. *Move away with check.* That can happen two ways here:

1...Ka8? [or 1...Ka7] 2.Rxa6+! bxa6 3.Qxd7+-  
1...gxf4 2.Qxf4+

2...Qc7? 3.Qxc7+ Kxc7 4.Rxh6 +-

2...Rc7? 3.Rxe8+ Qxe8 4.Rxc5 +-

2...Ka8 [or 2...Ka7] 3.Rxe8

3...Rxe8 4.Rxc5 +-

3...Qxe8 4.Qf5! Qc6 5.h4 ±

In the first line (1...Ka8), the pinned piece (rook e6) moved away with check. In the second line [1...gxf4], it was the shielded piece (queen g4) that moved away.

Unpinning method #4. *Move the pinned piece to protect the shielded piece.* (This method only works when the shielded piece is an unprotected piece, and is not the king or a piece more valuable than the pinner.)

The next line (1.Re4) uses method #4.  
(1.Re4!? Qxg4 2.Rxg4 Re1+ 3.Kg2 Rxc1

4.h4! gxh4 5.Rxh4 Ra1! 6.Rxh6 Rxa5

7.Rh5! [7.f4? b5 +-] 7...b6 8.f4 = with a complicated four rook endgame.)

(1.Rxe8!? Qxg4 2.Rxc8+ Kxc8 3.Rxc5+ Kb8

4.Bb2 Qd7 = With R+B+p against Q, white is doing all right.)

(1.Bxg5!? Qxe6 2.Bf4+ Ka7 3.Qxe6 Rxe6 ±)

### 8 1.Ree7

Decoy, pin, and now deflect.

2...Bg7 3.h3+! Kxh3 4.Bxf5+

2...Bc6 3.Rf8 [3.h3+? Kh4 ±] 3...Re7

4.h3+ Kh4 [4...Kxh3 5.Bxf5+] 5.Bxf5

2...Bd4 3.h3+ [or 3.Rf8]

6 1.Qb8+ Kxb8 2.Nxd7+ Kc7 3.Nxf6 Rgf8  
4.Nxe8+

7 1.Qg5+ ffg5 ½-½ stalemate  
[1...Kf8? 2.Qxc1 ±]

8 1.Qxe8+ Qxe8 2.Rd8

The black threats were too strong, so white uses some trickery to trade down to an endgame with bishops of opposite colour. Sometimes, the best strategy in a poor position is to head for the *least bad ending*. Most opposite B endings are drawable if you are only down one pawn, so they are often the goal of clever defenders.

2...Kf8 [2...Qxd8 3.Bxd8 b5 4.Kg1 =] 3.Kg1 f6  
4.Rxe8+ Kxe8 5.Be3 b5 6.Kf2 =

In the middlegame, opposite B's help the attacker, because the bishop can dominate all the squares of its colour around the opposing king.

(1.Qh3? Qe1+ 2.Rxe1 Rxe1#)

(1.Rg1? Qxg2+ 2.Rxg2 Re1#)

 (1.Bf1? Rxf1 [1...Ng4! +- is even stronger.]  
 2.Be3 Rxc1+ 3.Rxc1 Qxe3 -+)
- 8 1.Ba5  
 This exercise is about *good knights* and *bad bishops*. A good knight is a knight in a closed position that can attack weak pawns. A bad bishop is one whose own pawns are blocked on the same colour squares as the bishop. The pawns limit the freedom of the bishop. Endgames with a bad bishop are often lost, especially against a good knight.  
 In this position, both players have good knights and bad bishops. The white knight will be strong on f4, attacking weak pawns at d5 and h5. The black knight would like to reach c4 or e4. Looking at the B's, the white bishop and blocked pawns are all on dark squares, while the black ones are all on light squares.  
 The goal for both players is to keep their good knight and trade their bad bishop for the opponent's knight. By pinning the black knight against the rook on d8, white forces an exchange which leads to a favourable endgame.

We begin with a sample game [1.Ba5 Rd6], then look at other first moves for black.

1...Rd6 2.Bxb6 Rxb6  
 [2...axb6 3.Kd2 Be6 (3...Ba6 4.Ng2) 4.Nd3 ±]  
 3.Rxb6 axb6 4.Kd2 Kb7

 [3.Kg2? Kc3! 4.Kf2 Kxb2 5.Ke3 Kc2! +-]  
 3...Kc3 4.Nd1+ Kc2 5.Kg2 Re4 6.Kf2 Rf4+  
 7.Ke2 Rxf1 8.Ne3+! Kc1 9.Kxf1 =  
 (1.Rxd2? b1=Q+ +-) (1.Kg2? c3 +-)  
 (1.Nf5+? Ke5 2.Nxd4 Kxd4 3.Rxd2+ Kc3 4.Rd1 Kc2 +-)

#7b

In this diagram, black to move wins.

1...h2

A knight does not have enough room to jump around a *rook pawn* once the pawn

reaches its seventh rank.

2.Kb6 Kf4 3.Nh1 Kf3 4.Kc5 Kg2

[Now white would like to play 5.Ni3+!? but that is impossible.] 5.Kd4 Kxh1 6.Ke3 Kg2 →

With white to play in the diagram, there are two ways to draw. The first way is with the help of the king.

1.Kb6 h2 2.Kc5 Kf4 3.Nh1 Kf3 4.Kd4 Kg2  
 5.Ke3 Kxh1 6.Kf2 ½-½ Stalemate!

The second way is with the knight alone.

1.Nf1! stops the pawn on its sixth rank.

Now the knight plays hop-scotch on the f1, h2, g4, e3 squares, and the black king cannot drive him away. 1...Kf4 2.Nh2 Kg3 3.Nf1+ Kg2 [3...Kf2 4.Nh2 Kg2 5.Ng4 =]  
 4.Ne3+ Kf2 [4...Kg1 5.Ng4 or 4...Kf3 5.Nf1 =]  
 5.Ng4+ Kg3 6.Ne3! = The final trick is:  
 6...h2 7.Nf1+ Kg2 8.Nxh2 ½-½.

- ⑧ 1.Rfd1

Black stands worse because of the weak isolated d-pawn. So white must put a rook on the d-file to prevent black from pushing the pawn and trading it off. The important question is "Which rook should go to d1?"

Choosing the right rook is a decision that we have to make in lots of games. The way to choose is to move the rook that leaves the other one with some good options.

In this example, 1.Rad1?! would not give the rook on f1 a very bright future. However, 1.Rfd1! allows the other rook to have fun on the open c-file.

- 1...Rd7 [1...Rc8? 2.Bxd5 ±]  
2.Rac1 Rfd8 3.Rd4 [Blockading the pawn.]  
3...Kf8 4.Bf1  
4...a5 5.bxa5 bxa5 6.Rc5 Ra7 7.Bg2 ±  
4...Ra7 5.Rc6 b5 6.Rc5 Ke7 7.Bg2 Rad7  
[7...Raa8 8.Bxd5 ± ] 8.Kf1 ±  
4...b5 5.a4!  
5...Rb8 6.axb5 axb5 7.Rc5 ±  
5...bxa4 6.Bxa6 Ra7 7.b5 a3 8.Ra1 Rb8  
9.Ra4! ± [9.Rxa3? Rxb5 =]

Another way to choose "which rook" is to decide where you want BOTH rooks before you move either one. Here, it is easy to see that white wants rooks on c1 and d1.

- (1.Rac1? d4! 2.Rc6 [2.exd4 Rxd4 =] 2...dxe3  
3.fxe3 Rd3 4.Rxb6 [4.a4 Rb8 =] 4...Rxa3 = )

5.Rxd5 Rxd5 6.Rxd5 Rxa3 =] 4...Rxd3 5.Rxd3 Kf8  
6.Kf1 Ke7 ±)

- ⑨ 1.Ra3 White draws using the “Philidor method”, named after the French master François André Philidor who wrote about it in 1748. The defending rook moves to its third rank and stays there until the pawn advances to its sixth rank. Then the rook goes to the last rank for a checkathon.

1...Rg2 [1...c3 2.Ra8! =] 2.Rh3 Rg1+  
3.Kc2 Rg2+ 4.Kc1 c3 The pawn move is the signal the rook waits for. 5.Rh8! Now white draws by perpetual check. 5...Kd3  
6.Rd8+ Kc4 7.Rc8+ Kb3 8.Rb8+ and so on.

Sometimes there are other ways to draw the endgame R + p vs. R, but Philidor’s method is the simplest. In this example, it is the only way to draw.

It’s stalemate no matter what black plays!

- ⑧ 1.Nxb3

White has serious difficulties on the a-file and must sack a piece to break the attack and simplify to a queen endgame. Then, even down 3 pawns, white should draw! Queen endings can be extremely hard to win when your king doesn’t have a good shelter. They are often the defender’s hope.

1...cxb3 2.Rc8+ Rxc8 3.Qxc8+ Kh7  
4.Qf5+ Kg8 [4...g6 5.Qf7+ =] 5.Qe6+ Kf8  
6.Qc8+ Ke7 7.Qxb7+ Kd6 8.Qxb3 ♯  
Black has an extra pawn, but none are dangerous yet and there is no way to force a queen trade. White will probably draw by perpetual check because the black king has nowhere to hide.

1...Qa2+ 2.Kc1 cxb3 [2...b5 3.Rg3 Qa7 4.Nd4 ∞]  
3.Rc8+ Rxc8+ 4.Qxc8+ Kh7 5.Qf5+ Kg8

(1.Ne6? Qa1#) (1.Rxb3? Qe1+ 2.Kc2 cxb3+ -+)  
(1.Kc1? Qa1+ 2.Kd2 Qxb2+ -+)

- ⑨ 1.a6

White sacrifices to give black a *rook pawn*, and draws because black has a “bishop of the wrong colour”. The bishop does not control the queening square and the game is drawn if the defending king reaches the corner in front of the pawn. This method only works against a-pawns and h-pawns. 1...bxa6 [1...b6 2.Kb5 =] 2.Kb3! Kc1 3.Ka2 =  
The white king cannot be driven from the corner. Give it a go! (Then try it with a dark squared bishop. The win is very easy with a bishop of the right colour.)

A big mistake would be 2.Ka5? when black wins by keeping the white king out of the corner. 2...Bb7 3.Kb4 [3.Kb6 Kc3!] 3...Kc2  
4.Ka3 Bd5 5.Kb4 Kb2 6.Ka5 Bc4 7.Kb4 Bb5  
8.Ka5 Kb3 9.Kb6 Kb4 10.Kc7 a5 -+  
(Without the sacrifice, white loses.)

