**Taking Notes**

**BASICS**
- Clear, concise notes are more effective than long, complicated notes.
- Instead of using a spiral, use a loose-leaf notebook divided into class sections.
- Make all notes on loose-leaf paper; in an upper corner, title and date each sheet as it is used.
- Rewrite and combine your old study and lecture notes into a new single set of notes or outline; use them as a replacement for your old notes in the loose-leaf binder.

**LECTURE NOTES**
- Sit near the front of the class to avoid distractions.
- Be a good listener - focus and concentrate on the main points of the lecture; get them down on paper; you'll put them into your own words later along with your study notes; pay attention to the instructors' clues to what they consider important.
- If there is something you don't understand, ASK!
- For fast classroom access to key information on major topics, use QuickStudy® products, if available.
- Immediately after a lecture, without looking at your notes, try to recall on a separate paper as much as you can about what you have heard and learned; then, review your actual lecture notes to confirm and/or supplement your memory.
- During your next study session, quickly recall again on paper what you learned; then, review and reorganize your lecture notes in your own words.
- Repeat the recall process several times over several days to commit the new information to memory!

> Your listening skills, note taking and ability to manage your sessions will help determine your success in college!

**Dealing with Professors & Tough Classes**

- **MEET WITH YOUR** professors during their posted office hours.
- **TALK TO OTHER STUDENTS** to find out the red flag—which professors to avoid, etc.
- **DON'T BE AFRAID TO ASK** other students and professors for copies of old exams; the questions may change, but the style usually remains the same.
- **MAKE SURE YOUR PROFESSOR KNOWS YOUR NAME**; putting a face with a name will be a big help, especially if your grade is borderline.
- **PROBLEMS WITH FACULTY** should be handled honestly and calmly; always try to remedy conflicts directly with faculty members first; if the problem remains unresolved, seek advice from your academic advisor, a student support services staff member, or your student handbook for the next step.
- **STUDENT INTERVENTION RESOURCES**
  - Department Chair
  - Dean of the College
  - Chancellor or Vice President of Academic Affairs
  - Ombudsman
  - Student Government Attorney
- **WHAT IRRITATES PROFESSORS AND INSTRUCTORS?**
  - Sleeping in class
  - Not going to class
  - Irresponsibility
  - Failure to read the syllabus
  - Excuses
  - Failure to meet deadlines

**Study Strategies**

**Time Management**

- **LEARN TO SAY NO!** Balance social time and study time.
- **DO NOT STUDY FOR MORE THAN TWO HOURS AT A TIME.**
- **TRY TO STUDY DURING DAYLIGHT HOURS.**
- **USE TWO SCHEDULES**
  - Using your class schedules as a guide, block out specific times each day for study and all other activities.
  - Create a semester schedule showing midterms, finals, due dates, and other important events: Weekly, review both schedules and allow more study time as needed; a good schedule keeps you from wandering off course.
- **PRIORITIZE** List what you need to study each day; prioritize and set times for each item and stick to it.
- **USE THE 30-3-2 SCHEDULE**
  - Study for 30 minutes
  - Take a three-minute break; let the break be a time to think about other things
  - Upon returning, take an extra two minutes to mentally review what you have just read and do a quick preview of what is coming up next.

**Study, Study, Study!**

**STUDY - BREAK - REVIEW - PREVIEW - STUDY**

- **ATTEND** as many academic support activities and workshops as possible.
- **STUDY!** This may be a case of stating the obvious, but remember how many students don't bother you.
- **STUDYING WITH SOOTHING MUSIC** in the background (contrary to popular opinion) can enhance your concentration.
- **TUTORING is NOT A BAD THING!** Get help early, before the academic damage is irreversible; many schools offer free tutoring in a variety of subjects.
- **Study groups are great,** but in general, studying alone is more effective.

**Goal Setting**

- Set realistic goals within a specific time-frame (in writing).
- Goals should be specific and clear.
- Determine the purpose of your goals and their achievement benefits; write them down next to your goal.
- Set specific strategies for accomplishing each goal (in writing).
- Set target dates for self-evaluation.
- Periodically visualize your goal, as well as your strategies for accomplishing the goal.
- List potential obstacles to attaining the goal.
- List strategies for overcoming obstacles.
- Follow through on all strategies.

**Receive 25% OFF QuickStudy® and more!**

Get CLEAR, CONCISE INFORMATION containing key facts, definitions & formulas. With over 28 pages of info condensed, the QuickStudy® is a road map for the course. Covers some of the toughest courses taught today!
Don’t Be Afraid To Express A Unique Opinion:

Plagiarism means taking another person’s words or ideas as your own: Be careful to always cite your source whether you quote directly or paraphrase; remember, if it’s not common knowledge or your original idea, you must cite the source.

