

CONVENIO

One step further towards 'Invisible light'

The new **CONVENIO** family with its contemporary and minimalist design accentuates lighting effect almost perfectly.

The ultra slim design (15mm - including mounting bracket) allows the product to be surfaced mounted and have a minimal effect on its surrounding. However, it has a high lumen output that will illuminate any under cabinet, wall or ceiling to great effect.

Combining ease of install (simply screw bracket to wall and push fit light in

place) with a simple modular connection means the end user to create endless lighting possibilities. The comprehensive range of **CONVENIO** accessories available allows the lighting system to be expanded and to seamlessly go up, down or around corners.

CONVENIO is a range of products that create a linear modular lighting system with seamless linking between products such as linear light, linear spot light and spot light.

CONVENIO

One step further towards 'Invisible light'

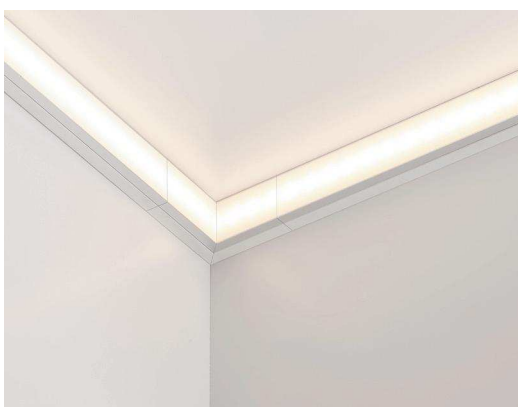

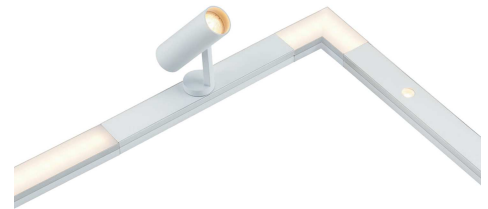

- CONVENIO Linear Spot ideal for uplighting or wall washing

- CONVENIO Spot ideal for spot lighting

- Modular connections means it is simple to install and you can connect various lighting options together

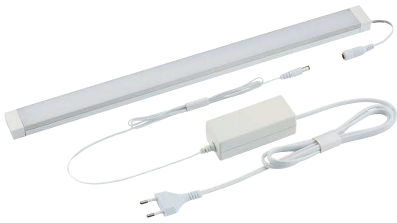

- Comprehensive range of accessories - flat, inner and outer corners with touch sensor dimmer
- Unified electrical and mechanical connection within CONVENIO allows for easy upgrade to smart control, sensor technology and RGBW

CONVENIO

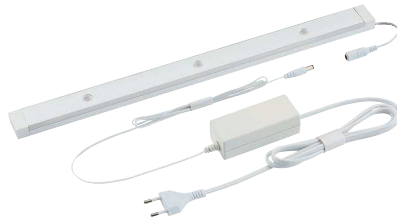

One step further towards 'Invisible light'