1.Kc5? Bd3! 2.Kb6 [2.a6 Bxa6!] 2...Ba6  
3.Kc5 Kc3 4.Kb6 Kb4 5.Kc7 Kxa5 -+)

(1.Kg1? Qf2+ 2.Kh1 Qf1+ 3.Qxf1 Rxf1#)
- ⑧ 1.h3 +-  
White is ahead two pawns and takes time to make an *escape square* for the castled king. Why risk a back rank mate when you are cruising to victory?  
There is usually no need for an escape square early in the game. Advancing the h-pawn often weakens the king's defence, and shouldn't be played without a good reason. But later in the game, once the rooks are in play, an escape plan can be a smart idea. Did anyone fall for 1.Qxa7?  
(1.g3 is also a good move, but weakens the white king more than advancing the h-pawn. It creates two holes at f3 and h3, where the black queen could end up someday.)  
(1.Qxa7? Qxc1! 2.Rxc1 Rd1+ 3.Rxd1 Rxd1#)

1...Nxc5 [1...Qxg5 2.Rh8#] 2.Qg7#  
(1.Nf5+? Kg5 --)

- ❹ 1.Rxf6 gxf6 [1...Rh8 2.Rf2] 2.Bxg8

This tactic is called a *desperado*. Both players have a rook under attack. If white takes on g8, then black will take on g6. [1.Bxg8? Nxc6 =] So before capturing the black rook, white first captures something with their own rook.

The white rook on g6 is a “desperado”. He knows he is lost, so he takes out whatever he can before he dies. Even a pawn is better than nothing. [1.Rxh6!? gxh6 2.Bxg8 ±] But of course, taking the B on f6 is better!

(1.Nd5? Nxc6 2.Bxg8 [2.Nxf6+ gxf6 = or  
2.Nc7+? Ke7 --] 2...Bg5+ 3.Kb1 0-0-0 =)

- ❺ 1.Qxc8 Rxc8 [1...Qxe1? 2.Qxe8+ Kg7 3.Rxe1]  
2.Rxc3

White has “won a rook”, but since black was ahead a bishop to begin with, white is only “up the exchange”. However, black has no way to stop white from winning the bishop now with 3.Rc1 and 4.Rxc5.

(1.Rxc3? Rxc6 --)

(1.Qxe8+? This desperado fails because of the black x-ray 1...Rxe8 2.Rxc3 Bb4! = [3.Rc1 Bxc3 4.Rxc3 =])

Let's make some changes to the position and see how the desperado's are affected. First, note that with the kings on g2 and g8:

1.Qxc8 wins and 1.Qxe8+ draws.

- 5b. Now put the kings on g2 and g7. Then  
1.Qxc8 draws and 1.Qxe8 loses.

1.Qxc8

1...Qxc1 2.Qxe8 Qxe1 3.Qe5+ Kg8 4.Qxc5 =

1...Qxe1 2.Qxc5 Qd2 3.Ra1 Re6 4.Qxa7 ±

1.Qxe8? Qxe1! 2.Qe5+ [2.Rxe1 Rxe8 ] 2...f6!

3.Qb2 [3.Qxc5? Qxc1 ] 3...Qa5 --

- 5c. Now put the kings on g1 and g8. Then  
1.Qxc8 loses and 1.Qxe8+ draws.

1.Qxc8? Qxe1+ 2.Rxe1 Rxc8 --

1.Qxe8+ Rxe8 2.Rxc3 Bb4 =

- 5d. Now put the kings on g1 and g7. Then  
1.Qxc8 loses and 1.Qxe8 loses.

1.Qxc8

1...Qxe1+ 2.Rxe1 Rxc8 --

1...Qxc1 2.Qxe8 [2.Rxc1 Rxc8] 2...Qxe1+ --

1.Qxe8 Qxe1+ 2.Rxe1 Rxe8 --

- 5e. With the kings on g1 and g8, put the white rooks on a1 and c1. Then  
1.Qxc8 loses and 1.Qxe8 wins.

1.Qxc8 Qxc1+ 2.Rxc1 Rxc8 --

1.Qxe8+ Rxe8 2.Rxc3 +-

“You must be getting tired of this game, but let's do one more change!”

- 5f. With the kings on g2 and g8, put the white rooks on c1 and f1. Then  
1.Qxc8 wins and 1.Qxe8 wins.

1.Qxc8 Rxc8 2.Rxc3 Kg7 3.Rfc1 and

after 4.Rxc5 +- up a rook

1.Qxe8+ Rxe8 2.Rxc3 +- up the ex

- ❻ 1.Qxg8+

8 1.g4 Nbd7 2.g5

White uses a *bayonet attack* to break down the black defences. The white g-pawn is like a spear that rips open the g-file. In the diagram, black has weakened their position by playing ...h6. Advancing pawns in front of your castled king makes it much easier for the opponent to sacrifice pieces and to open lines with pawn trades. Especially with the white king on the queenside, the h6 pawn is the signal for white to march the g-pawn forward.

2...Nh5? 3.gxh6 Qc7 [3.gxh6 4.Bxd8] 4.hxg7+-  
2...hxg5 3.Qxg5

 5.Nf6+ Kf8 ½-½ [5...Kh8? 6.Rh7#]  
 Other first moves by black allow white to draw the same way.  
 (1.Rxb6? Rh2+ 2.Kg1 Rag2+ 3.Kf1 f3 +-)

- ⑧ 1.Bb1  
 Bishops and knights are very different from each other. We should not think that they are the same just because both are worth "3 points". Exchanging one for the other is an important decision. Sometimes a knight is better, sometimes a bishop.

A bishop shows its superiority over a knight in open positions with play on both sides of the board. In most games, the position does open up as the pieces and pawns are traded. So generally, bishops are better than knights. Some old chess books even say they are worth 3½ points!

This means that we should not trade our bishops for knights without a good reason. And that trading our knights for bishops is usually a good deal.

In this exercise, the white bishop on d3 is the best minor piece on the board, aiming at h7 on the black kingside. White retreats the bishop to avoid an exchange by ...Nxd3.  
 1...c6 2.a3 Na6 3.Qd3 g6 4.Bc2 ±  
 1...Rad8 2.a3 Nc6 3.Qd3 g6 4.Bc2 ±  
 1...Rfe8? 2.a3 Nc6 3.Bxf6 A good reason to trade bishop for knight is to win a pawn. 3...Bxf6 4.Qh5 g6 5.Qxd5 +-  
 (1.Rac1 [or 1...Rfd1] 1...Nxd3 =)  
 (1.Bb5 c6 2.Ba4 b5 3.Bb3 a4 4.Bd1 Rfe8 ∞)  
 (1.Bxf6?! There is no good reason for white to give up the bishop for a knight. 1...Bxf6 2.Rac1?! [2.Bb1=] 2...Nxd3 3.Qxd3 Rfe8 ♣ Black has a slight edge because of the B.)

- ⑨ 1.Ra5  
 White cuts off the black king along the 5th rank. This gives the white king time to catch up with the pawn.  
 1...g4 2.Kb7 g3 3.Ra3 g2 4.Rg3 +-  
 1...Kg6 2.Kb7 Kh5 3.Kc6 Kh4 4.Kd5 g4  
 5.Ke4 Kh3 6.Rg5 g3 7.Kf3 +-

3.Bc4 Qa4 4.Nxf7!? Rxf7 5.Rxb7 ±  
(1.Nxd6? Nxf3+ [1...Qxd6 =] 2.gxf3 Qxd6 ♣  
The white kingside is full of holes and the h-pawn and f-pawns are very weak.)  
(1.a4? [or 1.Nc3?] 1...Nxf3+ ♣)

- ❾ 1.Qb5+  
Black loses because the white king is close enough to force mate. In most lines, black is allowed to queen the pawn.  
1...Ke1 [1...Kf3 2.Qf1 +-] 2.Qb1+ Ke2 3.Qe4+ and it doesn't matter which way black runs.  
3...Kf1 4.Kf4 Kg1 5.Kg3 f1=Q 6.Qd4+ Kh1  
7.Qh8+ Kg1 8.Qh2#  
3...Kd2 4.Qf3 Ke1 5.Qe3+ Kf1 6.Kf4 Kg2  
7.Qg3+ Kh1 8.Qh3+ [8.Qxf2? stalemate]  
8...Kg1 9.Kg3 f1=Q 10.Qh2#

Compare with exercises #9 and #21.

(1.Qb2+? Kf3! Black holds back the white king. [1...Kf1? 2.Kf4 Kg1 3.Kg3! f1=Q 4.Qh2#] 2.Qc3+ Kg2 3.Qd2 Kg1 4.Qg5+ Kh1 5.Qh4+ Kg1 6.Qg3+ Kh1! = Black draws because 7.Qxf2 is stalemate! That is the standard drawing method in this endgame.)

The defender can draw the ending Q vs. p when they have a *bishop pawn* on the 7th rank supported by their own king and the opponent's king is far away. For black, this means a pawn on c2 or f2.

#9b

In the diagram above, with the black king on the short side of the pawn, the white king must be inside the box to win.

With white king on h4: 1.Qg3+ Kh1 2.Qh3+ [2.Qxf2? ½-½] 2...Kg1 3.Kg3! f1=Q 4.Qh2#  
With white king on d3: 1.Qg8+ Kh1 2.Ke2 +-

#9c

In this position, with the black king on the long side of the pawn, the winning box is bigger. With white king on b4:

1.Qh2 Ke1 2.Kc3! f1=Q 3.Qd2#

⑩ 4

### Best Move Contest #52 (page 79)

① 1.Qe8+ Qg8 2.Qe5+ Qg7 3.Qb8+!

[3.Qh2+? White wants to check on h2 but ONLY when the black queen stands on g8.

3...Kg8 4.Qb8+ (4.Qa2+ Kf8 =) 4...Qf8 5.Bh7+ Kg7 =]

3...Qg8

4.Qh2+ Kg7 [4...Qh7 5.Qxh7#]  
[4...Rh3 5.Qxh3+ Kg7 6.Qh6#]

5.Qh6#

(1.Qd6? Rc8 =) (1.Qxg7+? Kxg7 =)

(1.Qd8+? Qg8 2.Qd4+ [2.Qf6+ Qg7 3.Qd8+ =]  
2...Qg7 3.Qh4+ [3.Qd8+ =] 3...Kg8 4.Qf2! =)

② 1.Qg6+ Kg8 2.Bf6+

[2.Bh6+? Kh8 --]

[2.Be5+? Kf8 3.Qh6+ Ke7 and 4...Kd8 --]

[2.f6? No time to "give a move" to black.

White needs to keep checking. 2...Re2+!  
(Black also mates by 2...Nde3+ or 2...Na3+)

3.Bxe2 Nce3+ 4.Kd3 (4.Kb2 Qxc3#)

4...Qxc3+ 5.Ke4 Nxf6#]

2...Kf8 3.Qh6+ Kg8 [3...Kf7 4.Qg7#]

4.Qh8+ Kf7 5.Qg7#

Fancy maneuvering by queen and bee.