When Proofreading Text, start at the end of your paper; read one sentence at a time and work your way backwards: How many days will you need to write, edit, re-write, revise, take notes, research, read, select, and narrow the topic?

Now you know what day you will need to begin the paper.

Be sure you know exactly what your instructor expects.

Don’t be afraid to express a unique opinion: The key is to document and support your ideas in an organized and cogent manner.

Library Tips

Do not wait until your first research paper/project to scope out the campus library:

- Many libraries offer tours for freshmen
- Determine the library’s resources, as well as its limitations, as early as possible
- Learn how to use library computers and card catalogs to find books by subject or author
- Practice using every machine in the library (i.e., microfiche, CD Roms, etc.)
- Use the Reader’s Guide to Periodical Literature for magazine articles; encyclopedias for general information on most known topics; almanacs for facts, lists, charts and tables; atlases for maps, etc.; ask the librarian for instruction
- If you use the internet, be sure to cite your research properly

Know copier rules and procedures in advance:
- Where are copiers located?
- Does the copier require cash or some sort of copy card?
- Check out the local community libraries

They may house the one obscure article or book you need to earn that “A”

Writing the Paper

- Make use index cards (put the topic at the top of each card), notes, bibliographies, summaries, reports and reviews as part of your preparation process to organize your materials
- Prepare a written outline
  - Don’t make the mistake of trying to keep everything in your head
  - Make your outline in the form of main headings or ideas with sub-headings fleshing out the flow of the paper; this will establish the paper’s content and conclusion
- Write the paper
  - Use the outline as a guide and stick to it
  - Write in your own natural style
  - Reread, rewrite, revise and edit until the paper says exactly what you want to say, the way you want to say it
  - Use correct punctuation and grammar, and run spellcheck
  - Cite all sources, including Internet searches

Preparation

- Learn the exam format: e.g. objective (true/false or multiple choice) or subjective (essay)
- Review course outline, notes, QuickStudy® products
- Review previous tests; check at departmental office
- Summarize highlights on single sheet

Objective Exams

- Scan the exam to determine types of questions
- Always read and follow directions!
- Determine the exam’s scoring rules and use them to your advantage; if wrong answers are penalized, don’t guess unless you can reduce the choices to two
- Answer easy questions first
- Mark difficult questions and return to them later
- True/False Questions:
  - Pick out key words or those on which the meaning of a statement hinges
  - If any clause in a statement is false, the statement is false
- Multiple-choice questions are essentially true/false questions arranged in groups
  - Usually only one alternative is totally correct
  - Eliminate obvious false choices
  - Of the remainder, pick the alternative that answers most fully all aspects of the question

Essay Exams

- Planning your time when answering essay questions is more important than in objective type tests!
- Read through the entire examination first
  - Get a feel for the questions you are expected to answer
  - If the exam allows you to choose from a number of questions, be sure to number your answers exactly to match the questions
- Follow directions carefully:
  - Pay attention to the key words in the question: Words such as “list,” “describe,” “compare and contrast,” and “outline” require different types of answers
  - Don’t “write around” the question, but answer it directly and concisely
- Outlining
  - After scanning the list of questions, choose those about which you know most
  - On scrap paper, quickly prepare an outline of important ideas and facts to be included in your response
  - Your opening statement summarizes what you are going to write; the following sentence should support your opening statement
  - Your conclusion should show how your body text supported your opening statement

- It is absolutely essential that your ideas can be read and understood: Print neatly and use correct grammar, punctuation, and spelling

  - Your conclusion should show how your body text supported your opening statement

- It is absolutely essential that your ideas can be read and understood: Print neatly and use correct grammar, punctuation, and spelling

When to use QuickStudy

- As a road map for the course
- At the start of a semester as an overview to visualize how all the elements of the class will fit together
- All semester to refresh & reinforce the content

QuickStudy + Textbook + Class Notes = Boosted Grades

Equation for Academic Success!
The SQ3R+Reading Method

1. **SURVEY** - Preview the assignment/material to be studied by scanning the text quickly to discover the central concept. From your preview, formulate an overall picture and the purpose of what you’re going to study.

2. **QUESTION** - What you need to learn in terms of what, why, how, when, who and/or where, to support the central concept. Write these questions in the margins of your textbook or at the top of your lecture or study notes.