(1.f6+? Kg8

2.Qxh5? Nde3+ mates -- [3.Kc1 Ba3+]

2.Bh6+ Kh8 3.Bg7+ Kg8 = perp

2.Bh7+ Kxh7 3.Qxh5+ Kg8 4.Qh8+ Kf7

5.Qh5+ Ke6 6.Qg4+ = [6.Rbe1+? Nde3+]

(1.Qxh5+? Kxg7 2.f6+ [2.Qg6+ Kf8 --]

2...Nxf6 -- [or Kxf6! --])

③ 1.Qc3+ Kb5 2.Bd3+

[2.Qc5+? Ka6 -- or 2.Qb3+? Ka6 --]

2...Kxa4 3.Qc2#

(1.b3+? Kxb3 2.Qe3+ Kxa4 3.Bc2+ Kb5

4.Bd3+ Ka4 5.Bc2+ =)

(1.Qe2+? Kd4! -- [1...Kb3? 2.Nc5+ --])

(1.Bd3+? Kxd3 2.Qc3+ Ke4 3.Nc5+ Kf5 --)

④ 1.Qxe8

Both queens are "hanging" [under attack] so white looks for the desperado move.

1...Qxd1 [1...Rxe8 2.Rxd6 or 1...Nd5 2.Qe1]

Black plays a desperado of their own.

2.Qxf8+

Before capturing the black queen, white plays this *zwischenzug* [in-between move].

Because it is check, black cannot continue the "desperado chain" [with 2...Qxf1+].

2...Kxf8 3.Rxd1

White is up a rook! [See exercise #48 (4,5,6.)

(1.Rxd6? Rxe4 +)

(1.Qxh7+!? Kxh7 2.Rxd6 = A less inspiring desperado that wins back a pawn.)

⑤ 1.Nd5

1...cxd5? [or 1...Nxd5?] 2.Qxa5

1...Qxd2 2.Nxe7+ Kf8 [or 2...Kh8]

3.Nxg6+ hxg6 4.Nxd2

1...Bb4 2.Nxb4!

[2.Qxb4 is also good but gets needlessly messy after 2...Qxb4 3.Nxb4 a5!? Black plays to trap the bishop on b3. (4.Nd3? a4 5.Bc4 b5 6.Bxe6 ±)

But white can still win with 4.e5! Ne4 5.Nd3 a4

6.Bc4 b5 7.Nb4! bxc4 8.Nxc6 +-]

2...Nxe4 3.Qe1

[3.Nxc6!? Nxd2 4.Nxa5 Nxf1 5.Kxf1 +-]

3...Ndf6?! [Black's best is 3...Qf5 4.Nd3 +-]

4.Nxc6!

Another "zwish" picks off a pawn.

4...Qxe1

[4...bxc6? 5.Qxa5 or 4...Qc7 5.Nxd8]

5.Ne7+ Kf8 6.Nxg6+ hxg6 7.Rfxe1

'Zwischenzug' is the German word for "in-between move" and is used by chess players everywhere. Sounds cool, eh?

 (1.Qg3? Qf1+ 2.Qg1 Qf3+ 3.Qg2 Qxg2#)
- 8 1.Rfe1 = Were you able to resist doubling  
 the black pawns by Bxf6? *Not all doubled  
 pawns are bad.* They create open lines and  
 sometimes give extra control of the centre.  
 In this case, the open g-file would actually  
 give black the advantage. So instead of  
 capturing the knight, white should develop  
 their rooks, and the e-file is the place to go.  
 (1.Bxf6? gxf6 2.Rfe1 Kh8! 3.Ne4 Rg8 ±  
*Black is already making threats on the open  
 g-file.* 4.f3 Rg6 5.Rad1 f5 6.Nd2 [6.Nf2? Bxf3]  
 6...Rag8 7.Re2 Rg3! 8.Kh1 [8.Nf1? Rxh3 +-]

 11.Kh2 Qg5 +- or 9.Qc2? Qg5 +-] 9...Qg5  
*Thanks to the doubled pawns, black has  
 a powerful attack.*)  
 (1.Rae1 = *is also a good move if the plan is  
 to push pawn to f4 later.*)  
 (1.Rad1 = *A good move that lines up with the  
 black queen and discourages ...c5 or ...e5.*)  
 (1.Nc4? Qd5! [2.Bxf6 Qxg2# or 2.Ne3 Qxg5 +-])  
 (1.Nf3? Bxf3! *Allowing black to double the  
 f-pawns is a big mistake.* 2.gxf3 Nh5 ±  
*White's kingside is very weak. The f-pawns  
 are doubled and isolated. And the open  
 g-file is not useful because white's pieces  
 are not in position to attack.* [ *Even worse  
 is 2.Bxf6? Bxg2 3.Bxg7? (3.Kxg2 gxf6) 3...Bxf1  
 4.Bxf8 Bxh3 5.Bh6 Qc6 +-]*)

- 9 1.Kf4  
 The right idea is to push pawn to d5 at  
 the right moment, so that white gets the  
 opposition afterwards. 1...Kf6 2.d5!

This formation with a *backward pawn* (c4)  
 is typical for the endgame K + 2 p vs K + p.  
 And playing for this formation is a common  
 winning method when there is no passer.

In the diagram, with black to move, white  
 has the opposition and wins. (*Look at the  
 line below with 1.d5+? to see how the game  
 is drawn when black has the opposition.*)

### ⑧ 1.a4 ±

In this pawn structure, the white knight has a great post on c4, so white stops black from playing ...b5 and driving him out.

(1.Rad1 [or 1.Rac1 or 1.f4] 1...b5 =)

(1.e5 Nxe5 [1...dxe5 2.d6!? Qc6 =] 2.Nxe5 dxe5  
3.Rad1 Rad8 ♯)

The idea of advancing a pawn to keep a knight at its outpost is common in many openings. The position below, with black to move, is from the French Defence.

#8b

The black knight is perfectly placed on f5. But if black is careless, white will push pawn to g4 and force the knight to retreat.

(1...0-0? 2.g4 Nge7 [2...Nh6? 3.Ng5 g6  
4.Qh3! Kg7 5.f5! +-] 3.Ng5 ±)

The right idea is to *secure the outpost* by 1...h5! =. With a closed centre, the black king will be safe staying in the middle and not castling.

The next diagram is from a King's Indian Defence. Black to move should play 1...a5 =.

#8c

- 9 1.Rg6 Kd7 [1...f3 2.Rxg3 f2 3.Rf3 +-]  
 2.Rg4 g2!? [2...Ke6 3.Rxf4 Ke5 4.Rg4 +-]

This is a sad diagram for white. Black is up  
two pawns and is forking the white rooks.  
Sometimes our best chance of saving a  
game is a bad ending. Here white finds a  
combo that leads to a rook endgame where  
black is only ahead one pawn. White gets  
an active rook and is able to hold the draw.

7 1.Kf2

White's first move is easy to find because the other moves are clearly bad. Now after 1...Bb6+ 2.Kf3, white keeps a big material advantage.

However, did you find the best move against 1...Rd8, attacking the queen? The right reply is 2.Qxd8! Bxd8 3.Bxf4 +-

Other moves fall short:

- 2.Bxf4 Rxd1 3.Rxd1 Bxf4 ±
- 2.Bd2? Nd3+ 3.Kf3 Nd4+ 4.Kg4 Nf2+ 5.Kh5 Rd5+ 6.Bg5 g6+ 7.Kxh6 Nf5#
- 2.Qa4? Bb6+ 3.Kf3 [3.Kf1 Ng3#] 3...Rd3+ 4.Kxf4 Bc7+ 5.Kxf5 g6+ 6.Kg4 f5#
- 2.Qb3? Nd3+ 3.Kf3 Nd4+ 4.Kg4 Nf2+ 5.Kh5 Re5+ 6.Bg5 g6+ 7.Kxh6 Ng4#
- 2.Qc2? Bb6+ 3.Kf3 Nd4+ 4.Kxf4 Nxc2 +-
- 2.Qf3? Bb6+ 3.Kf1 Rd1+ 4.Qxd1 Ng3#
- 2.Qg4? Nd3+ 3.Kf3 [3.Kf1 Re1#] 3...Ne5+ 4.Kf4 Rd4+ 5.Kxf5 Nxc4 +-

Playing through the above lines is a good way to develop your skill as a king hunter!

(1.Ne2? Rxe2+ 2.Qxe2 [2.Kf1 Ng3+] 2...Nxe2 3.Kxe2 Ng3+ 4.Kf3 Nxc1 +-)

(1.Kd2? Ne3! [1...Rd8+ 2.Kc2 Rxd1 3.Kxd1 +-] 2.Qa4 [2.Qf3 Ba5+ 3.b4 Bxb4#] 2...Rd8+ 3.Kc3 [3.Ke1 Nc2+ 4.Kf2 Nd3+ 5.Kf3 Nce1+ 6.Kg4 Nf2+ Kh5 Kh7!] 3...Rd3+ 4.Kb4 Re4+ 5.Kc5 Ne6#) (1.Kf1? 8 1.g3 Bc5 [or 1...Ng6] 2.Kg2 =

Somehow the white king didn't get castled in the opening. But he is determined to find a safe spot near the corner and to free his rook from h1, so he "castles by hand".

If someone saw the position after 2...Ng6 3.Rxd8 Rxd8 4.Rd1, they would probably guess that white had castled the normal way. This method of regrouping after losing the right to castle is also called *artificial castling*.

9 1.Kf3

1...Rxe3+ 2.Kxe3 =  
1...d5 2.Rxe4+ dxe4+ 3.Ke3 =  
White times the rook exchange so that the resulting pawn ending is drawn.

- ⑧ 1.e5 ±  
 White has a knight. Black has a bishop. So white closes the centre. A basic general principle in the strategy of minor pieces. Normally, knights can only perform better than bishops in positions that are not too open. When a bishop is badly blocked by its own pawns, like in this example, the knight can truly shine.

White perps by always checking with an x-ray attack on the black queen. 1...Ka6  
2.Qa8+ Kb6 3.Qd8+ Kb5 4.Qd5+ Kb4  
5.Qd2+ Ka4 6.Qa2+ Kb5 7.Qd5+ ½-½  
(1.Qxe2+? Kb6 +- [2.Qe3+ Qc5 ])  
(1.Qg5+? Ka4! +- [2.Qxh6 e1=Q+])

8 1.b4

White sacks a pawn to quickly open lines against the black king. In positions with opposite side castling, whoever gets their attack rolling first usually wins. Material is less important than freedom of the pieces. Giving up a pawn to get an open file for the rooks is a standard plan.

- 1...Qxb4? 2.Rb1  
 2...Qxa4 3.Bxb7+ Kb8 4.Bg2+ Kc8  
 5.Rb8+! Kxb8 6.Qb1+ Kc8 7.Qb7#

Black has a big advantage because of the dangerous c-pawn, so white sacrifices to reach a drawn R+p vs. Q ending.  
1...bxc3 2.Rxc3+ Kd4 3.Rd3+  
Now the white rook shuffles between d3 and f3 and black can do nothing.  
(1.Ke1? Qh1+ 2.Kf2 Qc1 --)  
(1.Rh3? Qxh3! 2.Rxh3 c2 --)  
(1.Rg2? Qh1+ 2.Rg1 [2.Kf2 c2 ] 2..Qxf1+ --)

The endgame R + p vs. Q is not always drawn. But even when the queen can win, it is usually not easy.

#7b

This diagram is similar to the drawn position we just looked at, but the pieces are further up the board. This allows black to win because now there is more space behind the pawn for the queen to move around.

In order to win, the black king must get next to the pawn from behind. A sample game goes:

1...Qg2+ 2.Kd3

[2.Kd1 Qf2 3.Rd3 Kc4 4.Ra3 Qf8! 5.Ra4+ Kd3 --]

[2.Ke1 Qc2 3.Rf4 Qd3 4.Kf2 Qd2+ 5.Kf3 Qe1

6.Rd4 Qf1+ 7.Ke4 Qe2 8.Kf4 Qf2+ 9.Ke4 Qf1!

transposes to game.]

2...Qf2 3.Rf4 [3.Ke4 Qf1 also transposes.] 3...Qe1

4.Rd4 Qd1+ 5.Ke4 Qf1! The key position that

black aimed for. Now the black king can cross

the 4th rank and approach the pawn. 6.Rd5+

[6.Ke5 Qf3 7.Re4 (7.e4? Qc3) 7...Kc6! 8.Rc4+ Kb5

9.Re4 Kc5 -- Zugzwang.]

[6.Ra4 Qh1+! 7.Ke5 (7.Kf4? Qh4+ or 7.Kd3? Qd1+)

7...Qh5+ 8.Kf6 Qh6+ 9.Kf5 Qxe3 --]

The game continues (*after 6.Rd5+*) with 6...Kc4

7.Rd4+ Kc3 8.Rd5 Qf6 9.Rd3+ Kc2 10.Rd4 Kc1!

11.Rd5 Qe6+ 12.Re5 Qc4+ 13.Kf5 Qf7+ 14.Ke4

Kd2 Reaching the pawn and winning it quickly.

15.Rd5+ Ke2 16.Re5 Qf3+ 17.Kd4 Qc6! 18.Rd5

[18.Re4? Qd6+ 19.Kc4 Qd3+ or 18.Re7? Qd6+]

18...Qa4+ 19.Ke5 Kxe3 -- (See exercises #11, #20)

The winning method shown here was worked out by the French master Philidor in 1777.

8 1.h4

White has an excellent position against the "dragon defence". There are lots of good moves, but advancing the h-pawn is the best way to break down the black castle walls. White will push the pawn to h5 before taking on g7. This is the most forceful move order because it limits the black options.

1...Na5 This is black's best, eliminating the bishop on b3 and its pin on the f7-pawn.

2.g4 ± A bit too slow. [see 1.g4]

2.Bxg7 White does well with this move, but it's still better to wait before trading.

2...Kxg7 [2...Nxb3? 3.Qh6 +-] 3.h5 Nxb3 4.cxb3 Ng8! ± [4...Rh8? 5.e5 +-]

2.h5! Nxb3 3.axb3

2...gxh5 3.Qg5 Ne8 4.Qxh5 Nf6

5.Qg5 Ne8 6.Bxg7 Nxc7 7.Qh6 +-

2...Bxh6 [best but still awful] 3.Qxh6 +-

[3...Nxh5 4.g4 Nf6 5.g5 Nh5 6.Rxh5 gxh5 7.g6]

Now for white's other first moves:

(1.Bxg7 *Playing Bh6 to trade off black's fianchettoed bishop is a good plan but the immediate capture frees the black h-pawn, which gives black some extra options.*

1...Kxg7 2.h4 h5!?

[2...Na5 3.h5 Nxb3 4.axb3 Ng8!?! ±]

3.Nd5 Nxd5 4.exd5 [4.Bxd5 Qa5] 4...Ne5 ± 3.g4!?

3...Rh8! 4.Nd5 ±

[4.gxh5 Rxh5 5.f4 ± or 4.g5 Nd7 5.f4 ±]

3...hxg4?! 4.h5! Rh8 ±

[4...gxh5? 5.Qg5+ or 4...Nxh5 5.fxg4 +-]

(1.g4 *A good move that is often necessary when attacking a kingside fianchetto, but in this case, opening the h-file right away works well without the g-pawn.* 1...Na5

2.Bxg7 Kxg7 3.h4 Nxb3 4.axb3 Rc8 ±

[or 4...h5 5.gxh5 Nxh5 ±]

2.h4 Nxb3 3.axb3 Bxh6 [best] 4.Qxh6 Qc7

5.h5 Rac8 6.hxg6 fxg6 7.g5

[7.Nd5 Qxc2+ 8.Ka2 Rc5! 9.Nxf6+ Kf7! =]

7...Nh5 8.Rxh5! gxh5 9.g6 e6! ±)

(1.Nd5 *This move allows black to simplify things too much.* 1...Nxd5

2.Bxg7 Kxg7 3.exd5 [3.Bxd5 Qa5 ±] 3...Ne5

4.h4 h5 5.g4!?! (5.f4 Ng4 ±) 5...Rh8 ±

[5...Nxf3?! 6.Qc3+ Ne5 7.gxh5 +-]

2.exd5 Na5

3.Bxg7 Kxg7 4.h4 Nxb3 5.Qc3+ f6 6.Qxb3 ±

3.h4 Nxb3 4.axb3 f6 5.h5 g5 6.Bxg7 Kxg7 ±)

9 1.Be5

White posts his bishop on e5 in order to trade off the black knight if it ever moves, simplifying into a won pawn endgame.

Material is even, but the pawn structure is not balanced. White has a *pawn majority* on the queenside (3 to 2) and black on the kingside. The white majority is *healthy* but black's is *crippled* by doubled pawns. This is a winning advantage.

1...Nf6 2.Bxf6! Kxf6 3.Kd4 Ke6 4.b4 a6  
5.a4 g4 [5...Ke7 6.Ke5] 6.b5 +-  
1...Ke6 2.Kd4 a6 3.b4 Kd7 4.Kd5 Ke7  
[4...Nc7 5.Bxc7! +-] 5.a4 Kd7 6.b5 axb5  
7.axb5 Ke7 8.c6 bxc6 9.Kxc6 +-  
1...g4!?

2.fxc4?! Ke6! 3.Bxf4 fxc4 4.Kd4 Nf6 ±  
2.Bxf4?! Ke6 3.Kd4 Nf6 ±  
2.Kd4! Ignoring the kingside pawns, and keeping the black knight *corralled*. White wins simply by making a passed pawn on the queenside.

(1.Kc4?! Ke6! Black gets counterplay by bringing the knight to d5. White should not give black this chance. 2.b4 Nc7! 3.Bd2! Nd5 4.Kd4 [to stop ...Ne3] 4...a6 5.a4 Nc7 ∞) (1.b4?! Ke6 also frees the black knight.)

10 16  
8 queens + 8 knights

4.Kb2 g5 5.hxg6 e.p.+ Kxg6 6.Kxb3 h5 -+)
- 8 1.Qxg6 Nxg6 2.Rac1 ±  
The most important feature of this position is the black *isolani* (isolated d-pawn). The place to take advantage of a weak pawn is the endgame. So white trades queens.  
(1.Rac1 Qh5! ± With a pawn weakness, it is best to stay in the middlegame, so black avoids a queen trade.)
- 9 1.Rh7  
The white king is cut off along the c-file, but the game is not lost because the king is on the *short side* of the pawn. This gives the white rook enough room for a "checkathon" along the ranks on the *long side*.

6.Qh6+ Kf5 [6...Kf7 7.Qg7#]  
7.Qh5+ Kf4 8.g3# [or 8.Bh6#]  
3...Kxg7 4.Qg5+  
4...Kh8 5.Qh6+ [or 5.Re3] 5...Kg8  
6.Re3 f6 7.Qg6+ Kh8 8.Rh3#  
4...Kh7 5.Re3 Bd7 [5...Rg8 6.Rh3#]  
6.Rg3! [6.Qh4+? Kg6 7.Rg3+ Bg4!  
8.Qxg4+ Kf6! 9.Re3! Qc7 =]  
6...Bg4 [6...Rg8 7.Qh5#][6...Qb6 7.Qg7#]  
7.Rxg4 Rg8 8.Rh4#

The classic double bishop sacrifice!

- (1.Bxg7? Nxd3 +-)  
(1.Qg4? d4! [1...g6 2.Bxg6 hxg6 3.Re6! Be8! =]  
2.Bxd4 g6 +-)

When the conditions are right, this combo works great! But watch out for hidden defences. Let's play the old switcharoo:

- 3b. In the diagram, put a white pawn on c2 and the black queen on c5 [instead of a5]. The 2 B sack doesn't work then because black can give up their queen to stop the rook lift. 1.Bxh7+ Kxh7 2.Qh5+ Kg8 3.Bxg7 Kxg7 [3...f6 4.Bh6 +- no quick mate] 4.Qg5+ Kh7 5.Re3? Qxe3! 6.fxe3 f6 7.Qh4+ Kg7 8.Qxb4 +- 2 R + B for Q + p [So white should perp. 5.Qh5+ Kg7 6.Qg5+ =]
- 3c. Now place the black queen on c7. [instead of a5] [no white c-pawn] Black defends again with a queen sack. 1.Bxh7+ Kxh7 2.Qh5+ Kg8 3.Bxg7 Kxg7! [3...f6? 4.Qh8+ Kf7 5.Bxf8 +- forces mate.] 4.Qg5+ Kh7 5.Re3 Bd7! 6.Rg3? Qxg3! 7.fxg3 Rfe8 8.Qh4+ Kg6 9.Qxb4 b6 +- [White can perp with 6.Qh5+ Kg7 7.Qg5+ =]

3d. Put the black queen on b7 [instead of a5] and the white rook on c1 [instead of e1].

[no white c-pawn, no black b-pawn].

Now black has two new ways to defend.