3. **READ** - Read specifically to answer the questions. Most paragraphs contain one or more main ideas in support of a concept; locate and highlight them with a marker; make notes in the margins, summarizing key points; pay special attention to bolded or italicized type and to tables, graphs, and illustrations which may explain an idea more thoroughly than text.

4. **RECALL** - Pause periodically (every 15 minutes or so) to recall in your own words a summary of the important ideas you have read; write on notepaper as much as you can recall about what you have read and learned! Each mini-review is a knowledge builder and memory reinforcement.

5. **REVIEW** - Did you answer your questions, understand the new material and accomplish your goal? Reread difficult parts; work a few more problems.

Critical Thinking Skills

- **Learn to evaluate everything you see, read, or hear; decide for yourself what to believe.**
- **Critical thinking is important in order to:**
  - Enhance common sense
  - Filter emotion
  - Categorize experiences
  - Select references
  - Understand the experts
  - Sort fact from opinion
  - Learn to express yourself in a cogent and interesting manner

Money Matters

**Financial Aid**

- **START EARLY AND BE PERSISTENT:** The money will not just come to you.
- **CONSIDER EVERY POSSIBLE SOURCE of educational funding and money leads:**
  - Your school’s financial aid office
  - The Admissions office and recruiters
  - Your academic college
  - Your church
  - Clubs and groups your parents belong to
  - Local civic and special interest organizations
  - Professionals already working in your major field
  - Scholarship resource books
  - Other students
  - Honor societies, sororities, fraternities, etc.
- **FILL OUT ALL FORMS COMPLETELY AND NEATLY:** Include all required documentation.
- **PAY ATTENTION TO PAYMENT DEADLINES:** Sometimes only a few days can cost you big dollars.
- **RESPOND QUICKLY** to all requests for additional information and documentation.
- **STICK WITH IT!** Sometimes the process is slow and frustrating.
- **MAKE AN APPOINTMENT TO SEE A FINANCIAL AID OFFICER AT YOUR INSTITUTION:** Discuss the difference between grants, scholarships, subsidized loans, unsubsidized loans, etc.; find out what type of aid you are eligible for and what type of aid you can live with later; remember, all loans must be repaid.
- **IF YOU ARE AWARDED FINANCIAL AID,** be sure you know the requirements that must be met in order to keep your award (i.e., GPA, work status, etc.).

**Survival Tips**

- **Realize from the onset that tuition does not include any other expenses.**
- **SHOP EARLY IN ORDER TO HAVE THE BEST SELECTION OF USED BOOKS.**
- **You will be bombarded with credit card offers; be careful:** using plastic now may cost you a car or mortgage later.
- **GET A CHECKING ACCOUNT** and learn how to keep your account in balance; most banks have customer service representatives who can assist you.
- **SET A REALISTIC BUDGET AND STICK WITH IT:** Remember to include allowances for variable expenses such as clothing (new purchases and cleaning), transportation, personal care items, leisure activities and an emergency fund.

Finding a Job

- **It’s never too early to contact your school’s Career Development Center.**
- **STUDENT EMPLOYMENT OFFICES** usually list more than one thousand part-time jobs for students; employers who contact the school know that students will answer their ad; these employers usually do not squabble about your class schedule.
- **ALWAYS GO TO AN INTERVIEW DRESSED PROFESSIONALLY.**
- **DON’T CHEW GUM AT AN INTERVIEW.**
- **DO NOT BE DISCOURAGED** if your first job is not in your major field.
- **ALWAYS BE ON TIME FOR APPOINTMENTS:** Be sure to call well in advance if you need to cancel.
- **BE SURE TO FOLLOW ALL INSTRUCTIONS** (i.e., Don’t call a potential employer if the ad says fax a resume).
- **ALWAYS PRESENT A RESUME**—no matter how brief.