- 1.Bxh7+ Kxh7 2.Qh5+ Kg8 3.Bxg7?  
 3...Kxg7 4.Qg5+ Kh8! 5.Rc3?  
 [5.Qh5+ =] [5.Qf6+ Kg8 6.Rc3 Rfe8! -+]  
 5...f6! 6.Rh3+ Qh7 7.Rxh7+ Kxh7  
 8.Qh4+ Kg7 9.Qxb4 Rae8 -+  
 3...f6! 4.Qh8+ Kf7 5.Bxf8 Rxf8 -+  
 Declining the second bishop with the move ...f6 is often the saving idea against the "double bishop sacrifice".  
 [By the way, white could win by 3.Bf6!  
 3...gxf6 4.Qg4+! Kh7 5.Rc3 and Rh3#  
 3...Rfe8 4.Qg5 g6 5.Qh6 and Qg7#  
 3...Qe7 4.Bxe7 +- but no quick mate]

3e. Black queen still on b7 [instead of a5] and the white rook back on e1 [instead of c1].

[no white c-pawn, no black b-pawn].

Having the rook on the e-file makes a big difference. Now white wins in all lines:

- 1.Bxh7+ Kxh7 2.Qh5+ Kg8 3.Bxg7  
 3...f6 4.Qh8+ Kf7 5.Bxf8 +-  
 3...Kxg7 4.Qg5+  
 4...Kh7 5.Re3 Bd7 6.Rg3 +-  
 4...Kh8 5.Qf6+! Kg8 6.Re3 Rfe8  
 7.Qg5+ Kf8 8.Qh6+! Kg8 9.Rg3#

3f. One more please! Black queen on c5, black pawn on b7, white rook on c1, and white pawn on c4. Here black loses with ...Kxg7 and draws with ...f6.

- 1.Bxh7+ Kxh7 2.Qh5+ Kg8 3.Bxg7  
 3...Kxg7? 4.Qg5+ Kh7 5.Rc3 +-

- ⑧ 1.Rfd1 Rfd8 2.Nd5 Black has a weak backward pawn at d6, giving white a great outpost for the knight on d5. But if the knight moves in right away, black takes it and white must recapture with a pawn. Then the d-file is closed and the black d-pawn is no longer weak. So white puts a rook on the d-file before moving the knight. That way the rook can recapture on d5, keeping the d-file open and the backward pawn weak. 2...Bxd5 3.Rxd5 3...Rac8? 4.Rcd1 Rc6 5.Rxe5! +- 3...Kf8 4.Rcd1 Ke7 ± 3...Rd7 4.Rcd1 Rad8 5.Kf2 ± [5.c5? f6! =] 2...Rac8? 3.Ne7+ Kf8 4.Nxc8 +- 2...Kf8 3.Nb6! Bxd5 2.cxd5 [or 2.exd5] 2...Rac8 =) (1.Rcd1?! is less good because the rook is already well placed at c1 and the rook on f1 needs to find some work.)

DR. CHECKLE teaches the pawns how to move.

9 1.Kd2

White wins by taking the *distant opposition*. The opposition occurs when kings are on the same line with an odd number of empty squares between them (1, 3, or 5). With the opposition, a king can force his way past the opposing king (or stop the other king from getting by him).

1...Kd7 2.Kd3!

As the kings approach each other, white maintains the opposition. Here there are three squares between the kings.

2...Kd6 3.Kd4!

Now white takes the *direct opposition* (one square between).

3...Ke6 4.Ke4! [4.Kc5? Ke5 5.Kb5 Kf4 =]

4...Kf6 [4...Kd6 5.Kf5 Kc5 6.Kxg5 +-]

5.Kd5 White outflanks to win the g-pawn.

5...Kg6 6.Ke6 Kg7 7.Kf5 Kh6 8.Kf6 Kh7

9.Kxg5 Kg7 10.Kf5 Kf7 [10...Kh6 11.Kf6!]

11.Ke5! White must sacrifice the g-pawn on g4 in order to have enough time to promote the a-pawn.

[11.g5? Kg7 12.Ke5 Kg6 13.Kd5 Kxg5 14.Kc5

Kf6 15.Kb5 Ke6 16.Kxa5 Kd7 17.Kb6 Kc8 =]

LEADS THE PACK

## Best Move Contest #73 (page 102)

- ① 1.Qxa7+ Kxa7 2.axb6+ Kb7 3.Ra7+ Kc8 [or 3...Kc6] 4.Rxc7#
- ② 1.Qd8+ Kxd8 2.Bg5+ 2...Ke8 3.Rd8# 2...Kc7 3.Bd8#
- ③ 1.Qg6+ Kd7 [1...Kf8 2.Qf7#] 2.Be6+! [2.Bb7+? Qd6 3.Rxd6+ Kxd6 =] 2...Kxe6 3.Ng5+ Ke5 4.Qe4# 2...Kc6 3.Qe4+ Kc5 [3...Rd5 4.Qxd5#] 4.Qc4#

Double check, double fun!

- ④ 1.Qe4 1...Bxb3 2.Qxb7 1...Rd8 2.Rc5 Kh8 [or 2...Qb8] 3.Rxd5 [or 3.Bxd5] (1.Bc2? g6 =) (1.Rc5? Bxb3 =)
- ⑤ 1.Re6 1...fxe6 2.Qxg6+ Kh8 3.Bxf6+ Qxf6 4.Qh7# 1...g5 2.Rxf6 Qxf6 [or 2...gxh4] 3.Qh7# 1...Kg7 2.Bxf6+ Qxf6 3.Rxf6 Kxf6 4.Re1 1...Re8 [or 1...Qc7] 2.Rxf6 [or 2.Bxf6] 1...Nb4!? 2.cxb4 Rxc2!? 3.Rxf6 [or 3.Bxf6]

The black f-pawn has a very important job guarding g6. So, despite the way it looks, he is not really defending the e6 square!

- (1.Qf3? Kg7 ± [1...g5 2.Bf5! (2.Bg3? Nxd4 3.cxd4 Rxc2=) 2...Rc7 3.Bg3 Re7 ±]) (1.Re3? Qd6 ± [1...g5 2.Bg3 Ne7 ±])
- ⑥ 1.Rxd4 1...exd4 2.Bxd4 Qxd4 [2...Be4 3.Bxf6+] 3.Nxf5+ Kg8 4.Nxd4 1...f4 2.Rxf4! exf4 [2...Qxf4 3.Qxf4] [2...Qe6 3.Re1] 3.Bxf6+ Kxf6 4.Qxf4+ 1...Kf7 2.Rd2 [2...f4 3.Qh3] (1.Bxd4? 1...exd4 2.Rxd4! Re4! 3.Rfd1 [3.Rxe4 fxe4 =] 3...f4 4.Qc3 ± [4.Qg4? Rxd4 5.Rxd4 Re8 ±] 1...f4 2.Bxe5! Rxe5 3.Qg4 Rce8 4.Nf3 ±)
- ⑦ 1.Nxc4  
White sacrifices to get rid of all the black pawns, leaving the drawn endgame of king and two knights against king.  
1...Nxc4 2.Bxf3 gxf3 3.Kxf3 ½-½  
1...f2!? 2.Kxf2 Nxc4 3.Bf3! Nd4 4.Bxg4 ½-½  
(1.Bxf3? c3! 2.Bxg4 [2.Be4 cxb2 +-] cxb2 +-)  
(1.Ba6? c3! 2.Na4 [2.Bxb5 cxb2 +-] c2 +-)
- Checkmate is possible with two knights, but it can never be forced. (It is impossible to make a position with a forced mate in 2.) In example #7b below, after 1.Nf6+, black has two choices: survival after 1...Kf8 = or termination by 1...Kh8? 2.Nf7#.

#7b

Surprisingly, the ending with two knights against a pawn is sometimes won! In the next diagram, the black king is trapped in the corner. White can checkmate because moves by the black pawn avoid stalemate.

#7c

- 1.Nc4 [1.Nf6? stalemate]  
1...a3 2.Nf6 a2 3.Nd6 a1=Q 4.Nf7#  
1...Kg8 2.Nd6 a3 [2...Kh8 3.Nf6 +-] 3.Nf5 a2 4.Nh6+ Kh8 5.Nf6 a1=Q 6.Nf7#
- ⑧ 1.Bxh7+ Kxh7 2.Ng5+ Kg8 3.Qh5  
This classic bishop sacrifice is known as the *Greek gift*. White forces a quick mate. Besides Ng5 and Qh5, a necessary part of the combination is the white pawn at e5. The attack will not work if black can defend by ...Nf6 (or ...Bf5) at some point.  
3...Re8 4.Qxf7+! [4.Qh7+ lets black live a bit longer. 4...Kf8 5.Qh8+ Ke7 6.Qxg7 Ndx6 +-]  
4...Kh8 5.Qh5+ [5.Re3 also mates.] 5...Kg8 6.Qh7+ Kf8 7.Qh8+ Ke7 8.Qxg7#  
Black can try other second moves:  
2...Kh8 3.Qh5+ Kg8 4.Qh7#  
2...Kh6 3.Nxe6+ Kh7 4.Nxd8 +-  
2...Kg6!? is often the best defence against the Greek gift. White usually continues then with Qd3+ or Qg4.  
3.Qg4 f5 4.Qg3 Qe7 5.Nxe6+ ±  
3.Qd3+! f5 [3...Kh6 4.Qh7# or 3...Kh5 4.Qh7+ Kg4 5.h3#] 4.exf6+ Kxf6 5.Rxe6#  
If black declines the sacrifice by 1...Kh8, white can play safe with 2.Bd3 +- or boldly with 2.Ng5 g6 3.Qg4! Kg7 [3...Qe7 4.Qh3!] 4.Bxg6 fxg6 5.Nxe6+ +-

- 9 1.Kg2  
White advances two files away from the black king so that black cannot get the opposition. With the opposition, black could hold the draw. See exercise #52 for a more detailed explanation of this backward pawn formation. [Dritina 1907]  
1...Kf7 2.Kf3 Kf6 3.Kf4 +- [Same as #52.]  
1...Kf6 2.Kf2! Opposition. [2.Kf3? Kf5 =]  
2...Kf5 3.Kf3 Ke5 4.Ke3 +- [See 2...Ke5]  
2...Ke5 3.Ke3  
3...Kf5 4.Kd4 Kf6 5.c5 +-  
3...Kf6 4.Kd4 Ke7 5.Kc3! +-  
1...Kd7 2.Kf3 Kc7 [2...Ke7 3.Kg4! +-]  
3.Kf4 Kb6 4.Kf5 Kc5 5.Ke6 +-  
(The slower 1.Kg1 also wins.)  
(1.Ke2? Ke8 =) (1.Ke1? Ke8 =)  
(1.Kf2? Kf6! = [or 1...Kf8!? =])

- 10 18  
Bg1 Bg3 Bh2 Bf2 Ba7 Bb6 Bb8 Bc7

1...Bxc6 2.Qxc8#  
1...R5xc6 [or 1...R8xc6 or 1...Be6] 2.Qb7#  
1...Rb8 [Only move that avoids a quick mate.]  
2.Rxc5 Qxe5 [2...bxc5 3.Qxd5+ Rb7 4.Qxb7#]  
3.Qxd5+ Qxd5 4.Rxd5

*Interference.* The white rook plops down at the intersection of two lines of defence. [Rook c5 guards c8, bishop d5 defends b7.]

- 7 1.f5 Bxf5 2.e4  
White sacrifices a pawn to break the pin and avoid the loss of a piece.  
2...Bxe4 3.fxe4 cxd3 4.Kc1 Kc7 [4...b5 5.a3] 5.Kd2 Kd6 6.Kxd3 ±  
2...Be6 3.Nf4 ±  
2...cxd3? 3.exf5 Ne7 4.f6 Nd5 5.Kc1 +-  
(1.Kc2? cxd3+ 2.exd3 Bh5 ♣)  
(1.Kc1 cxd3 2.e4 ♣ See 1.e4 below.)  
(1.e4 cxd3 2.Kc1 f5! 3.e5 Bf7 [or 3...Bh5 4.Kd2 Bxf3 5.Kxd3 Bd5 ♣] 4.b3 [4.a3 Bc4 -+]  
4...Ne7 5.Kd2 [5.Be1 Nd5 6.Bg3 Ne3 -+]  
5...Nd5 6.Kxd3 Nxf4+ 7.Kd2 ♣ [After 7.Ke3, black can win by trading off the white bishop. A sample game is: 7...Nd5+ 8.Kd4 Nxc3 9.Kxc3 Kc7 10.f4 Kc6 11.Kd4 Kb5 12.Kc3 Kc5 13.a4 Kd5 14.Kd3 Be8 15.Ke3 Kc5 16.Kd3 Kb4 17.e6 (17.Kd4 Bf7 -+ or 17.Kc2 Bf7 -+) 17...Kxb3 (17...Kc5 18.Kc3 Kd6 -+) 18.a5 Kb4 19.Kd4 Kxa5 20.Ke5 b5 21.Kxf5 b4 22.Ke4 b3 23.Kd3 Kb4 24.f5 b2 25.Kc2 Ka3 26.f6 Bg6+ 0-1 ])

- 8 1.Rb6  
The white rook occupies the "hole" in the black position. This prevents the backward b-pawn from moving and keeps the black rook tied to its defence. In the meanwhile, white will advance the kingside majority and make a passed pawn. Black can only sit and watch. Here is a sample finish: 1...Kd7 2.Ke4 Ke7 [2...Kc7 3.Rf6 Rf8 4.e6! +-] 3.g4 Kd7 4.f5 gxf5+ 5.gxf5 Ke7 6.a4 Kd7 [6...a5 7.Kd5 Rd8+ 8.Kc5 Rd7 9.Rb5 +-] 7.a5 Ke7 8.f6+ Kd7 9.Kf5 Kc7 10.e6 fxe6+ 11.Kxe6 +-  
(1.Ke4 [or 1.g4] 1...b5 =) (1.a4 b5 2.axb5 axb5 =)

- ⑨ 1.Re1  
The white king is cut off along the d-file, but white can still draw because black's pawn is only on its fourth rank. This gives the white rook enough room in front of the pawn for a life-saving "attackathon".

1...Re8 2.Kd3 = See exercises #17, #44.  
1...Rc8+ 2.Kd3 =  
1...Kf4 2.Rf1+ Ke3 3.Re1+ Kf4 4.Rf1+ Kg3  
5.Re1! Kf4 6.Rf1+ Kg5 7.Rg1+ Kf5  
8.Rf1+ Ke6 9.Re1! White must keep pressure on the pawn. 9...Rd4+ 10.Kc3

(1.Qb8+? Qg8! [1...Kh7 2.Qh8+ =]) 2.Qe5+ Rg7-→)

- ⑧ 1.Be5

This exercise is about choosing the right minor piece endgame. To win, white must avoid trading the light-squared bishop (h3) for the black knight. That exchange would give bishops of opposite colour, famous for their drawing power.

1...Kf7 [1...b5? 2.Be6! → with an eternal pin.]  
2.Bxf6!

White has the "advantage of two bishops". But instead of keeping them, white trades one for the black knight to reach a good vs. bad bishop ending. Look at the colour of the squares that the pawns are blocked on.

This is a good example of converting one type of advantage into another. *Our plan should always be flexible.* It is often best to steer the game in a different direction if circumstances change or new opportunities arise. [continued on next page]

[continuing from 1.Be5 Kf7 2.Bxf6]  
 2...Kxf6 3.Ke3 Ke7  
 [3...Bb5 4.Kd4 Ke7 5.f5 gxf5 6.Bxf5 +-]  
 4.Kd4 Kd6 5.Bc8! The easiest way.  
 [5.f5 also wins, but requires some trickery.  
 5...Bd7 6.Ke3! Ke5 7.d4+ Kf6 8.Bg2! +-]  
 5...b5 [5...Kc7 6.Be6 Kd6 7.Bf7 +-] 6.f5 gxf5  
 7.Bxf5 Be8 [7...b4 8.Bg6] 8.g4 hxg4  
 9.Bxg4 b4 10.h5 Bf7 11.h6 Bg6  
 12.Bf3 Ke6 13.Bxd5+ Kf6 14.Be4 1-0  
 (1.d4? Ne4+ 2.Kf3 Nxd6 -+)  
 (1.Bc7 A good move but black can hold on.  
 1...Nd7!? This retreat draws if white trades  
 on d7 in order to capture b6.  
 2.Bxd7? Bxd7 3.Bxb6 Kf6 4.Ke3 Kf5 =  
 But white can avoid opposite B's:  
 2.Ke3! Kf6 3.Bd8+! Kf7 4.Kd4 ±  
 1...b5? 2.Be5! +-  
 1...Ng4+! This move is the main black  
 defence if white doesn't pin the knight.  
 2.Ke2 b5 =  
 2.Kf3 Bd7 3.Bxb6 Ne5+!? 4.fxe5 Bxh3  
 5.Ke3 Kf7 6.Kd4 Ke6 =  
 2.Bxg4 This capture leads to a drawn  
 ending with bishops of opposite colour.  
 White will be up a pawn, but the drawing  
 power of the opposite bees is too great.  
 The loss of the b6 pawn is not important  
 since there is a backup on b7.  
 2...hxg4 3.Bxb6 Kf6 4.Ke3 Bb5! 5.d4  
 [5.Kd4 Kf5 6.Kxd5 Bxd3 =] 5...Kf5 =)  
 (1.Ke3 Ng4+!  
 2.Bxg4 hxg4 3.Kd4 Kf6 4.Bc7 Bb5!  
 [or 4...b5 =] 5.Bxb6 Kf5 = Now black can  
 safely sit and do nothing. The king stays  
 on e6 or f5 and the bishop shuffles  
 between a6 and b5. If white takes d5,  
 black takes d3. If white pushes d4, then  
 the black B bounces between a6 and c4.  
 2.Kd4 Nf2!?  
 3.Be6 Kf6 4.Bxd5 [see 3.Bg2 Kf6 4.Bxd5]  
 3.Bf1 Kf6 = [3...Nh1? 4.f5! gxf5 5.Ke3 ±]  
 3.Bg2 Kf6 4.Bxd5 [4.Bc7 b5 =] 4...Bxd5  
 5.Kxd5 Nxd3 ± but drawable.

 (1.f5 Ng4+! [1...Bd7? 2.Ke3 Bxf5 3.Bxf5 gxf5  
 4.Kf4 Kg6 5.Ke5 +- or 1...gxf5? 2.Bxf5 ±]  
 2.Bxg4 hxg4 3.fxg6 [3.Be5+ Kf7 4.f6 Bb5 =]  
 3...Kxg6 4.Ke3 Bb5 5.Bc7 Kh5 6.Bxb6 Ba6 =)

9 1.Bd5  
 White forces a bishop trade to simplify into  
 a won pawn ending. White has a *healthy*  
 pawn majority on the queenside (3 to 2) but  
 black's majority on the kingside is *crippled*  
 by doubled pawns. A crippled majority can  
 not make a passed pawn as quickly, and  
 sometimes can not make one at all.

1...Bxd5 2.Kxd5  
 2...g4 3.fxg4 fxg4 4.Kd6 +-  
 2...f4 3.b4 Kf5 4.b5 g4 5.c6 +-

### CHESS PLAYER'S LULLABY

Restless nights  
Trying to sleep,  
Counting knights  
instead of sheep

- ❸ 1.Rc7  
Zugzwang! That's a German word which  
means "stuck moving". Black is stuck here,  
and has no moves that don't lose material.  
[1...Ra8 2.Bxa8 or 1...Nd5 2.Bxd5 exd5 3.Rxc8+  
or 1...Bb7 2.Bxb7 or 1...Kg7 2.Rxe7+ ]  
If black could just sit and do nothing, then  
white has no easy way to break through.  
But in chess, we always have to make a  
move. We can't "pass a turn"!  
(1.Kf2? Bd7! 2.Rc7 Be8 =)  
(1.Ra1? Bd7 2.Ra7 Be8 =)  
(1.Bc6? Nxc6  
2.bxc6 Ra8 3.Rb1 Ke7 4.Rxb6 Kd8 ±  
2.Rxc6 Bd7 3.Rc7 Ke7 ±)
- ❹ 1.e4  
White can only draw by advancing and  
sacrificing the pawn immediately.  
1...Kc4 2.Ke2 Kd4 3.Kd2 Kxe4 4.Ke2 =  
With the black king on its fifth rank, white  
draws with the opposition. See exercise #1.  
Other moves allow black to win the pawn on  
e3, when the opposition will not save white.  
(1.Kd2? e4! 2.Kc2 Kc4 3.Kd2 Kb3 4.Ke2 Kc3  
5.Kf2 Kd3 6.Kf1 Kxe3 7.Ke1 With the black  
king on its sixth rank, black wins no matter  
who has the opposition. 7...Kd3 8.Kd1 e3

2...Bxd4+ 3.Kh1 f6 ♯)

9 1.Rc7

Rooks love the seventh rank. From there, they attack the opposing pawns from the side. Since pawns only go forward, they are weakest when attacked from behind or the side. They cannot help defend themselves in those directions. Having the black king trapped on the back rank also makes this endgame a lot of fun for white.

1...Rxe2 2.Rxb7 ± This exchange of pawns gives white a queenside pawn majority. So white can easily make a passed pawn. With an extra pawn, creating a passer is usually the winning plan. (2...a5 3.a4 Re4 4.b3 Re2 5.Rb5 Rb2 6.Rxa5 Rxb3 7.Ra7! +-)

1...Rb8?! ± The black king is cut off on the last rank and the black rook is in a passive position guarding the b-pawn.