Brain Power

- **MEMORIZE FROM GENERAL TO SPECIFIC:** Study the big picture, then learn the details.
- **CRAMMING DOES NOT WORK!** Cramming for an exam only commits the information to your short-term memory.
- **FOUR BASIC REASONS WE FORGET PIECES OF INFORMATION:**
  - Don’t use the information
  - Confuse it with other information
  - Decide the information does not match what you already know
  - Never really learned the information in the first place
- **KEYS TO REMEMBERING:**
  - Be interested: Pay attention; consciously choose to remember; establish a need to remember.
  - Visualize: Picture in your mind what you wish to remember
  - Relate: Relate form associations between the new ideas and information you wish to remember and information, ideas, persons, things, etc., that you already know.
  - Repeat: Even though something is initially learned, it will more than likely be forgotten if not over learned; be sure to repeat information in your own words.
- **KEY IDEAS:**
  - Highlight them in your textbooks and outlines
  - Give extra attention to bolded words or phrases
  - Make up acronyms or mnemonics to recall (i.e., GIGO = Garbage in; Garbage Out) or (Please Excuse My Dear Aunt Sally = Parentheses first, then Exponents, then Multiplication, Division, Addition and Subtraction).
- **MAPPING**
  - Make a mental image of your notes, outlines, color-coded QuickStudy® guides, etc. and where facts are located on them in relation to other topics; these images (fact maps) and their data can often be recalled during tests.

Community Resources

- **MAKE YOURSELF AWARE OF COMMUNITY RESOURCES, ESPECIALLY if you are in a new town; be aware of support services:**
  - Religious institutions
  - Support groups
  - Counseling centers
- **REALIZE THAT YOU ARE A MEMBER OF THE TOTAL COMMUNITY:**
  - Do some volunteer work each semester: It’s a great way to build your resume and gain practical experience, plus it feels good!
Tips for Freshmen

I wish someone had told me...

- GO TO CLASS: Class attendance really does correlate with your grade
- COMMUNICATION IS KEY—especially when dealing with roommates and professors
- BE ON TIME TO CLASS: Walking in late distracts both the professor and other students
- DON'T BE AFRAID TO ASK FOR HELP
- COLLEGE IS NOT A CONTEST: You don't have to compete with anyone for your grade; learn at your own pace and don't feel inferior if you don't understand something the first time around
- DON'T BE INTIMIDATED BY FACULTY AND STAFF: The bureaucracy of higher education is overwhelming; stay calm, ask questions, and be sure you know the name of the person you are talking to

Support Systems Are Essential for Survival: Make friends; talk to everyone

- EXPECT TO FEEL LONELY, FRIGHTENED, AND ISOLATED: But also remember— you are not the only person experiencing these emotions, and it all gets better with time
- READ EVERYTHING! Read your mail!
- Don't take policy advice from other students; check with offices on campus
- JOIN IN ALL THE ACTIVITIES YOU CAN

- USE YOUR COLLEGE CATALOG: You have to open it in order to reap the benefits of what is inside
- Get a copy of your school's code of ethics (honor code); a simple mistake could cost your degree
- MAINTAIN A POSITIVE ATTITUDE, be a good listener, stick to your own convictions, and follow your dreams

Academic Advisement Is Critical! Visit your advisor on a regular basis to make sure you are on track with your academic program, courses, etc.

- PAY ATTENTION TO DEADLINES! If you miss one, it could cost you— not just money but grades as well (ex. drop/add, fee payment, course withdrawal)
- Avoid long lines and high frustration levels; use telephone or computer registration whenever possible
- Be sure to have university or college representatives sign every form dealing with selecting courses, dropping classes, etc.; you may need it to defend a course selection when you apply for graduation or to prove you dropped a class

Save Every Grade Report: Computers have been known to lose grades, courses, credits, etc.

- Periodically ask for an unofficial copy of your transcript; BE SURE YOUR RECORDS MATCH THE REGISTRAR'S
- Select classes based on your own academic capabilities; for example, if science is not your forte, don't take biology and chemistry in the same semester
- Be very careful about taking writing classes during shorter summer semesters; the same holds true for classes requiring large amounts of reading
- READ THE COURSE CATALOG CAREFULLY
- Typically, freshmen are the last students to register so PLAN AN ALTERNATE SCHEDULE PRIOR TO REGISTRATION: your first choice classes may be filled

- RESIDENT ASSISTANTS ARE A VALUABLE RESOURCE; be sure to maintain open communication with your RA
- YOU MUST LEAVE THE BUILDING when the fire alarm rings
- CLEAN UP AFTER YOURSELF: Avoid roommate problems and building contamination

- MANY SCHOOLS OFFER "SPECIALTY FLOORS": reserve your room early and be honest about special requests; some options are:
  - Quiet study floors
  - Upperclassmen floors
  - Health and wellness floors
  - Chemically sensitive floors
  - Multicultural floors
  - Single-sex or co-ed floors

- GET INVOLVED IN RESIDENCE LIFE: Almost every school sponsors some type of residence hall government and community activities