(1.Kf1 Re7! ±) (1.Rc2?! Re7! ±)

(1.e3 Re7! ± Keeping the white rook off the 7th rank. Black is down a pawn but has good drawing chances because the white rook is not too active and the black king is free to come forward and help the defence.)

- ⑧ 1.Nb5 Rac8 [or 1...Ne4] 2.Nbd4 ±

The key feature in this position is the black *isolani* (isolated d-pawn). The correct plan for white is to *blockade* the pawn and to play for an endgame, where the weakness of the d-pawn will become more noticeable.

Black's best plan is to play for an attack with their active pieces. The *isolani* is often a strength in the middlegame. It helps to

control the centre and to support a knight at the e4 outpost.

Failure to blockade the *isolani* can lead to disaster for white. If the d-pawn is allowed to advance, the centre will be opened to the advantage of black's better placed pieces.

- (1.Rc1? This natural developing move leaves the d-pawn free to do its thing.  
1...d4! 2.Nxd4 Nxd4 3.exd4 Rxd4! →  
Black has gotten rid of the isolated pawn,  
and opened lines for the rook at d8 and  
bishop at b7. White is in big trouble.  
4.Qc2 Qe5! With threats to the king.  
5.Nb5? Qg5 6.g3 [6.Bf3 Bxf3 or 6.f3 Rd2+]

An unexpected *obstruction* that will either unpin the white rook or deflect the black queen from the defence of f7.  
(1.Qf6+ Kg8 2.Qd8+ repeats [2.d5? Rxd5 +-])  
(1.Qg5+ Kf8 2.Qd8+ Kg7 repeats)

- 7 1.Qc8+ Kh7 2.Rxe5 +-  
[Black keeps a good attack on 2.Rd8? Nf7! ♯ and wins after 2.Qd8? Qh3! (or 2...Rg5) +-]  
The queen goes to the h3-c8 diagonal with tempo before the black knight is captured. Now there is no mate by 2...Qxh2+? 3.Kxh2 Rh4+ because white can block with 4.Qh3.  
(1.Rxe5? Qxh2+ 2.Kxh2 Rh4#)
- 8 1.Rab1  
With this pawn structure, the best plan for white is to weaken the black queenside by advancing the b-pawn and opening lines on that part of the board. This plan is called a *minority attack*, because white attacks a larger group of pawns [the majority] with a smaller group [the minority]. Here, the white a and b pawns attack black's a, b, and c. The goal is to trade pawns so that black is

left with a weakness. The minority attack is a slow but effective plan. The b-pawn is usually supported by a rook on b1.

1...Rfe8 2.b4!  
 2...Qe6 3.b5 cxb5 4.Bxb5 Rec8 5.Qb2 ±  
 2...a6 3.a4  
 3...Nf6 4.b5 cxb5 5.axb5  
 5...axb5 6.Rxb5 ± Black has weak pawns at b7 and d5.  
 5...a5 6.b6 ± The a-pawn is more of a weakness than a strength.  
 3...Qf6 4.b5 ± Now black has no way to avoid getting a weak pawn.  
 4...cxb5 5.axb5 a5 [5...Rac8 6.Qb2] 6.b6 ±  
 4...Re6 5.bxa6 bxa6 6.Rb7 ±  
 4...axb5 5.axb5  
 5...Rac8 6.Bxe4 [6.b6!? ±] 6...dxe4  
 7.Rb4!? Qf3 8.Rc4 ±  
 5...cxb5 6.Bxe4 dxe4 [6...Rxe4 7.Rxb5 ±]  
 7.Rxb5 ± White has the better game. The isolated b-pawn is weak and the protected passed d-pawn is strong.  
 1...f5 2.b4! g5 [2...a6 3.a4 ±] 3.b5 ±  
 1...a5 2.a3

2...Rfe8 3.b4 axb4 4.axb4 Qe6 5.b5 ±

- 8 1.Kd2  
This position is complex and balanced.  
White is up a pawn, but black has active pieces and the white queen is out of play.  
More importantly, the white king is on the brink of disaster. If he doesn't run for safety on the kingside, he will perish on the queenside when black opens the b-file.  
1...b4 2.axb4 Rxb4 [2...Nxb4 3.Qxe5 f6 4.Qc7 ±]  
3.Ke3! Ra4 4.Kf2 ±  
Happily moving into his new castle.

- ⑧ 1.Ng6 fxc6 2.Bxd5 Rb8 3.Rac1 ±  
A clever fork forces a major weakening of  
the black pawn structure. The position in  
the diagram is balanced. White's isolated  
d-pawn is blockaded by the black knight,  
but white has better development and a  
good outpost at e5. After 3.Rac1, black has  
weak pawns at e6 and g6, and all of white's  
pieces are better placed than black's.

A very tricky position where white is down a  
bishop and a pawn, not to mention that the  
rook on c7 is hanging. But the weak black  
king and the open 7th rank are good signals  
to look for fun on h7! The white knight is  
sacked to temporarily guard the rook on c7  
and to open the e-file for the other rook.  
1...cxd5 2.Rxh7+!  
[Doubling rooks by 2.Ree7 also wins.

 Sometimes there are no good moves! And we have to look for the *least evil*. One way to save a bad position is to simplify into an inferior endgame that offers some drawing chances. Endings with rooks or queens can often be held, even if you are down a pawn or two, if you have an active piece.  
 In this example, white is up the exchange for a pawn. But the black threats are too strong, so white must give back material to avoid a quick disaster. The best defence is to head for a rook endgame.  
 1...Rxd4 2.Qc8+!

- ⑧ 1.Kb2

This exercise is about *sister squares*. They are something like the *opposition*, but more complicated. (Some books also call them *related squares* or *co-ordinate squares*.)

The first thing to note in this position is that the white king cannot go too far on the kingside (f6) or the black c-pawn will queen. In order to win white must capture the black c-pawn. The other thing to notice is that the black king cannot go to d5 or to the a-file because then the white d-pawn will queen.

Black loses if the white king can advance to b5. So the black king must try to hold him back. When white plays to a4, black must go to b6. When white plays to c4, black must play to c6. These are called "sister squares". Let's number them:

#1 a4 - b6 #2 c4 - c6

Look what happens if black plays differently: (1.Kc4 Kb6? 2.d7! Kc7 3.Kxc5 Kxd7 4.Kb6 +-) (1.Ka4 Kc6? 2.Ka5! Kb7 3.Kb5 +-)

When the white king is on b3, he can move to a4(#1) or c4(#2), so black must be able to move to b6 (#1) or c6 (#2). That means

the black king must be on b7 if the white king is on b3. These are also sister squares: #3 b3 - b7

We can now add some other squares too. If the white king is on c3, he can go to a #2 (c4) or #3 (b3) square. So black must also be able to go to a #2(c6) or #3(b7) square, which means that the black king should go to b6 (#1) when the white king is on c3 and that c3 is also a #1 square.

If the white king is on a3, where it can go to a4(#1) or b3(3#) the black king must be on c6 (#2) so that it can also go to a #1(b6) or #3(b3) square. So a3 is a #2 square.

Our new list of sister squares is:

- #1 a4,c3 - b6  
#2 c4,a3 - c6  
#3 b3 - b7

This list is a guide for where each player wants to move. When kings are on sister squares, both players want it to be the opponent's turn. This is like the opposition.

Now let's look at b2. From there, the white king can go to a3(#2), b3(#3), or c3(#1). Black has no sister square for b2. To reach c6(#2), b7(#3), or b6(#1), the black king needs to be on c7, but that is impossible because of the white pawn on d6. And that is why 1.Kb2 is the winning move!

- 1...Kb6 2.Kc3!  
2...Kc6 3.Kc4 Kb6 4.d7! Kc7 5.Kxc5 Kxd7 6.Kb6 Ke7 7.Kc6 +-  
2...Kb7 3.Kb3 Kb6 [3...Kc6 4.Kc4] 4.Ka4 +-  
1...Kc6 2.Ka3!  
2...Kb7 3.Kb3 Kc6 [3...Kb6 4.Ka4] 4.Kc4 +-  
2...Kb6 3.Ka4 Kc6 [3...Ka6 4.d7 or 3...Kb7 4.Kb5 +-]  
4.Ka5 Kb7 [4...c4 5.Kb4+-] 5.Kb5+-

Sister squares are only useful in a few endings with unusual blocked structures. The opposition, which is a special case of sister squares, is much more common.

See next page for white's other first moves.

(1.Ka4 Kb6 2.Kb3 Kb7 3.Kc3 Kb6 4.Kc4 Kc6 5.Kb3 Kb7 6.Ka3 Kc6 7.Ka4 Kb6 8.Kb3 Kb7  
The white king must retreat to the second rank (b2) to make progress. 9.Kb2! +-  
[9.Ka2 Kb6 (a2 is #1) 9.Kc2 Kc6 (c2 is #2)])

(1.Ka3 Kc6 or 1.Kc3 Kb6 Again the white king must go to b2 in order to win.)

(1.Kc4 Kc6 2.Kd3 [2.Kb3 Kb7 or 2.Kc3 Kb6] 2...Kb7 [2...Kd7? 3.Kc3 Kc6 4.Kc4 +-] 3.Ke4 [3.Kd2 +-] 3...Kc8 4.Kf4 Kd8 5.Kg5 Kd7 6.Kf4 [6.Kf6? c4+-] 6...Kd8 7.Ke4  
The journey to the kingside accomplished nothing. The long road to victory is still back through b2.) [based on Grigoriev 1922]

Don't worry if you had trouble understanding sister squares. This ending is as difficult as anything in chess.

9 1.b5 cxb5 2.c6

White sacks a pawn to make a passer. In queen endings, passed pawns are usually more important than the number of pawns.

- 8 1.Qb4

Bishops of opposite colour are strange  
beasts. In the endgame, they help the  
defender because of their drawing power.  
But in the middlegame, they help the  
attacker. Their ability to dominate squares  
make them a fierce weapon.

In this position, white is up two pawns, but  
black is forking the white bishop and queen.  
The attacking power of the dark-squared  
B is so great, that white chooses to give up  
the queen instead of the bishop!

You were looking for ways to deflect the  
black queen from its protection of e5, right?

(1.Qf2+? Kg5 2.Qc5+ Qf5 →)

- ⑦ 1.Re8+ Bxe8 2.Ne7+ Kf8 3.Ng6+  
It's stalemate after 3...hxg6 [or 3...fxg6] and white draws by perpetual check if black refuses to capture the knight. 3...Kg8  
4.Ne7+ Kh8 5.Ng6+ Kg8 6.Ne7+ ½-½  
(1.Nb6? f6+ 2.Kf5 Bc2+ 3.Ke6 Rc6+ →)  
(1.Ra7? f6+ →) [based on Selesniev 1923]

- ⑧ 1.b8=N+

The only move that wins, IF white knows how to mate with a bishop and knight!