- LOCK YOUR DOORS—even when you are in your room! Better safe than sorry
- PAY ATTENTION TO FEE DEADLINES: Non-payment of housing fees can result in having to live in your car
- IF YOUR SCHOOL ALLOWS COOKING IN THE ROOM:
  - Check to see which appliances are permitted for dorm use:
    - Dorm size refrigerator
    - Microwave
    - Toaster Oven
  - HOT PLATES ARE RARELY ALLOWED! All appliances must have enclosed coils
  - Never leave your food unattended
  - Store leftovers quickly and properly
  - Take out the trash every day!
  - Remember, some schools do provide community cooking facilities, but you may need to clean the area before and after you cook

- THERE ARE FIVE PHASES OF COLLEGE ADJUSTMENT: As a freshman, you may experience some or all of the following phases; in any order, some phases may repeat or overlap:
  - Phase 1—Fascination with the new environment
  - Phase 2—Severe homesickness
  - Phase 3—Finding fault with new surroundings; building stereotypes
  - Phase 4—Finding humor in your adjustment
  - Phase 5—Embracing the new culture; it becomes your "normal" environment

Staying Healthy

BEWARE OF FAST FOOD AND CANDY BARS: Most freshmen gain weight in the first semester

- Gallons of coffee and cola are not the way to survive finals
- Sleep and study in small shifts
- Exercise often during exam weeks
- Pasta, peanut butter, non-sugar cereals, yogurt, and fresh fruit will provide natural and sustained energy
- Check with your school's health services office; it may offer:
  - Free emergency treatment
  - Low cost OB/Gyn exams
  - Free condoms
  - Low cost dental cleaning and x-rays
  - Low cost or free medications
  - Free AIDS testing
  - Low cost lab work
- APPRECIATE MUSIC— It helps everyone to relax

Registration & Advisement

- SAVE EVERY GRADE REPORT: Computers have been known to lose grades, courses, credits, etc.
- Periodically ask for an unofficial copy of your transcript; BE SURE YOUR RECORDS MATCH THE REGISTRAR'S
- Select classes based on your own academic capabilities; for example, if science is not your forte, don't take biology and chemistry in the same semester
- Be very careful about taking writing classes during shorter summer semesters; the same holds true for classes requiring large amounts of reading
- READ THE COURSE CATALOG CAREFULLY
- Typically, freshmen are the last students to register so PLAN AN ALTERNATE SCHEDULE PRIOR TO REGISTRATION: your first choice classes may be filled

- Resident Assistants Are a Valuable Resource; be sure to maintain open communication with your RA
- You Must Leave the Building when the fire alarm rings
- Clean Up After Yourself: Avoid roommate problems and building contamination

- Many Schools Offer "Specialty Floors": Reserve your room early and be honest about special requests; some options are:
  - Quiet study floors
  - Upperclassmen floors
  - Health and wellness floors
  - Chemically sensitive floors
  - Multicultural floors
  - Single-sex or co-ed floors

- Get Involved in Residence Life: Almost every school sponsors some type of residence hall government and community activities

- Lock Your Doors—even when you are in your room! Better safe than sorry
- Pay Attention to Fee Deadlines: Non-payment of housing fees can result in having to live in your car
- If Your School Allows Cooking in the Room:
  - Check to see which appliances are permitted for dorm use:
    - Dorm size refrigerator
    - Microwave
    - Toaster Oven
  - Hot Plates Are Rarely Allowed! All appliances must have enclosed coils
    - Never leave your food unattended
    - Store leftovers quickly and properly
    - Take out the trash every day!
    - Remember, some schools do provide community cooking facilities, but you may need to clean the area before and after you cook

- There Are Five Phases of College Adjustment: As a freshman, you may experience some or all of the following phases; in any order, some phases may repeat or overlap:

  - Phase 4—Finding humor in your adjustment
  - Phase 5—Embracing the new culture; it becomes your "normal" environment

Success Stories

Hear what professors and students are saying about QuickStudy!!

Professors

“we've never seen anything like your guides. They have all the basics right in front of the student.”
- M. Henderson

“As a math professor of 25 years, I've never seen anything so complete and totally useful to our students.”
- P. Shock

“Your Biology guide is very comprehensive, with detailed illustrations. It's a great course supplement.”
- B. Riser

Students

“I love the thorough, concise facts QuickStudy® guides provide; it seems that a book’s worth of information is jam-packed into a handy, easy-to-use format.”
- T. Ahlgren

“I purchased your Spanish guide and love it! It’s complete, yet concise and easy to use. Your guides help me grasp the grammar and little things of Spanish.”
- G. Royce

“They have all the basics right in front of the student.”
- N. Shadshel