(1.b8=Q? ½-½ stalemate)

(1.b8=R? ½-½ stalemate)

(1.b8=B? ½-½ Two bishops on the same colour squares cannot checkmate.)

(1.Bh2? Kxb7 ½-½ K+B cannot mate.)

The B+ N mate is one of the hardest basic endgames in chess. It can often take 40 moves to win, even with accurate play. The deadline for a draw is 50 moves, so a single slip may throw away the win.

To mate the king, he has to be on a corner square which is the same colour that the bishop is on. In this example, on a1 or h8. The other two corners are "safe".

There are three steps to this mate:

1. Force the black king to the side of the board. This part is easy if the three white pieces work together.
2. Drive the black king away from the "safe corner" to one of the "mating corners". This part is tricky and it is a good idea to memorize the standard technique.
3. Once the black king is near the mating corner, regroup the pieces for the mate. This part is not too hard.

Let's see how the method works!

1.b8=N+ Kb7 2.Bh2 Kb6

Black decides to stay by the "safe corner". In this example, the black king begins near the side of the board, so forcing him to the side (step 1) doesn't take too long.

*Black can make things tougher by heading for the h1 corner! Then it takes longer to force him to the side. 2...Kc8 3.Kb5 Kd8 4.Kc6 Ke7 5.Kd5 Kf6 6.Nd7+ Kf5 7.Ne5 Kg5 8.Ke4 Kh4 9.Kf4 Kh3 10.Bg1 Kg2 11.Bd4 Kh2 12.Kf3 Kh1 13.Nd3 Kh2 14.Be5+ Kh1 15.Nf2+ Reaching a position that is similar to the diagram below, but in the h1 corner.*

3.Bd6 Kb7 4.Kb5 Ka8

The black king goes to the safe corner.

4...Kc8 5.Kc6 Kd8 6.Nd7 Ke8 7.Ne5 Kd8  
8.Bc5 Ke8 9.Kd6 Kf8 10.Ke6+ Kg7 11.Be3 Kf8  
12.Kf6 Ke8 13.Bb6 Kf8 14.Nf7 Ke8 15.Ke6 Kf8  
16.Bd4 Ke8 17.Bf6 Kf8 18.Nd6 Kg8 19.Kf5 Kf8  
20.Kg6 Kg8 21.Be7 Kh8 22.Nf5 Kg8  
23.Nh6+ Kh8 24.Bf6#

5.Kc6 [5.Kb6? stalemate]

5...Ka7 6.Nd7 Ka8 7.Nb6+

This lineup of KBN is the standard "starting position" for driving the king from the wrong corner to the right corner (step 2).

7...Ka7 8.Bf4

A "nothing move" that passes the turn to black.

8...Ka6 9.Bb8

The king will be forced one square at a time down the board to his final resting place on a1.

9...Ka5

This is where things get tricky. The black king will try to outrun the white pieces and make a dash for the other safe corner at h1.

White must play the following 4 moves very accurately to prevent the black king's escape. The next 3 moves for white are N-K-N. And then a cool bishop move.

## 10.Nd5 Ka4

10...Ka6 Going back towards a8 actually makes things easier for white. 11.Nb4+ Ka5  
 12.Kc5 Ka4 13.Kc4 Ka5 14.Bc7+ Ka4  
 15.Nd3 Ka3 16.Bd8 Ka4 17.Nc5+ Ka3  
 18.Kc3 Ka2 19.Kc2 Ka3 20.Ba5 Ka2  
 21.Bb4 Ka1 22.Nd3 Ka2 23.Nc1+ Ka1 24.Bc3#

11.Kc5 Kb3 12.Nb4!

A very important move that takes charge of the light squares c2 and d3.

12...Kc3 13.Bf4!

The bishop covers the dark squares d2 and c1, and the black king is fenced in.

This formation is the key to mating with B + N. White is now ready for the big finale, driving the black king to the corner square a1. This part of the game is not too hard.

A useful thing to remember is that the white king needs to be on b3 or c2 for the mate (a "knight's jump" from the corner).

13...Kb3 14.Kb5 Kc3 15.Be3 Kb3 16.Bd4 Ka3  
 17.Kc4 Ka4 18.Bb6 Ka3 19.Nd3 Ka4

19...Ka2 20.Kc3 Ka3 21.Nb2 transposes.

20.Nb2+ Ka3 21.Kc3 Ka2 22.Kc2

The white king reaches his goal.

22...Ka3 23.Bc5+ Ka2

Now that the black king is trapped on the two squares a1 and a2, white just needs to regroup for the mate. The last two moves will be a knight check on c1, and then a bishop check on the long diagonal.

24.Nd3 Ka1 25.Bb4

White "passes the turn" again, which is often necessary in this ending.

25...Ka2 26.Nc1+ Ka1 27.Bc3# Tada!

## 9 1. Ke1

A long narrow road to victory begins with this weird looking move. But chess is weird!

1. . . . Kc4 [1...Ke4 2.Ke2 Kd5 3.Kd3 +-]  
 [1...Ke5 2.Kd2 Ke4 3.Ke2 +-]

 [10...Kb1 11.Kb3! +-]

11. Qd3+! Kb2 [11...Ka2 12.Qb3#]  
 [11...Ka4 12.Qb3+ Ka5 13.Qb5#]

12. Qd2+ Kb1 [12...Ka3 13.Qb4+ Ka2 14.Qb3#]  
 13. Kb3! +- [See exercises #27, #42.]

(1.Ke2? Ke4 2.Kd2 [2.Kf2 Kd3 +-] 2...Kf3 +-)  
 (1.Kf2? Kc4! 2.Ke2 Kc3 3.e4 Kd4 4.e5! Kxe5  
 5.Ke3 = [5...Kd5 6.Kf4 Kd4! (6...Kc5? 7.Kg5 +-)  
 7.Kg5 Ke3 8.Kxh5 Kf3 9.Kg5 Kxg3 10.h5 Kf3! =])

10 Computers are still a long long way from "solving chess". The number of possible games is too incredibly large. The most likely answer to this question is that black can draw. White does have an advantage in the initial setup because of the first move, but there is a "margin of draw" in many basic endgames, where an extra pawn is frequently not enough to win, often because of a stalemate defence.

# LILY'S PUZZLERS

## SOLUTIONS

HI BOYS AND GIRLS!

I'm Lily Pawn. I hope you enjoy my chess puzzles. They are different from the other exercises in the book because they are not *game positions*. These problems were specially *composed* to show you some interesting idea. Or just to be fun!

In most of the puzzles, there are several ways to win, but only one move that mates or forces mate in 2. Don't be surprised if it is hard to find or looks a little crazy!

For all my pals who can't get enough chess puzzles, we've included some extra bonus problems here in the solution pages. They have the same "theme" as the other puzzles. Answers are given at the end (page 240).

Good luck, everybody!

### 1 page 21

12 page 133

- a. 1.hxg6 e.p.#

In chess problems, we can only capture *en passant* if we can prove that black just played a pawn move which allows it.

In this puzzler, black's last move had to be pawn from g6 to g5, because there was no other legal move. Let's look at the different possibilities.

The g-pawn could not have moved from g6, or else the white king would have been in check with black to move.

The black b-pawn is still on its starting square.

The black bishop and rook did not move last turn since both these pieces are totally blocked.

The black king didn't move from g6 because he would've been next to the other king. And he could not have moved from g7 either, because then he would have been in an impossible check by the Bh6, since that bishop had no way to get to h6 on the previous turn.

So the only possible move was ...g7-g5, which means that white can capture (and mate) *en passant*!

This type of problem, where we have to figure out what happened earlier, is called *retrograde analysis*.

In chess problems, we are allowed to castle, unless we can prove that castling is illegal (for example, showing that the king or rook already moved). In this puzzler, there is no proof that the white king or rook on h1 moved before, so we can castle (and mate).

## FINAL NOTES

Yes, it's another book called "Winning Chess ..." Not a great title, though it is descriptive. These exercises will help kids win at chess. But enjoying the game is more important than winning. I hope my book teaches that as well.

Teachers should find the exercise sheets a useful resource. They are ideally suited for homework assignments. The focus is on tactics, but the inclusion of a strategic problem and an ending on each sheet makes for a complete program of study. Although the book can be used on its own, it was written as a companion volume to *Winning Chess Strategy For Kids*.

The material is based on the worksheets I created for my students over the last fifteen years, but the positions are new. The majority of the examples are original compositions. Others were taken from various sources and altered, usually beyond recognition. Changes were made in order to clarify the solution, eliminate needless complications, adjust the level of difficulty, or otherwise make them more instructive. The general goal was to put the winning idea into a new setting.

Most of the artwork appeared previously in *Scholar's Mate*. As always, merci beaucoup to Antoine Duff.

Thanks to family and friends for seeing me through this project. Special thanks to Larry Bevand for his patience, Dale Davis and Ian Howard for their generosity, and Fred Nader for his expertise.

The name *Best Move Contest* originated in the Saturday morning classes I taught at Bloor Collegiate in the early 90's. The student with the top score actually won a prize!

Jeff Coakley  
Toronto, January 1, 2004

## **HAPPY TRAILS!**

### **REMARKS ON SECOND EDITION**

Thanks to everybody who has made *Winning Chess Exercises For Kids* successful, especially the readers. Although this edition is essentially the same as the first, the opportunity was taken to make a few corrections and some small improvements. Five changes to the diagrams are worth noting: #22-5 (added black B on d6), #44-9 (new but similar position, to eliminate an alternative draw), #82-9 (placed black K on f5), #87-1 (added white B on d5), #94-8 (placed white K on h1).

Chess exercises vary greatly in degree of difficulty. Finding the appropriate level for students is important. Problems should be hard enough to challenge them but also easy enough to keep them encouraged. The material in this book will be too difficult for many children. It is intended as a "second level" course. Young players with little experience should begin their studies with more basic tactical exercises, like those in *Winning Chess Puzzles For Kids*. Working through that "first level" material is good preparation for the more advanced exercises in this book.

**WINNING CHESS EXERCISES FOR KIDS** is a fun and comprehensive workbook written for children ages 7 to 13. Full of original material and entertaining artwork, it's the ideal study guide for developing skill at the royal game. Parents and teachers are sure to like it too.

The main part of the book consists of 100 exercise sheets with nine diagrams each. The positions include forced checkmates, combinations that win material, defensive and general strategic problems, as well as endgames. The extensive solution pages give detailed analysis of both correct and incorrect moves. Important concepts are explained in clear and simple language.

Although it can be used independently, this book was designed as a companion to the author's *Winning Chess Strategy For Kids* and *Winning Chess Puzzles For Kids*. Taken together, they provide a complete course of instruction for the aspiring young player.
